NATIONAL RESIDENT MATCHING PROGRAM

2121 K Street, NW
Suite 1000
Washington, DC 20037

The NRMP is governed by a 19-member Board of Directors, including:

- Chair, Chair-Elect, and Secretary/Treasurer
- Two graduate medical education program directors
- Three medical students
- Three resident physicians, one of whom is an international medical graduate
- One public member

Officers

- **Chair:** Hal B. Jenson, M.D., M.B.A., Founding Dean, Western Michigan University School of Medicine
- **Chair Elect:** Maria C. Savoia, M.D., Dean for Medical Education, University of California San Diego
- **Secretary/Treasurer:** Glenn A. Fosdick, F.A.C.H.E., Former President/Chief Executive Officer, The Nebraska Medical Center
- **President and Chief Executive Officer:** Mona M. Signer, M.P.H., National Resident Matching Program

Board Members, 2014-2015

- Sameer Ather, M.D., Cardiovascular Disease Fellow, University of Alabama at Birmingham
- C. Bruce Alexander, M.D., F.A.S.C.P., Professor and Vice Chair, Department of Pathology, University of Alabama at Birmingham
- Maya A. Babu, M.D., M.B.A., Neurological Surgery Resident, Mayo Clinic, Rochester, MN
- Carol D. Berkowitz, M.D., F.A.A.P., F.A.C.E.P., Executive Vice Chair, Department of Pediatrics, UCLA-Harbor Medical Center; Distinguished Professor of Pediatrics, David Geffen School of Medicine at University of California at Los Angeles
- Pavan K. Cheruvu, M.D., Cardiovascular Disease Fellow, University of California at San Francisco
- Rita K. Cydulka, M.D., M.S., F.A.C.E.P., Former Professor and Vice Chair, Department of Emergency Medicine, MetroHealth Medical Center
- Francis Deng, M.D. candidate, Washington University School of Medicine
- John DePaolo, M.D./Ph.D. candidate, Louisiana State University School of Medicine
- Michael H. Duyzend, M.D./Ph.D. candidate, University of Washington School of Medicine
- Jane L. Eisen, M.D., Associate Professor and Vice Chair for Academic Affairs, Department of Psychiatry and Human Behavior, Brown University
- Susan Guralnick, M.D., Director of Graduate Medical Education, Winthrop University Hospital
- Marc J. Kahn, M.D., M.B.A., F.A.C.P., Senior Associate Dean for Admissions and Student Affairs, Tulane University School of Medicine
- Mahendr Kochar, M.D., M.S., M.B.A., J.D., Associate Dean of Graduate Medical Education, University of California at Riverside
- Daniel S. Morrissey, O.P., Public Member
- Steven J. Scheinman, M.D., President and Dean, The Commonwealth Medical College
- Kenneth B. Simons, M.D., Associate Dean for Graduate Medical Education and Accreditation, Medical College of Wisconsin

About the NRMP

The National Resident Matching Program (NRMP) is a private, not-for-profit corporation established in 1952 to optimize the rank-ordered choices of applicants and program directors. The NRMP is not an application processing service; rather, it provides an impartial venue for matching applicants' and programs' preferences for each other consistently.

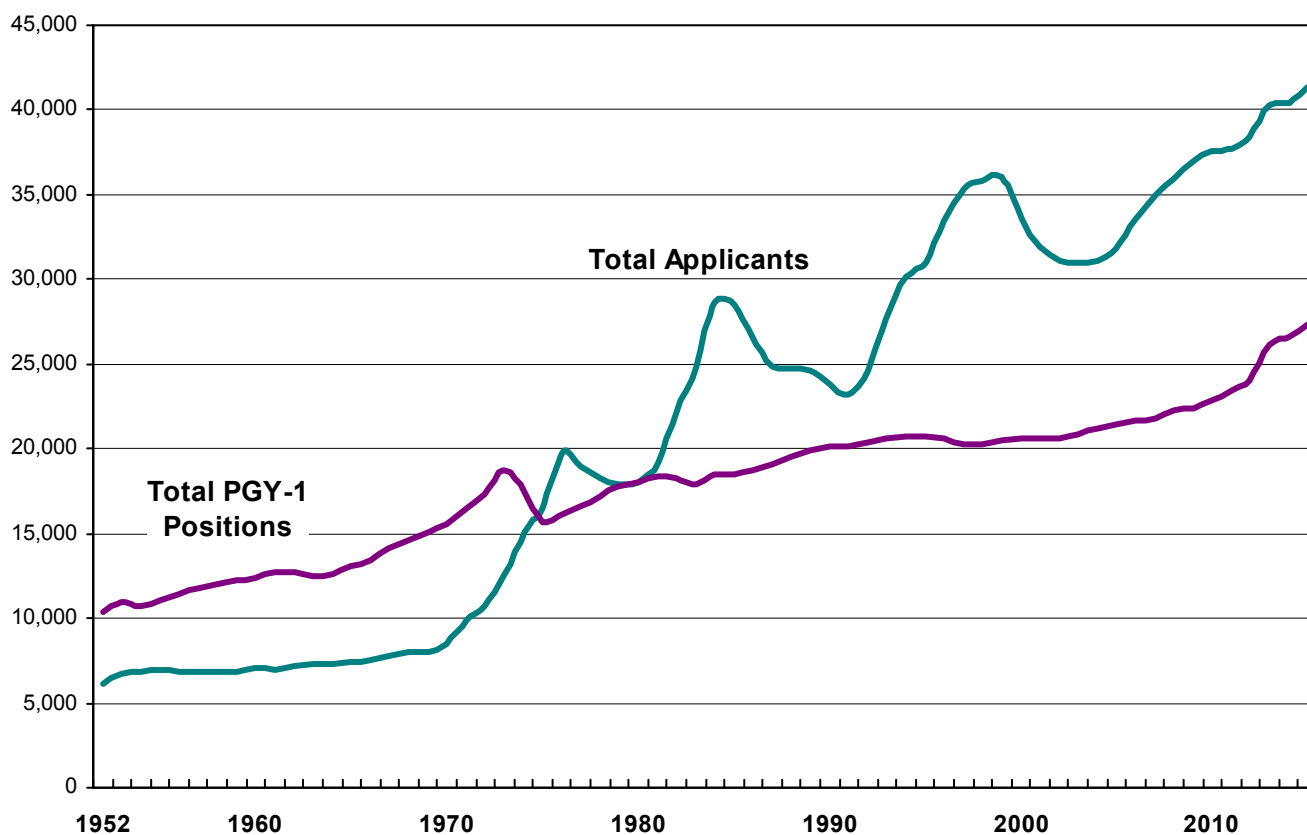

The first Main Residency Match® ("the Match") was conducted in 1952 when 10,400 internship positions were available for 6,000 U.S. graduating seniors. By 1973, there were 19,000 positions for just over 10,000 U.S. graduating seniors. Following the demise of internships in 1975, the number of first-year post-graduate (PGY-1) positions dropped to 15,700. The number of PGY-1 positions offered gradually increased through 1994 and then began to decline slowly until 1998. This year, a record-high 27,293 PGY-1 positions were offered (Figure 1), the

thirteenth consecutive annual increase in such positions.

The trend in the total number of applicants since 1952 is more dramatic, starting with 6,000 in 1952 and rising to a high of 36,056 in 1999. After a decline of 5,052 applicants from 1999 to 2003, the number of applicants has increased each year since the 2004 Match. Applicants registered for the 2015 Match reached an all time high of 41,334, an increase of 940 applicants over 2014.

For more information about the NRMP, please visit: www.nrmp.org. Additional data and reports for the Main Residency Match and the Specialties Matching Service® (SMS®) can be found at: www.nrmp.org/match-data. Instructions on how to request NRMP data also are provided.

Figure 1 Applicants and 1st Year Positions in The Match, 1952 - 2015

Glossary

ACGME	Accreditation Council for Graduate Medical Education
Active Applicant	An active applicant is one who submits a certified rank order list of programs.
Applicant Type	<p>The NRMP classifies applicants for the Main Residency Match® into seven types:</p> <ul style="list-style-type: none">• <i>Senior of U.S. Allopathic Medical School (U.S. Senior)</i>: A fourth-year medical student in a U.S. allopathic school of medicine accredited by the Liaison Committee on Medical Education (LCME) with a graduation date after July 1 in the year before the Match. U.S. seniors are sponsored by their medical schools.• <i>Previous Graduate of U.S. Allopathic Medical School (U.S. Grad)</i>: A graduate of a U.S. allopathic school of medicine accredited by the LCME with a graduation date before July 1 in the year before the Match. Previous U.S. graduates are not sponsored by the medical school.• <i>Student/Graduate of Canadian Medical School (Canadian)</i>: a student or graduate of a Canadian school of medicine accredited by the Committee on Accreditation of Canadian Medical Schools (CACMS).• <i>Student/Graduate of Osteopathic Medical School (Osteo)</i>: a student or graduate of a medical school accredited by the Association of American Colleges of Osteopathic Medicine (AACOM).• <i>Student/Graduate of Fifth Pathway Program (5th Pathway)</i>: A graduate of a U.S. Fifth Pathway program• <i>U.S. Citizen Student/Graduate of International Medical School (U.S. IMG)</i>: A U.S. citizen who attended an international medical school• <i>Non-U.S. Citizen Student/Graduate of International Medical School (Non-U.S. IMG)</i>: A non U.S. citizen who attended an international medical school <p>In some tables and figures in this report, applicant types are combined into a smaller number of groups.</p> <ul style="list-style-type: none">• <i>Foreign-Trained Physicians</i>: U.S. citizen and non-U.S. citizen students and graduates of international medical schools.• <i>Independent Applicants (IA)</i>: All applicant categories excluding U.S. allopathic seniors.• <i>Others</i>: Includes previous U.S. graduates and Canadian, Osteopathic, and Fifth Pathway applicants.
Couple	Any two applicants can register as a couple in the Match. The NRMP allows couples to form pairs of choices on their primary rank order lists, which are considered in rank order when the matching algorithm is processed. The couple will match to the most preferred pair of programs where each partner has been offered a position.
NRMP	National Resident Matching Program
PGY-1	Post graduate year one
PGY-2	Post graduate year two

Introduction

This report summarizes data from the National Resident Matching Program (NRMP) 2015 Main Residency Match®, the largest in NRMP history when measured by the number of positions offered (30,212) and filled (28,906). The 27,293 PGY-1 positions constituted an all-time high and an increase of 615 over 2014; more than half of the increase was attributable to growth in Family Medicine and Internal Medicine. The number of registrants (41,334) also was an all-time high, with 635 more applicants submitting rank order lists of programs when compared to 2014.

A successful Match is measured not just by volume, but also by how well it matches the preferences of applicants and program directors. Based on that criterion, the overall position fill rate of 95.7 percent makes the 2015 Match one of the most successful on record. A by-product of a high fill rate is the number of positions available in the Match Week Supplemental Offer and Acceptance Program® (SOAP®). In 2015, only 1,306 positions were unfilled, and nearly half (650) were PGY-1 only positions in Preliminary Surgery, Preliminary Medicine, and Transitional Year programs. Of the available unfilled positions, 1,193 were placed in SOAP and all but 64 were filled.

This year, 34,905 applicants vied for the 27,293 first-year and 2,919 second-year (including physician-only positions) residency positions. U.S. allopathic medical school senior students comprised 18,025 of the active applicants in the Match, 651 more than in 2014. The PGY-1 match rate for U.S. seniors was 93.9 percent, down from 94.4 percent in 2014. Historically, the PGY-1 match rate for U.S. seniors is 92-94 percent.

Compared with 2014, PGY-1 match rate rose for students/graduates of osteopathic medical schools (77.7% to 79.3%) and remained about the same for both U.S. IMGs and non-U.S. IMGs. The increase in the number of active applicants between 2014 and 2015 was due mainly to a greater number of U.S. allopathic medical school seniors and osteopathic medical school students and graduates.

Other trends of interest include:

- Of the U.S. seniors who matched, 78.4 percent matched to one of their top three choices.
- The number of active previous graduates of U.S. allopathic medical schools declined by 142 from 2014. Of the 1,520 who submitted rank order lists of programs, 662 matched to PGY-1 positions for a match rate of 43.6 percent.
- The number of active osteopathic students/graduates continued to grow in 2015. Of the 2,949 who submitted rank order lists of programs, 2,339 matched to PGY-1 positions, making their match rate of 79.3 percent the highest in over thirty years.
- The number of active U.S. citizen IMGs declined slightly from 2014, but at 5,014 represented more than a 33 percent increase since 2011. The match rate for those applicants was 53.1 percent, the highest since 2005.

- The number of non-U.S. citizen IMGs who matched continued to grow, and at 3,641 was the highest ever. The match rate for this group was 49.4 percent, down slightly from 2014 (49.5 percent).

Couples have been able to participate in the Match since 1984. The two partners identify themselves as a couple to the NRMP and submit rank order lists of identical length. The matching algorithm treats the two lists as a unit, matching the couple to the highest linked program choices where both partners obtain positions. A total of 1,035 couples participated in the 2015 Match, the most ever. Couples continued to enjoy great success, with a PGY-1 match rate of 94.8 percent.

Match results can be an indicator of career interests among graduating medical school students. Highlights in 2015 include:

- 6,611 U.S. seniors matched to categorical positions in Family Medicine, Internal Medicine, and Pediatrics, 39.0 percent of all U.S. seniors who matched to PGY-1 positions.
- The ratio of PGY-1 positions per active U.S. senior was 1.51, the second highest since 1976 after a high of 1.54 in 2014.
- More than half of matched osteopathic students/graduates matched to categorical programs in Internal Medicine, Family Medicine, and Pediatrics.
- Obstetrics-Gynecology offered 1,255 categorical positions in 2015 and all of them were filled. The fill rate by U.S. seniors was 79.8 percent, the highest since 1999.
- The fill rate for advanced positions in Diagnostic Radiology declined to 86.3 percent, 7.9 percentage points from 2014. The percentages of categorical and advanced positions filled by U.S. seniors were new lows: 50.4 percent for categorical and 58.0 percent for advanced positions.
- In 2015, 67.3 percent of matched foreign-trained physicians (both U.S. IMGs and non-U.S. IMGs) obtained positions in categorical Internal Medicine, Family Medicine, and categorical Pediatrics. A larger proportion of foreign-trained physicians have matched to Internal Medicine (categorical) every year since 2011 (37.5% in 2011 compared to 43.9% in 2015).

We hope you find the data contained in the following pages useful as you reflect on the 2015 Match and prepare for future Matches.

Mona M. Signer, President and Chief Executive Officer
National Resident Matching Program

support@nrmp.org

Table 1

Table 1 summarizes the 2015 Main Residency Match and shows the numbers of participating programs, offered positions, and unfilled programs. It also provides ranking and matching data for U.S. seniors and all applicants.

Using Anesthesiology PGY-1 as an example:

- The first three columns (“No. of Programs,” “Positions Offered,” and “Unfilled Programs”) show that 120 programs offered 1,094 Anesthesiology PGY-1 positions and that 11 of those programs were unfilled.
- The numbers of applicants for U.S. seniors and total applicants are provided in the next two columns under “No. of Applicants.” In 2015, 1,192 U.S. seniors ranked at least one Anesthesiology program, and a total of 1,859 applicants ranked Anesthesiology. Note that the figures do not mean that Anesthesiology is the preferred choice of those applicants.
- The next two columns (under “No. of Matches”) show that 799 of the 1,094 PGY-1 positions offered in Anesthesiology were filled by U.S. seniors and 1,066 were filled by all applicants.
- The percent fill rates (calculated as positions filled divided by positions offered) can be found in the two columns under “% Filled.” Of the 1,094 PGY-1 positions offered in Anesthesiology, 73.0 percent were filled by U.S. seniors and 97.4 percent were filled overall.
- The “Ranked Positions” columns show that collectively U.S. seniors ranked those Anesthesiology programs 10,782 times and the total number of ranks for all applicants was 13,790.

The total number of positions offered in the 2015 Match was 30,212, an all-time high and 541 more than in 2014.

* Applicants can rank multiple specialties. In 2015, 2,026 applicants matched to both PGY-1 and PGY-2 positions. 1,621 U.S. senior applicants matched to both PGY-1 and PGY-2 positions.

** Physician (R) positions are PGY-2 positions starting in the year of the Match that are reserved for applicants who have had prior graduate medical education. Physician positions are not available to senior medical students. In previous Results and Data Reports, the numbers of R positions were small and they were included in the categorical position counts. In 2014, NRMP began listing R positions separately.

Table 2

Table 2 shows the numbers of matches in each specialty by applicant type. There was considerable variation in the number and proportion of each applicant group matching to each specialty. The data are described in more detail in Tables 10-12.

For example, the top five specialties to which U.S. allopathic medical school seniors (“U.S. Senior”) matched were:

- Internal Medicine (categorical) (3,317)
- Pediatrics (categorical) (1,889)
- Emergency Medicine (1,438)
- Family Medicine (1,405)
- Medicine-Preliminary (PGY-1 Only) (1,388)

For prior graduates of U.S. allopathic medical schools (“U.S. Grad”), the top five specialties were:

- Family Medicine (139)
- Anesthesiology (categorical, advanced, and physician positions) (101)
- Internal Medicine (categorical) (101)
- Surgery (categorical) (86)
- Diagnostic Radiology (categorical, advanced, and physician positions) (64)

For students and graduates of osteopathic medical schools (“Osteo”), the top five specialties were:

- Internal Medicine (categorical) (511)
- Family Medicine (446)
- Pediatrics (categorical) (303)
- Emergency Medicine (203)
- Anesthesiology (categorical, advanced, and physician positions) (197)

For U.S. citizen students and graduates of international medical schools (“U.S. IMG”), the top five specialties were:

- Internal Medicine (categorical) (894)
- Family Medicine (680)
- Psychiatry (categorical) (178)
- Pediatrics (categorical) (174)
- Medicine-Preliminary (PGY-1 Only) (125)

For non-U.S. citizen students and graduates of international medical schools (“Non-U.S. IMG”), the top five specialties were:

- Internal Medicine (categorical) (1,869)
- Family Medicine (366)
- Pediatrics (categorical) (254)
- Surgery-Preliminary (PGY-1 Only) (179)
- Neurology (categorical, advanced, and physician positions) (170)

* Physician (R) positions are PGY-2 positions starting in the year of the Match that are reserved for applicants who have had prior graduate medical education. Physician positions are not available to senior medical students. In previous Results and Data Reports, the numbers of R positions were small and they were included in the categorical position counts. In 2014, NRMP began listing R positions separately.

Tables 3 and 4

Table 3 shows the numbers of positions offered by specialty between 2011 and 2015. The 2015 Match offered 30,212 PGY-1 and PGY-2 positions (including physician positions), a combined increase of 15.5 percent over 2011. Most of the increase came from PGY-1 positions. In 2015, the number of PGY-1 positions was 3,873 more than in 2011, an increase of 16.5 percent. Some of the increase in PGY-1 positions resulted from specialties converting programs from advanced to categorical.

In 2013, NRMP implemented the "All-In" Policy, and the total number of positions increased by 2,399 (9.0%) in 2013 compared to 2012. That increase resulted mainly from expansion of larger specialties such as Internal Medicine, Pediatrics, and Family Medicine that historically had offered positions outside the Match. In 2015, the number of positions rose by 541 (1.8%) from 2014. Since implementation of the "All In" Policy for the 2013 Match, the number of positions has grown by 1,041.

Specialties that have increased or decreased by at least 10 percent *and* 10 positions in the Match between 2011 and 2015 are highlighted in the Table 3 with arrows.

Many applicants in addition to U.S. seniors seek residency positions through the NRMP. Trend data for different applicant groups are shown in Table 4 and Figure 2. The arrows in Table 4 indicate increases in the numbers of active applicants* that were greater than the overall increase of 14.1 percent between 2011 and 2015.

In 2015, the number of active applicants* was 34,905, 635 more than in 2014 (34,270). Among different applicant groups, the number of students/graduates of osteopathic medical schools has continued to rise between 2011 and 2015, up by 35.4 percent over the five-year period.

The overall 2015 PGY-1 match rate increased 0.2 percentage points over 2014, and at 75.2 percent is the highest PGY-1 match rate since 2005. The PGY-1 match rate for U.S. seniors was 0.5 percent lower than in 2014. Match rates for students/graduates of osteopathic medical schools increased every year between 2011 and 2015.

* An active applicant is one who submits a certified rank order list of programs.

TOTAL - Physician (R)	221	100	274	100	254	100	28	100	1	100
GRAND TOTAL	30,212	100	29,671	100	29,171	100	26,772	100	26,158	100

▲▼ Denotes increase/decrease in matched applicants of more than 10 percent and 10 positions between 2011 and 2015.

* Physician (R) positions are PGY-2 positions starting in the year of the Match that are reserved for applicants who have had prior graduate medical education. Physician positions are not available to senior medical students. In previous Results and Data Reports, the numbers of R positions were small and they were included in the categorical position counts. In 2014, NRMP began listing R positions separately.

Figure 2 Number of Active Applicants and Percent Matched to PGY-1 Positions, 2011 - 2015

*Foreign-trained physicians includes both U.S. citizen and non-U.S. citizen graduates of international medical schools.

▲ Denotes that the percentage increase in active applicants for this group was greater than the overall increase of 14.1% for all active applicants between 2011 and 2015.

Note: Match rates are based on all active applicants regardless of their ranking behavior. Therefore, applicants who matched to PGY-1 positions are counted as matched even if they ranked and did not match to a PGY-2 position. Applicants who ranked only advanced and Physician (R) programs are counted as unmatched in this table because they did not match to a PGY-1 position.

Table 5

Table 5 shows the ratios of PGY-1 positions to active applicants from 1976 through 2015. The same data are shown graphically in Figure 3. The red line in Figure 3 represents the point at which there are equal numbers of applicants and positions; above the red line represents more positions than applicants, below the line more applicants than positions. Active applicants are defined as those who submitted and certified rank order lists.

- In 2015, the ratio of PGY-1 positions per active U.S. senior was 1.51, lower than in 2014 but higher than the overall average of 1.40 between 1976 and 2015. Historically, the ratio declined from 2.0 positions per U.S. senior in 1972 (not shown) to a low of 1.25 positions per U.S. senior in 1984 and 1985.
- The ratio of PGY-1 positions to total applicants (rather than only U.S. seniors) roughly followed the trend of U.S. seniors because more than half of all applicants are U.S. seniors. In 2015, the ratio was 0.78 positions per applicant, which was the same as in 2014 but below the overall average of 0.90 positions per applicant between 1976 and 2015.

Figure 3 Positions per All Active and Active U.S. Senior Applicants, 1976 - 2015

2012	24,006 *	16,527	1.45*	31,355	0.77*
2013	26,138 *	17,487	1.49*	34,355	0.76*
2014	26,678 *	17,374	1.54*	34,270	0.78*
2015	27,293 *	18,025	1.51*	34,905	0.78*

Note: Applicants who withdrew or did not rank programs are excluded.

* Physician (R) positions are excluded. R positions are PGY-2 positions starting in the year of the Match that are reserved for applicants who have had prior graduate medical education. Physician positions are not available to senior medical students. In previous Results and Data Reports, the numbers of R positions were small and they were included in the categorical position counts.

Table 6

Table 6 displays the match rates to PGY-1 positions for U.S. allopathic seniors, U.S. citizens trained in international medical schools (U.S. IMGs), non-U.S. citizens trained in international medical schools (Non-U.S. IMGs), and other applicants (Canadian medical school students/graduates, osteopathic medical school students/graduates, Fifth Pathway applicants, and U.S. physicians who are prior-year graduates of U.S. allopathic medical schools). The data are shown graphically in Figure 4. Match rate is defined in Table 6 and Figure 4 as the percentage of active applicants who matched to PGY-1 positions.

- 93.9 percent of U.S. allopathic seniors matched to PGY-1 positions in 2015, within the historical 92-95 percent match rate.
- 53.1 percent of U.S. IMGs matched to PGY-1 positions, the highest match rate since 2005.
- At 49.4 percent, the 2015 PGY-1 match rate for non-U.S. IMGs was one of the highest since 2005.

Figure 4 PGY-1 Match Rates by Applicant Type, 1982 - 2015

2014	26,678*	34,270	94.4	53.0*	49.5*	66.2*	75.0*
2015	27,293*	34,905	93.9	53.1*	49.4*	67.1*	75.2*

* Physician (R) positions are excluded. R positions are PGY-2 positions starting in the year of the Match that are reserved for applicants who have had prior graduate medical education. Physician positions are not available to senior medical students. In previous Results and Data Reports, the numbers of R positions were small and they were included in the categorical position counts.

Tables 7 and 8

Table 7 displays the numbers of positions offered by specialty, as well as the numbers filled by U.S. seniors and by an aggregate of all applicants (including U.S. seniors) from 2011 through 2015. The data in Table 7 are shown graphically in Figure 5 for specialties that offered at least 100 positions. Table 8 displays the same information in percentages.

- In 2015, 28,906 matches were made to PGY-1 and PGY-2 (including physician positions) positions, an all-time high and an increase of 416 (or 1.5%) over 2014.
- The position fill rate for all programs was 95.7 percent in 2015, compared to the all-time high of 96.4 percent in 2013.
- Obstetrics-Gynecology offered 1,255 categorical positions in 2015 and all of them were filled. The fill rate by U.S. seniors was 79.8 percent, the highest since 1999.
- Overall fill rates for Diagnostic Radiology (advanced) declined to 86.3 percent in 2014, down 7.9 percentage points from the prior year. Fill rates by U.S. seniors for Diagnostic Radiology in both categorical and advanced programs hit new lows in Match history: 50.4% (categorical) and 58.0% (advanced).

Other trends of note are:

- Specialties and specialty tracks with at least 10 positions in the Match and 100 percent fill rates:

Dermatology (categorical)
Medicine-Psychiatry
Obstetrics-Gynecology
Orthopedic Surgery (categorical)
Pediatrics-Medical Genetics
Pediatrics-Primary
Pediatrics/Psychiatry/Child Psychiatry
Physical Medicine and Rehabilitation (categorical and physician)
Psychiatry-Family Medicine
Thoracic Surgery (categorical)

- Specialties with at least 10 positions in the Match and filled more than 90 percent by U.S. seniors:

Psychiatry-Family Medicine: 100 percent
Pediatrics/Psychiatry/Child Psychiatry: 94.7 percent
Otolaryngology: 94.6 percent
Orthopedic Surgery: 94.3 percent
Radiation Oncology (advanced): 93.8 percent
Plastic Surgery (Integrated): 91.9 percent
Dermatology (categorical): 90.9 percent

- The top five specialties with at least 10 positions in the Match and filled with significant numbers of independent applicants (calculated from Table 8, physician (R) positions not included):

Pediatrics-Primary: 64.9 percent
Physical Medicine and Rehabilitation (advanced): 53.9 percent
OB/GYN-Preliminary: 52.4 percent
Family Medicine: 51.1 percent
Internal Medicine (categorical): 49.9 percent

▲▼ Denotes increase/decrease in number of positions filled by U.S. allopathic seniors of more than 10 percent and 10 positions between 2011 and 2015.

* Physician (R) positions are PGY-2 positions starting in the year of the Match that are reserved for applicants who have had prior graduate medical education. Physician positions are not available to senior medical students. In previous Results and Data Reports, the numbers of R positions were small and they were included in the categorical position counts. In 2014, NRMP began listing R positions separately.

Figure 5 Number of Positions Offered and Filled for Selected Specialties,* 2015

* Specialties offering at least 100 positions.

A: Advanced positions
 C: Categorical positions
 M: Primary care categorical positions
 P: Preliminary positions
 R: Physician positions

* Physician (R) positions are PGY-2 positions starting in the year of the Match that are reserved for applicants who have had prior graduate medical education. Physician positions are not available to senior medical students. In previous Results and Data Reports, the numbers of R positions were small and they were included in the categorical position counts. In 2014, NRMP began listing R positions separately.

Tables 9-12

Tables 9 through 12 display the numbers of PGY-1 matches in each specialty and their proportions among all specialties for four different applicant groups: all applicants (Table 9), U.S. seniors (Table 10), osteopathic students and graduates (Table 11), and foreign-trained physicians (Table 12). Foreign-trained physicians are U.S. citizen and non-U.S. citizen students and graduates of international medical schools, excluding Canadian and Fifth Pathway applicants. Specialties that placed at least 10 positions in the Match and showed an increase or decrease in the numbers of matched applicants of greater than 10 percent between 2011 and 2015 are highlighted with arrows.

Between 2011 and 2015, the proportions of matched applicants among all PGY-1 specialties stayed relatively stable for all applicant groups:

Increases in the proportions of U.S. seniors obtaining positions in categorical Internal Medicine (18.9% to 19.6%) and Psychiatry (4.1% to 4.6%) were notable (Table 10). The largest decrease was in Medicine-Preliminary (9.6% to 8.2%).

With the growing number of osteopathic students/graduates in the Match, the composition of their matched specialties shifted (Table 11). In 2015, 53.9 percent of all matched osteopathic applicants obtained positions in categorical programs in Internal Medicine, Family Medicine, and Pediatrics. Compared to 2011, the greatest increases were in Internal Medicine (19.8% to 21.8%), Medicine-Preliminary (3.0% to 5.1%), and Anesthesiology, while matches to Emergency Medicine (11.3% to 8.7%) and Obstetrics-Gynecology (7.7% to 5.2%) showed the greatest declines.

Historically, positions obtained by foreign-trained physicians have been concentrated in a few specialties. In 2015, 67.3 percent of matched foreign-trained physicians obtained positions in Internal Medicine, Family Medicine, and Pediatrics (Table 12). A larger proportion of foreign-trained physicians have matched in Internal Medicine (categorical) every year since 2011 (37.5% in 2011 to 43.9% in 2015). In contrast, there were declines in the percentages of foreign-trained physicians matched in Family Medicine (18.8% in 2011 to 16.6% in 2015) and Pediatrics (8.8% in 2011 to 6.8% in 2015).

▲▼ Denotes increase/decrease in number of positions filled by U.S. allopathic seniors of more than 10 percent and 10 positions between 2011 and 2015.

* Foreign-trained physicians include both U.S. citizen and non-U.S. citizen graduates of international medical schools.

** Physician (R) positions are excluded. R positions are PGY-2 positions starting in the year of the Match that are reserved for applicants who have had prior graduate medical education. Physician positions are not available to senior medical students. In previous Results and Data Reports, the numbers of R positions were small and they were included in the categorical position counts.

Table 13

Table 13 displays the numbers of U.S. seniors (“U.S.”) and independent applicants (“IA”) (all applicants other than U.S. seniors) who ranked each specialty as their only choice, first choice, or not first choice: *Only choice* includes applicants who ranked that specialty first on their rank order lists (ROLs) and ranked no other specialties. *First choice* includes applicants who ranked that specialty first and ranked at least one other specialty. *Not first choice* includes applicants who ranked another specialty first but also included that specialty on their ROL. *Preferred choice* is defined as first choice ignoring any subsequent choices (*only choice* and *first choice* combined).

Prior to 2012, applicant choices were reported by specialty group that included the combined specialties. For example, the Internal Medicine group included Internal Medicine and specialties such as Internal Medicine-Pediatrics. In later reports, Table 13 data are aggregated by specialty instead of specialty group. Transitional Year programs are excluded from the counts because they are not considered a preference for a specific specialty. PGY-1 and PGY-2 (including physician R) programs were combined. Internal Medicine and Pediatrics include categorical and primary positions. Preliminary programs are separated from categorical programs for Internal Medicine, Obstetrics and Gynecology, Pediatrics, and Surgery specialties.

Table 13 also shows the ratio of the number of positions in a specialty to the number of applicants choosing a specialty as their preferred choice.

Using Anesthesiology as an example:

- A total of 1,198 U.S. allopathic seniors ranked at least one Anesthesiology program (sum of 835 “only choice,” 311 “first choice,” and 52 “not first choice”). Anesthesiology was the “preferred choice” for 1,146 U.S. seniors (sum of 835 “only choice” and 311 “first choice”). With 1,695 positions offered, the ratio of positions to U.S. senior applicants who ranked Anesthesiology as the “preferred” choice was 1.5 to 1.
- Similarly, 807 independent applicants ranked at least one Anesthesiology program (411 plus 298 plus 98); for 709 of them Anesthesiology was the “preferred” specialty. The ratio of 1,695 positions to 709 independent applicants was 2.4 to 1.
- Lastly, for the 1,855 total applicants who preferred Anesthesiology (combining U.S. seniors and Independent Applicants), the ratio of positions per applicant was 0.9.

Table 13 Applicant Choices by Specialty, 2015

TOTAL *	30,094	14,763	3,149	3,991		11,085	5,737	8,054		

Only choice includes applicants who ranked that specialty first on their rank order lists (ROLs) and ranked no other specialties. **First choice** includes applicants who ranked that specialty first and ranked at least one other specialty on their ROLs. **Not first choice** includes applicants who ranked another specialty first but also included that specialty on their ROLs. **Preferred choice** is defined as either only choice or first choice. Transitional Year programs were excluded from these counts because they are not considered a preference for a specific specialty.

Total Positions: includes all positions (categorical, advanced, primary care categorical, and physician) except preliminary positions offered in a specialty. Preliminary positions are reported separately.

Positions Per U.S. Senior: is the ratio of Total Positions to the number of U.S. seniors for whom that specialty was the first or only choice.

Positions Per Independent Applicant (IA): is the ratio of Total Positions to the number of independent applicants for whom that specialty was the first or only choice.

Positions Per All Applicants: is the ratio of Total Positions to the number of U.S. seniors and independent applicants for whom that specialty was the first or only choice.

Note: Specialties with fewer than 20 total positions are not displayed on this table.

* The **TOTAL** row includes all positions in all specialties.

Table 14

The 2014 Match results for U.S. seniors (“U.S.”) and independent applicants (“IA”) who ranked each specialty as their only choice can be found in Table 14 and Figure 6. Prior to 2012, Table 14 and Figure 6 reported Match results by specialty groups that included the combined specialties. For example, Internal Medicine included Internal Medicine and combined specialties such as Internal Medicine-Pediatrics. In this report, results are aggregated by specialty instead of specialty group. Preliminary positions also are reported separately.

Notably larger percentages of U.S. seniors than independent applicants ranked as their only choice Emergency Medicine, Orthopedic Surgery, Obstetrics and Gynecology, and Pediatrics. Larger percentages of independent applicants chose Internal Medicine, Family Medicine, and Psychiatry.

For all specialties, a larger percentage of independent applicants failed to match when compared to U.S. seniors (Figure 6). The higher proportions of unmatched U.S. seniors and independent applicants in such specialties as Orthopedic Surgery, Neurological Surgery, Otolaryngology, Dermatology, and Surgery reflect the fact that there are significantly more applicants interested in those specialties than there are available positions. The competitiveness of those specialties also is reflected in their high fill rates (Table 1).

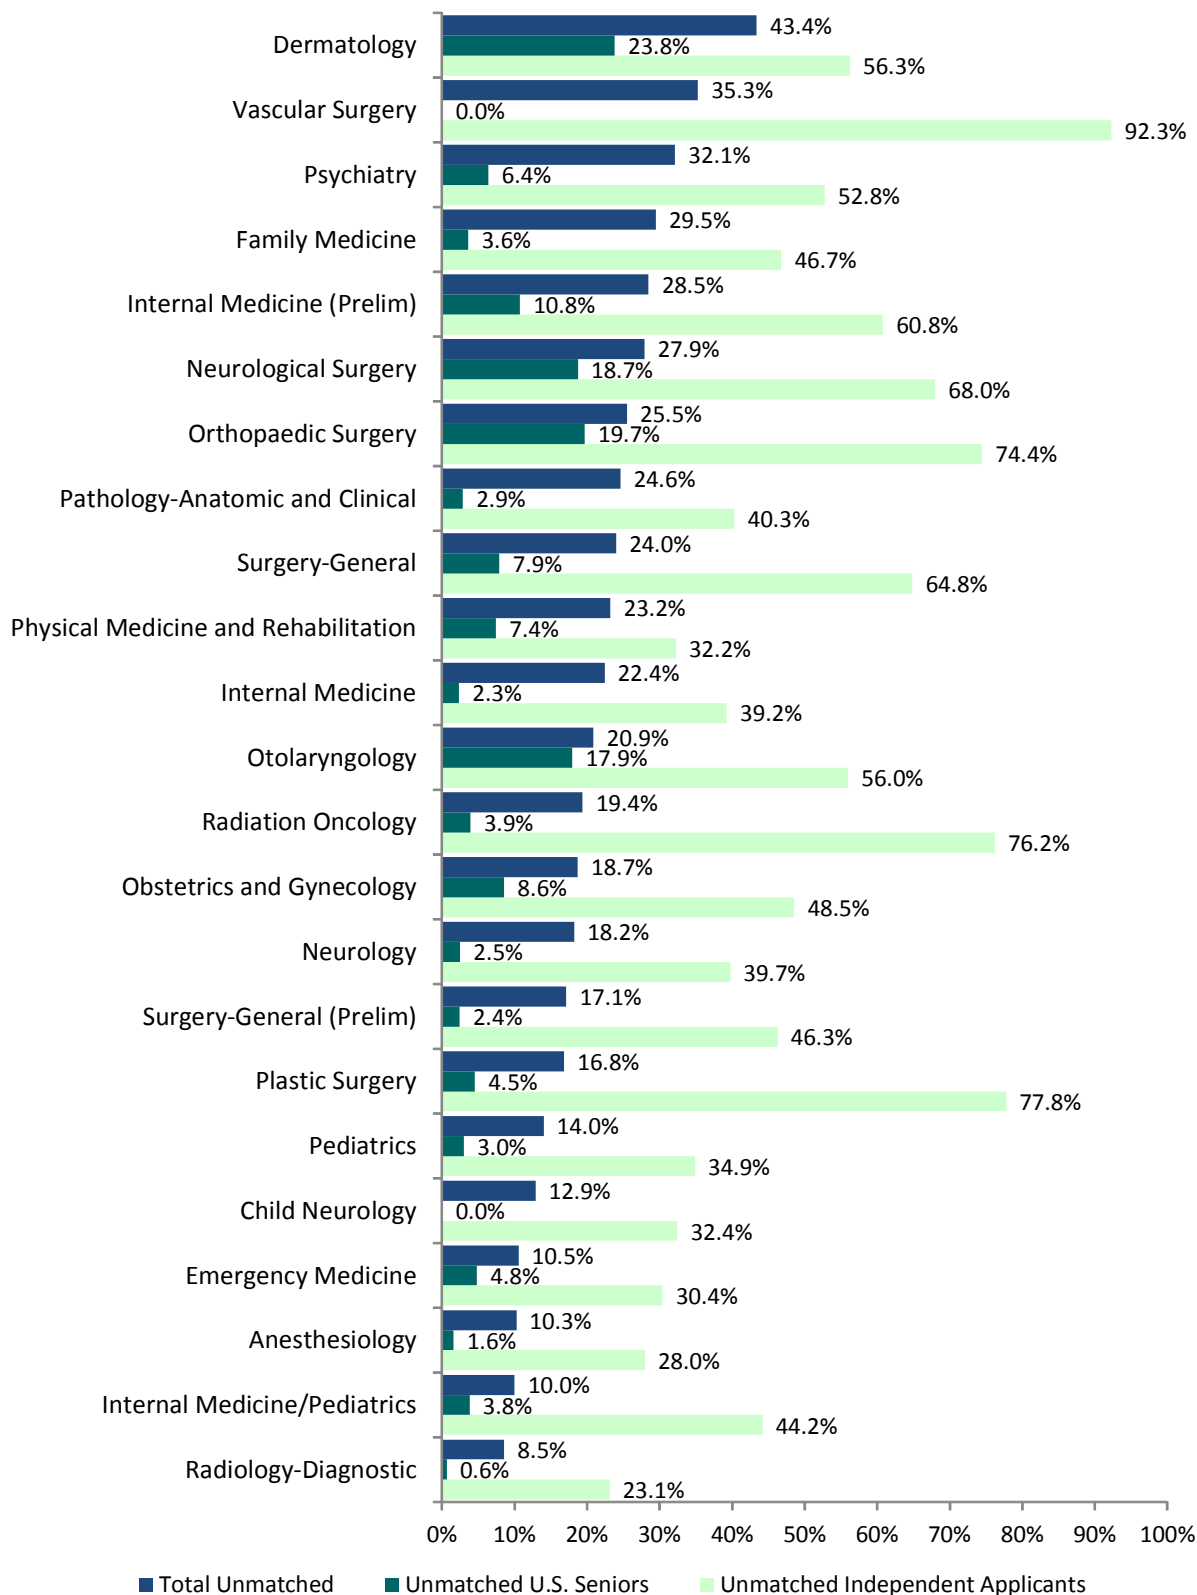

Table 14 Match Results for U.S. Seniors and Independent Applicants Who Ranked Each Specialty as Their Only Choice, 2015

Specialty	Matched		Unmatched		Total		% of All Matched Applicants		Percent Unmatched

Figure 6 Percentages of Unmatched U.S. Seniors and Independent Applicants Who Ranked Each Specialty as Their Only Choice, 2015

Note: Specialties with fewer than 20 matched applicants are excluded from this figure (see Table 14).

Table 15

Table 15 shows the trends between 1997 and 2015 in the percentages of U.S. allopathic seniors and independent applicants who matched to their first, second, third, fourth, or lower than fourth program choice on their rank order lists. The calculation of the percentages also includes the number of unmatched applicants. In earlier years the percentages were based only on matched applicants. This change was made to more accurately reflect the percentages of applicants who obtained matches at different ranks and to more clearly portray the differences between U.S. seniors and independent applicants (see Table 6 for trends in overall match rates by applicant type). The differences in the two calculations can be seen in Figure 7.

In 2015, the percentage of U.S. seniors matched to their first-choice programs was 48.8 percent, the second time it has been below 50 percent since 1997. Among independent applicants the percentage of first-choice matches decreased to 28.6 percent. As Table 15 shows, less than one-third of matched independent applicants match to their first-choice programs. The percentage of U.S. seniors who were unmatched increased from 4.8 percent in 2014 to 5.5 percent in 2015. Historically, the percentage of U.S. seniors who do not match to first-year positions has been stable at about 6.0 percent. The percentage of unmatched independent applicants, 41.7 percent, was among the lowest since 1997.

Figure 7 compares the percentage of applicants matched to programs by rank choice in the 2015 Match using both matched applicants (top two figures) and all applicants (bottom two figures) calculations. As the bottom two figures show, a considerably higher percentage of U.S. allopathic seniors matched to their first-choice programs compared to independent applicants, and a considerably higher percentage of independent applicants did not match at all.

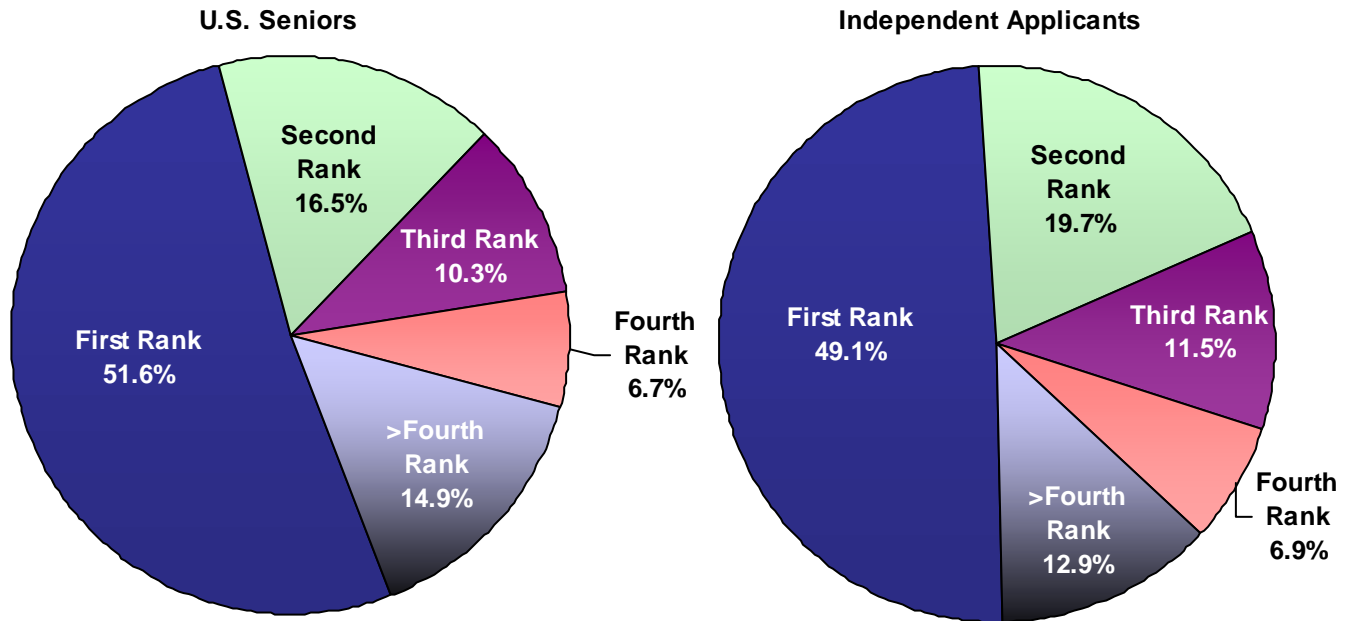

Table 15 Matches from U.S. Seniors' and Independent Applicants' Rank Order Lists, 1997 - 2015

Year	First Rank		Second Rank		Third Rank		Fourth Rank		> Fourth Rank		Unmatched

Figure 7

Percent of Matches by Choice and Type of Applicant, 2015

Matched Applicants

All Applicants

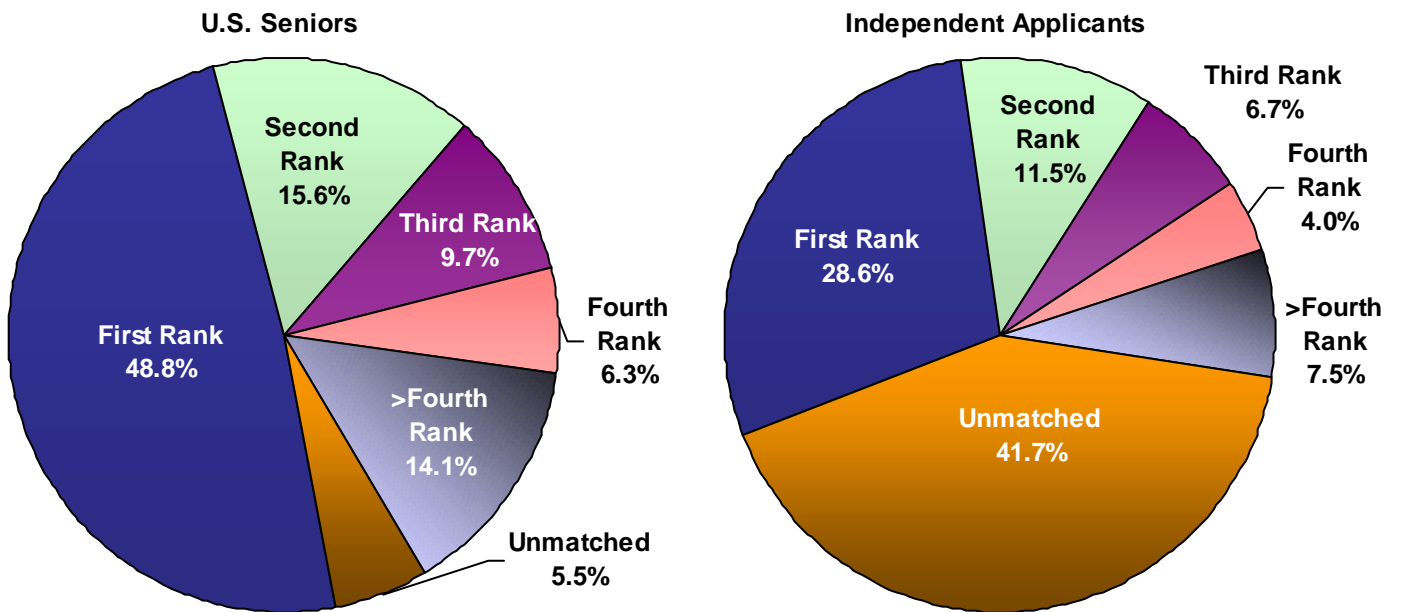

Table 16

Couples have been able to participate together in the Main Residency Match since 1984. The two partners identify themselves as a couple to the NRMP and submit rank order lists of identical length. The matching algorithm treats the two lists as a unit, matching the couple to the highest pair of program choices where both partners obtain a match.

Table 16 presents the number of couples in the Match and the outcomes. Match rates were calculated as the number of individual matches divided by the total number of individuals. In 2015, 2,070 applicants (1,035 couples) participated in the Match as couples, the most ever. Couples enjoy great success, with match rates above 90 percent every year since 1984. In 2015, the match rate for couples was 94.8 percent. About 76 percent of couples are U.S. seniors, and their match rates are quite similar to those of their classmates, varying within 1 or 2 percentage points each year.

Couples have the option of one partner indicating a willingness to go unmatched at a specific rank on the rank order list if the partner matches to the program linked to that rank. Table 16 shows the number of couples matched with this option in the *One Matched* column (62 in 2015).

Table 16**Number of Couples in the Match and Match Outcome, 1987 - 2015**

Year	Couples	Individuals	Both Matched	One Matched	Neither Matched	Match Rate %
1987	347	694	316	14	17	93.1

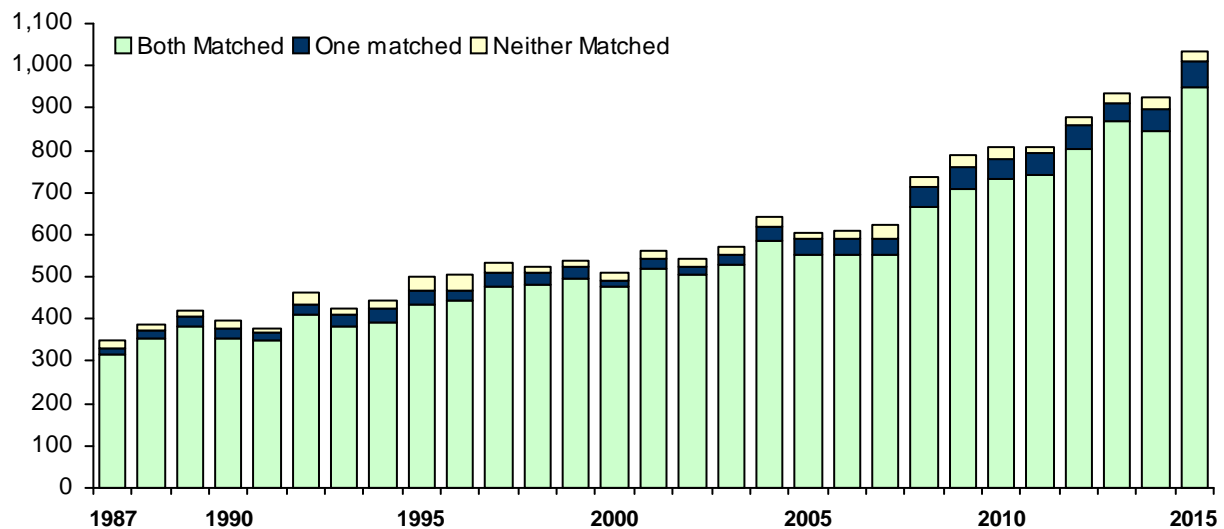

Figure 8**Number of Couples in the Match and Match Outcome, 1987-2015**

Table 17

Table 17 displays by specialty the average number of ranked applicants needed to fill each position within programs. Only programs that filled all of their positions are included in the calculations. Specialties with fewer than 5 programs that filled all positions also were excluded to maintain their anonymity. Although this measure is affected by such factors as the number and geographic distribution of programs as well as the number of programs ranked per applicant, it is a rough measure of specialty competitiveness. It may be more appropriate to interpret the data within each specialty across time and less appropriate to compare across specialties, especially for specialties with a large proportion of programs that do not fill.

Using Anesthesiology as an example, on average programs that filled all positions ranked 7.7 applicants per available position in the 2015 Match. That figure represents an increase of 0.7 ranked applicants per filled position when compared with the 2014 average of 7.0.

Tables 18 and 19

In 2012, NRMP launched the Match Week Supplemental Offer and Acceptance Program® (SOAP®) to replace the "Scramble" and to streamline the process for unmatched applicants and the directors of unfilled programs. During SOAP, eligible applicants use ERAS® to apply to programs with unfilled positions. Programs interview applicants and create preferences lists in the NRMP Registration, Ranking, and Results® (R3®) system, which offers positions to applicants in order of the program's preference through a series of offer rounds.

The universe of SOAP-eligible applicants is slightly different from that of unmatched active applicants. An applicant is eligible for SOAP if the applicant is 1) registered for the Main Residency Match, 2) eligible to enter graduate medical education on July 1 in the year of the Match, and 3) fully unmatched or partially matched (i.e., with only a preliminary or an advanced position). Applicants who did not submit rank order lists also are eligible to participate in SOAP if they meet those criteria.

In 2015, 13,657 applicants were SOAP-eligible, 381 more than in 2014 (Table 19). Almost half of the increase was due to more non-U.S. citizen IMGs (150 more). In both years, non-U.S. citizen IMGs constituted the majority of SOAP participants (more than 40%). U.S. citizen IMGs make up more than one-quarter of SOAP participants, followed by U.S. seniors (15.7%).

In 2015, 464 of 539 unfilled programs elected to participate in SOAP, offering 1,193 of the 1,306 positions not filled when the matching algorithm was processed (Table 18). More than half (52.0%) of the SOAP positions were PGY-1 only: 446 Preliminary Surgery, 118 Preliminary Medicine, 7 Preliminary Obstetrics and Gynecology, 4 Preliminary Pediatrics, and 46 Transitional Year. Other specialties with large numbers of SOAP positions were Family Medicine (149), Diagnostic Radiology (13 categorical, 131 advanced, and 1 physician), Anesthesiology (28 categorical, 28 advanced, and 14 physician), Internal Medicine (categorical) (67), and Pathology (31).

During SOAP, offers are extended to applicants based upon the number of unfilled positions remaining in the program, and a position can be re-offered if an offer from a prior round has been rejected or has expired. In 2015, a total of 1,666 offers were sent to applicants; of those, 1,129 were accepted, 481 were rejected, and 56 expired (Figure 9). By the conclusion of SOAP, 94.6 percent (1,129 of 1,193) of the positions had been filled, higher than in 2014 (92.8 percent).

U.S. seniors accepted the majority of positions (653 of 1,129) filled during SOAP. Although U.S. seniors accepted more positions in 2015 than in 2014, the proportions of positions accepted by U.S. seniors among all applicants was actually lower in 2015 (57.8% in 2015 compared to 61.0% in 2014).

* Revised

** Physician (R) positions are PGY-2 positions starting in the year of the Match that are reserved for applicants who have had prior graduate medical education. Physician positions are not available to senior medical students. In previous Results and Data Reports, the numbers of R positions were small and they were included in the categorical position counts. In this report, R positions are listed separately.

Table 19**SOAP Applicants Accepting Positions by Type, 2014 - 2015**

Applicant Type	2015			2014		
	Eligible Applicants	Positions Accepted	Unique Applicants Accepting Positions	Eligible Applicants	Positions Accepted	Unique Applicants Accepting Positions
Seniors of U.S. Allopathic Medical Schools	2,142	653	599	2,050	609	583

Total	13,657	1,129	1,060	13,276	998	968

Figure 9 Offers Extended in SOAP,* 2014-2015

*When an applicant accepts a position, the R3 system creates an automatic rejection of position offers for which the applicant no longer is eligible.

**A position may be offered in multiple rounds if it has not been accepted.

NRMP Program Results lists every hospital that participated in the Main Residency Match, along with the number of positions offered and filled for each of the institution's programs.

Sponsoring institutions are arranged alphabetically within state. The listing includes the institution name (abbreviated in some instances); the program code, which identifies each program; the quota (the number of positions offered by the program); and the number of applicants matched with that program.

There are three reasons why a program that ranked an adequate number of applicants did not fill its quota: (1) the applicants preferred other programs offering positions; (2) the applicants did not rank the program; or (3) the applicants had withdrawn from the Match.

There are also three reasons why applicants may not be matched with their most preferred program: (1) the program was filled with applicants it preferred; (2) the program did not rank the applicant; or (3) the program had withdrawn from the Match.

The following types of programs are offered through the NRMP:

- Categorical (C) positions are positions in programs that expect applicants who enter in their first post graduate year to complete the training required for certification in that specialty, provided their performance is satisfactory. Categorical programs in primary care Medicine and primary care Pediatrics are designated by (M) to distinguish them from regular Medicine and Pediatrics programs.
- Preliminary (P) positions are for one or two years of training needed as a prerequisite for entering advanced positions in specialty programs that require one or more years of broad clinical training. Internal Medicine, Surgery, and Transitional programs commonly offer preliminary positions.
- Advanced (A) positions (beginning in 2016) are positions in specialty programs that begin after completion of one or more years of preliminary training. Applicants without prior graduate medical education can apply for those positions while also applying for preliminary positions that are compatible with their plans.
- Physician (R) positions are PGY-2 positions starting in the year of the Match that are reserved

for physicians who have had prior graduate medical education. Physician positions are not available to U.S. senior medical students.

NRMP Program Code Structure

The NRMP program code is a **9-character** code based on the following criteria.

- The first four characters are the Institution Code.
- The fifth through the seventh characters represent the specialty code obtained from the first three digits of the program's ACGME Code and designates the specialty.
- The eighth character represents the program type:
 - P - Preliminary program
 - C - Categorical program
 - M - Primary program
 - A - Advanced program
 - R - Physician program
 - F - Fellowship program
- The ninth character represents the track:
 - 0 - first program/track in the specialty and program type at the institution
 - 1 - second program/track in the same specialty and program type at the same institution (i.e. 34th Street Clinic)
 - 2 - third program/track in the same specialty and program type at the same institution (i.e. Rural Clinic).

Examples:

Institution: **3099** - University at Buffalo SOM
ACGME Code: **120-35-21-489** - Family Medicine
Program Type: **C** - Categorical

First Track: **0** - Buffalo General Hospital
(Main Program)

Program Code: 3099120C0

Second Track: **1** - Erie County Medical Center
Program Code: 3099120C1

Third Track: **2** - Millard Fillmore Suburban Hospital
Program Code: 3099120C2

Note: See ACGME Specialty Codes on the following page.
