NRMP Specialties Matching Service: Program Results for 2016 Appointments	89		

About the Specialties Matching Service®

The National Resident Matching Program (NRMP) is a private, not-for-profit corporation established in 1952 to optimize the rank-ordered choices of applicants and graduate medical education program directors. The NRMP is not an application processing service; rather, it provides an impartial venue for matching applicants' and program directors' preferences for each other consistently.

The NRMP Specialties Matching Service® (SMS®) conducts Matches for advanced residency and fellowship positions. The NRMP conducted its first Fellowship Match in 1984 for Colon and Rectal Surgery, and in 2016 provided services for 61 subspecialties within 27 separate Matches. Five new Matches were added for the 2016 appointment year: Headache Medicine, Hospice and Palliative Medicine, Obstetric Anesthesiology, Spinal Cord Injury Medicine, and Vascular Neurology. Two single-specialty Matches, Allergy and Immunology and Geriatric Medicine, joined the Medical Specialties Matching Program, making it a 14-specialty Match. Also, Pediatric Endocrinology moved from the Pediatric Specialties Spring Match to the Pediatric Specialties Fall Match, now a 10-specialty Match.

A complete list of the subspecialties participating in the SMS for the 2016 appointment year can be found in Figure 1.

Fellowship Matches occur throughout the year, and each requires its own registration process with the NRMP. Fellowship positions generally begin in July. Because Fellowship Match appointments may begin anywhere from 6 to 17 months after their Match Days, data are reported for the appointment year instead of the Match Year.

For more information about the NRMP's Specialties Matching Service, please visit: <http://www.nrmp.org>.

Data and reports for the NRMP's Main Residency Match® can be found at: www.nrmp.org/match-data. Instructions on how to request additional data also are provided.

Introduction

This report summarizes all Fellowship Matches conducted by the NRMP Specialties Matching Service® (SMS®). Data are provided for Matches conducted in 2015 and early 2016 for appointments beginning in July 2016. Graphs display five-year trend data by specialty on numbers of programs, positions, and applicants as well as match rates. Numbers of positions offered and filled for each participating program are listed at the end of this report.

The 2016 report includes five new specialties: Headache Medicine, Hospice and Palliative Medicine, Obstetric Anesthesiology, Spinal Cord Injury Medicine, and Vascular Neurology.

The 2016 appointment year was the largest in the history of the SMS. The Matches encompassed:

- 4,036 programs within 61 subspecialties offering 9,320 fellowship positions
- Of those positions, 8,041 (86.3%) were filled

- Of the 4,036 participating programs, 3,150 (78.0%) filled all positions
- 9,893 applicants participated in at least one Fellowship Match and 8,041 (81.3%) obtained positions

Numbers of applicants, matched applicants, positions, and programs offering positions between 1993 and 2016 are shown in Figure 2 below.

Table 1

Table 1 provides a summary of the SMS® Fellowship Matches for appointment year 2016.

Using Allergy and Immunology as an example:

- The first two columns (“No. of Applicants”) show that 108 U.S. allopathic medical school graduates and 151 total applicants ranked at least one Allergy and Immunology program.
- The next two columns (“Positions Offered” and “No. of Programs”) show that a total of 137 positions were offered in this specialty by 86 programs.
- The “No. of Matches” columns show that, of the 137 positions offered in Allergy and Immunology, 92 were filled by U.S. allopathic graduates, and 125 were filled overall.
- The percent of positions filled (calculated as “No. of Matches” divided by “Positions Offered”) can be found in the “% Filled” columns. Of the fellowship positions offered in Allergy and Immunology, 67.2 percent were filled by U.S. allopathic graduates and 91.2 percent were filled overall.
- The “Ranked Positions” columns show that the 86 Allergy and Immunology programs were ranked 882 times by U.S. allopathic graduates and 1,210 times by all applicants (including U.S. allopathic graduates).
- The last column (“Unfilled Programs”) indicates that 11 Allergy and Immunology programs had at least 1 unfilled position after the matching algorithm had been processed.

Of the 61 participating subspecialties, 32 filled 90 percent or more of the positions offered and 18 filled less than 75 percent of the positions offered. Eight specialties, all in Obstetrics/Gynecology and Surgery, filled 75 percent or more of their positions with graduates of U.S. allopathic medical schools, and 29 specialties filled less than 50 percent of their positions with U.S. allopathic graduates.

+ Applicants can rank multiple specialties within the combined specialties Matches. In addition, a small number of applicants participate in more than one Fellowship Match within a single appointment year.

++ Graduates of U.S. allopathic medical schools

Table 2

Table 2 shows the number and percent of matches in each specialty by applicant type. Of the specialties offering at least 30 positions:

- Gynecologic Oncology had the highest proportion filled by *U.S. allopathic medical school graduates* (96.4%) and Nephrology had the lowest (29.3%). The top five specialties in the percentage of positions filled by graduates of U.S. allopathic medical schools are Gynecologic Oncology (96.4%), Hand Surgery (92.2%), Female Pelvic Medicine and Reconstructive Surgery (88.7%), Reproductive Endocrinology (85.4%), and Adolescent Medicine (84.6%).
- The top five specialties in the percentage of positions filled by *graduates of osteopathic medical schools* are Sports Medicine (28.6%), Hospice and Palliative Medicine (21.2%), Developmental and Behavioral Pediatrics (19.2%), Pediatric Hospital Medicine (15.6%), and Pediatric Anesthesiology (14.0%).
- The top five specialties in the percentage of positions filled by *U.S. citizen international medical school graduates* are Sleep Medicine (28.6%), Nephrology (24.6%), Child and Adolescent Psychiatry (19.9%), Geriatric Medicine (19.8%), and Developmental and Behavioral Pediatrics (19.2%%).
- The top five specialties in the percentage of positions filled by *Non-U.S. citizen international medical school graduates* are Abdominal Transplant Surgery (56.9%), Medical Genetics (41.7%), Endocrinology, Diabetes, and Metabolism (36.8%), Nephrology (36.2%), and Rheumatology (34.4%).

* In most cases specialties are grouped by the ACGME Review Committees (RCs). Some specialties are under the auspices of multiple RCs and some specialties (or programs within a specialty) are not accredited by the ACGME. In those cases the fellowship programs are grouped under one specialty deemed appropriate. The grouped specialties and their RCs are:

- Female Pelvic Medicine and Reconstructive Surgery: Urology and OB/GYN. Also includes programs that are not accredited by the ACGME
- Geriatric Medicine: Family Medicine and Internal Medicine
- Hand Surgery: Osteopathic Surgery, Surgery, and Plastic Surgery
- Medical Toxicology: Emergency Medicine and Preventive Medicine
- Obstetric Anesthesiology: Anesthesiology. Also includes programs that are not accredited by the ACGME
- Pediatric Emergency Medicine: Pediatrics and Emergency Medicine
- Pediatric Surgery: Surgery. Also includes programs that are not accredited by the ACGME
- Sleep Medicine: Internal Medicine, Neurology, Pediatrics, and Psychiatry
- Sports Medicine: Family Medicine, Emergency Medicine and Physical Medicine & Rehabilitation
- Surgical Oncology: Surgery. Also includes programs that are not accredited by the ACGME

Table 3

The ratios of fellowship positions to active applicants are provided in Table 3 for appointment years 2012 through 2016 and shown graphically in Figure 3 for appointment years between 2002 and 2016. Active applicants are defined as those who submitted certified rank order lists of programs. The red line in Figure 3 indicates the point at which there are equal numbers of positions and applicants.

- The number of fellowship positions per *active U.S. allopathic graduate* was 1.70 in 2016. Across all years, there were more fellowship positions offered than there were U.S. allopathic graduate applicants.
- The ratio of fellowship positions to *all active applicants* was 0.94 for the 2016 appointment year, the highest in history.

Table 3 Number of Positions per Active Applicant, 2012 - 2016

Table 4

Table 4 displays applicants by applicant type in the SMS® Fellowship Matches between 2012 and 2016.

Applicants are grouped based on citizenship and medical school of graduation. For example, *graduates of U.S. allopathic medical schools* are prior graduates of U.S. allopathic medical schools regardless of citizenship. *U.S. citizen graduates of international medical schools* are defined as U.S. citizens who are graduates of international medical schools, and *non U.S. citizen graduates of international medical schools* are non-U.S. citizen graduates of international medical schools.

The total number of registrants for the 2016 appointment year was 10,498, an increase of 462 or 4.6 percent over 2015. Most notably, the number of U.S. citizen graduates of international medical schools rose to 1,462 in 2016 from 1,293 in 2015, a 13.1 percent increase. The number of non-U.S. citizen graduates of international medical schools declined for the fourth year in a row, and is down almost 500 applicants since 2012. With the exception of non U.S. citizen graduates of international medical schools and graduates of Fifth Pathway programs, registration numbers for all applicant types increased from 2015 to 2016.

An *active applicant* is one who submits a certified rank order list of programs. Between 2012 and 2016, the number of active applicants rose for graduates of U.S. allopathic medical schools (31.5% increase), U.S. citizen graduates of international medical schools (41.7% increase), and most notably for graduates of osteopathic medical schools (55.6% increase). Active applicant groups that increased faster than the overall rate of 19.9 percent between 2012 and 2016 are identified in Table 4 with green arrows.

The trends in the numbers of active applicants and their match rates can be seen graphically in Figure 4.

Table 5

Table 5 displays Fellowship Match results by specialty and applicant preferred choice. Applicant preferred choice is determined by the placement of programs on applicants' rank order lists. *Preferred specialty* is defined as the specialty ranked first on the applicant's rank order list.

For single-specialty Matches (top half of table), the data presentation and interpretation are straightforward. For multi-specialty Matches (bottom half of table), they are more complicated.

Single Specialty Matches

Using Hospice and Palliative Medicine as an example, 226 of 259 applicants matched. Of the 226 matched applicants, 57.5 percent matched to the program that was listed first on their rank order list, 16.6 percent matched to their second choice, 6.6 percent to their third choice, and 6.6 percent to a choice lower on their list. Thirty-three applicants in Hospice and Palliative Medicine did not match, representing 12.7 percent of the total.

Combined Specialties Matches

To count unique applicants for the multi-specialty Matches, each applicant is included in the counts for the specialty ranked first on the rank order list (preferred specialty). Because applicants can match to other specialties within the same Match, "Matched in Another Specialty" data also are provided.

For example, Cardiovascular Disease participated with 13 other specialties in the Medical Specialties Matching Program (MSMP). Of the 1,108 applicants who ranked Cardiovascular Disease, 1,096 ranked it first. Overall, 836 applicants matched to Cardiovascular Disease; of those who matched, 831 listed it as the preferred specialty.

Of the 1,108 applicants who ranked Cardiovascular Disease, 442 (39.9%) matched to the program that was listed first on the rank order list, 163 (14.7%) matched to the second choice, 108 (9.7%) to the third choice, 123 (11.1%) to a choice lower on their list, and 9 (0.8%) matched to another specialty within the MSMP.

Of the 1,108 applicants who ranked Cardiovascular Disease, 263 (23.7%) failed to match.

- Geriatric Medicine: Family Medicine and Internal Medicine
- Hand Surgery: Osteopathic Surgery, Surgery, and Plastic Surgery
- Medical Toxicology: Emergency Medicine and Preventive Medicine
- Obstetric Anesthesiology: Anesthesiology. Also includes programs that are not accredited by the ACGME
- Pediatric Emergency Medicine: Pediatrics and Emergency Medicine
- Pediatric Surgery: Surgery. Also includes programs that are not accredited by the ACGME
- Sleep Medicine: Internal Medicine, Neurology, Pediatrics, and Psychiatry

+ Applicants can rank multiple specialties within the combined specialties Matches. In addition, a small number of applicants participate in more than one Fellowship Match within a single appointment year.

Table 6

Table 6 displays data between 2012 and 2016 in the numbers of positions offered by specialty, as well as the percent filled by U.S. allopathic medical school graduates and by all applicants. To provide a complete picture, the table includes all specialties that participated during the five-year period regardless of when they joined and whether they remained in the SMS®. The data in Table 6 are calculated as a percentage of positions filled by applicant type, whereas the data in Table 2 are calculated as a percentage of matches by applicant type.

A graphical summary of the data for each specialty listed in Table 6 can be found on the following pages.

Specialties Matching Service®: Program Results for 2016 Appointments

This section of the report lists every hospital that participated in the SMS® along with the number of positions offered and filled for each of the institution's programs.

Hospitals are arranged alphabetically within state. The listing includes the hospital name (abbreviated in some instances); the program code, which identifies each program; the quota (the number of positions offered by the program); and the number of applicants matched with that program.

There are three reasons why a program that ranked an adequate number of applicants did not fill its quota: (1) the applicants preferred other programs; (2) the applicants did not rank the program; or (3) the applicants had withdrawn from the Match. There are also three reasons why applicants may not have matched with their most preferred program: (1) the program was filled with applicants it preferred; (2) the program did not rank the applicant; or (3) the program had withdrawn from the Match.

NRMP Program Code Structure

The NRMP program code is a **9-character** code based on the following criteria.

- The first four characters are the Institution Code.
- The fifth through the seventh characters represent specialty code obtained from the first three digits of the program's ACGME Code and designates the specialty (see below).
- The eighth character represents the program type: F - Fellowship program
- The ninth character represents the track:
 - 0 - first program/track in the specialty and program type at the institution
 - 1 - second program/track in the same specialty and program type at the same institution (i.e. 34th Street Clinic)
 - 2 - third program/track in the same specialty and program type at the same institution (i.e. Rural Clinic).
