# NATIONAL RESIDENT MATCHING PROGRAM

## INTRODUCTION

The National Resident Matching Program (NRMP) was established in 1952 to provide both applicants and residency program directors a fair opportunity to consider their options for appointment, to make reasoned decisions and to have their decisions announced at a uniform time. This brief introduction is followed by the year 2001 NRMP match results.

The first match was conducted in 1952 when 10,400 internship positions were available for 6,000 U.S. graduating seniors. By 1973, there were 19,000 positions in the match for just over 10,000 U.S. graduating seniors. Following the demise of internships in 1975, the number of first year post-graduate (PGY-1) positions in the match dropped to 15,700. The number of PGY-1 positions offered gradually increased to a high of 20,772 in the 1994 Match. This year, 20,642 positions were offered (Figure 1).

The increase in the total number of applicants since 1952 is more dramatic starting with 6,000 in 1952 and rising to a high of 36,056 in 1999. However, there has been a decline of 4,100 applicants over the last two years with 31,956 registering for the 2001 Match.

The NRMP is managed by the Association of American Medical Colleges (AAMC). NRMP operations are conducted in the AAMC's Division of Student Affairs and Education Services, Section for Student Services.

In 1999 the NRMP moved two major functions of the Match to the Web. The submission of Rank Order Lists on the Web replaced the old system that used computer disks and paper copies. Applicants and program directors entered their choices on the Web and submitted their lists to the NRMP electronically. Additionally, the results of the Match were posted to the Web for more simultaneous release to various match participants. NRMP no longer releases the Unfilled Programs List to the general public. Rather, it was posted to the Web during Match Week for use by participants. Users are required to enter an NRMP code and password to gain access to Match information.

NRMP is developing a totally web-based system to be used for the 2002 Match. It will be a paperless system with registration by applicants and programs, the submission of Rank Order Lists, and the release of Match Results occurring on the web. The system is scheduled to open in late summer 2001.

Beginning in 2000 the NRMP combined the previous Results Book and Data Book publication into one document. You will find the Match Outcomes for All Programs in the Appendix.

Special data requests, pertaining to this or prior matches, should be directed in writing to:

Liz Lostumbo

Washington, DC 20037-1127

## TABLES 1 AND 2

The 2001 Match can be characterized as a success, with higher fill rates and match rates almost across the board. Tables 1 and 2 illustrate the trends in the number of positions and the number of applicants participating in the Match during the past seven years. Many applicants, in addition to U.S. senior medical students, seek residency positions through the NRMP. The data for different categories of applicants are shown in Table 2. U.S. Foreign Graduates are defined as U.S. citizen graduates of foreign medical schools, and non-U. S. Foreign Graduates are non-U.S. citizen graduates of foreign medical schools.

Despite the fact that the number of teaching hospitals participating in the 2001 Match was 14 less than in previous years (not shown), the number of PGY-1 positions offered in the Match increased by 44 (0.2%). However, the number of PGY-2 increased 5.3% with 112 more positions offered in 2001 compared with 2000. Most of the increase can be attributed to 77 additional anesthesiology PGY-2 positions.

For the second year, there is a significant change in the number of applicants registered for the Match, with a decline of 1,572 (4.7%) as compared to the 2000 Match. The decline in the number of non-US foreign graduates was even more dramatic, dropping by 1,801 (16.6%) over 2000. This is the second in a row of a decline (Figure 2). This decrease in the number of non-US citizen foreign graduates noted above followed shortly after the ECFMG required the successful completion of the Clinical Skills Assessment (CSA) examination for certification beginning July 1, 1998.

A comparison of 2000 and 2001 Match data shows that the drop in foreign-trained registrants was not in first-time registrants. This year there were 5,641 first time foreign-trained registrants, only 100 less than in 2000. This is dramatically different from the 31.6% change between 1999 and 2000. In 1999, 8,398 Educational Commission for Foreign Medical Graduates (ECFMG) certified registrants participated in the Match for the first time, and in 2000 there were only 5,741 first-time registrants who were ECFMG, or a difference of 2,657.

Two categories of applicants experienced notable increases in registrations: 128 (7.7%) more osteopathic applicants and 48 (47.0%) more Fifth Pathway Program applicants registered for the 2001 Match than the 2000 Match.

The decline in from 2000 to 2001 was also reflected in 1,075 (4.3%) fewer active applicants (those submitting a Rank Order List). But only 37 fewer applicants were matched to a PGY-1 position. Of the total number of applicants, 18,354 were matched to a PGY-1 residency position. With fewer active applicants and more positions, the match rate for all applicants rose to 76.5%, the highest since 1995 (Figure 3).

In the 2001 Match, 93.7% (13,542) of the 14,455 U. S. medical seniors who actively participated were matched to a first year position. This is virtually the same rate as 1999 and 2000. Adding the 193 seniors who matched to a PGY-2 position but not a PGY-1 position, 95.0% of U.S. Seniors were matched to at least one position in the Match.

Note: Active Applicants are those who submit a list of residency program choices.

### TABLE 3

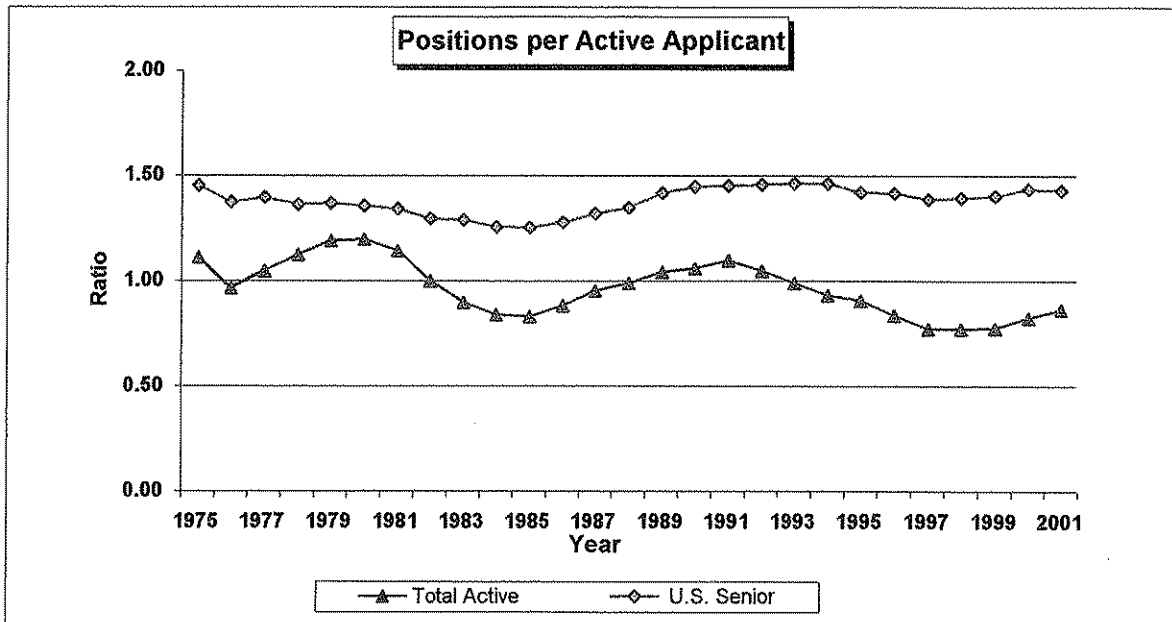

The ratios of PGY-1 positions to active applicants from 1975 through 2001 are shown in Table 3. Active applicants are defined as those who submitted a Rank Order List.

- In 2001, the ratio of PGY-1 positions per active U.S. Senior remained constant with 2000 at 1.43/1. The ratio declined from 2.0/1 in 1972 (not shown) to a low of 1.25/1 in 1984 and 1985. Since then it has fluctuated between 1.32/1 and 1.46/1.
- The ratio of PGY-1 positions to total applicants (rather than only U.S. Seniors) is quite different and is 0.86/1 for 2001, the second year for an increase due to the decline in non-U.S. citizen, foreign-trained medical graduates participating in the Match.

**TABLE 3**  
**PGY-1 POSITIONS FOR APPLICANTS ACTIVE IN THE 2001 MATCH**

YEAR	NUMBER OF POSITIONS	ACTIVE U.S. SENIORS	POSITIONS PER U.S. SENIOR	ACTIVE TOTAL	POSITIONS PER ACTIVE TOTAL
1975	15,691	10,802	1.45	14,153	1.11
1976	16,112	11,735	1.37	16,728	0.96

1992	20,394	14,030	1.45	19,519	1.04
1993	20,598	14,094	1.46	20,916	0.98
1994	20,772	14,207	1.46	22,352	0.93
1995	20,751	14,621	1.42	22,936	0.90
1996	20,563	14,539	1.41	24,718	0.83
1997	20,209	14,614	1.38	26,323	0.77
1998	20,299	14,610	1.39	26,360	0.77
1999	20,453	14,607	1.40	26,462	0.77
2000	20,598	14,358	1.43	25,056	0.82
2001	20,642	14,455	1.43	23,981	0.86

NOTE: Applicants who withdrew or did not rank programs are excluded.

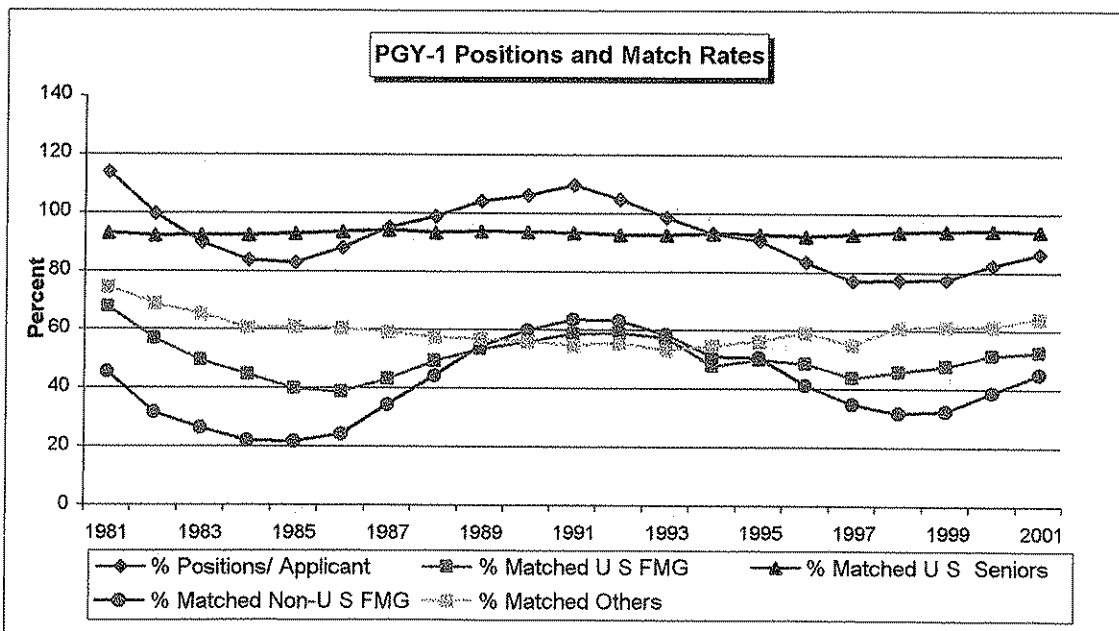

## TABLE 4

Table 4 shows the match rates to PGY-1 positions for U.S. Seniors, U.S. citizens trained in foreign medical schools, non-U.S. citizens trained in foreign medical schools, and Others (Canadian, Osteopathic, Fifth Pathway and U.S. physicians). Three of the four categories registered an increase in **match rates**, the percentage of active participants who received a match in the 2001 Match for PGY-1 programs. The fourth group, U.S. Seniors, remained virtually unchanged.

- 93.7% of U.S. Seniors matched.
- U.S. citizen FMGs' match rate increased by 1.0%, the fourth year of an increase.
- Canadian, Osteopathic, Fifth Pathway and U.S. physicians collectively matched at 64.0%, an increase of 2.7%.
- The percentage of non-U.S. FMGs who matched had a significant increase to 44.8%, a jump of 6.3% in one year. (See Table 1 and 2 comments.)

2000	20,598	25,056	82.2	93.9	61.3	51.4	38.5
2001	20,642	23,981	86.1	93.7	64.0	52.4	44.8

## TABLES 5 AND 6

The numbers of positions offered in the Match by specialty, and the number filled by U.S. Seniors and by an aggregate of all applicants are depicted in Table 5. Table 6 displays the same information in percentages.

- For the third year, more than 20,000 matches were made to PGY-1 and PGY-2 positions in the Match, with an increase of 138 over 2000.
- The **fill rate** for programs remained unchanged from 2000 at 89.2% and virtually unchanged compared to 89.3% in 1999.
- The number of PGY-1 positions offered increased for the fourth year, with 44 more positions in the Match.
- PGY-2 advanced specialty programs, beginning in 2002, offered 112 more positions in the 2001 Match than last year, with the biggest increase in anesthesiology.
- A total of 5,570 generalist residency positions were offered in internal medicine, internal medicine-pediatrics, internal medicine primary this year, of which U.S. Seniors filled 60.5 percent. Graduates of non-U.S. medical schools filled an additional 32.1 percent.
- U.S. medical school seniors filled 48.9 percent of the 3,074 positions offered in family practice, and other applicants filled 27.4 percent.

Specialties of note are:

- Specialties and specialty tracks with greater than 10 positions offered in the Match that had 100% fill rates.
  - Dermatology C
  - Plastic Surgery C
  - Radiation Oncology C
- Specialties with greater than 10 positions offered in the Match that had over 90% of the offered positions filled by U.S. Seniors:
  - Orthopaedic Surgery C
  - Plastic Surgery C
  - Radiation Oncology C and S
  - Radiology-Diagnostic C
  - Urology C

## TABLES 7, 8 AND 9

Tables 7, 8 and 9 present the data on specialties for PGY-1 programs for three different groups: all applicants, U.S. Seniors, and foreign-trained physicians. Foreign-trained physicians are U.S. citizen and non-U.S. citizen graduates of foreign medical schools but exclude Canadian, Osteopathic, and Fifth Pathway applicants.

### Generalist Specialties

In 2001, 48.9% or 6,627 U.S. medical school seniors who were active applicants matched to a first-year residency position in one of the generalist specialties, a decrease of 2.5% from last year. The generalist specialties are defined as:

- Family Practice,
- Internal Medicine, Internal Medicine-Pediatrics, Internal Medicine-Primary,
- Pediatrics, Pediatrics-Primary.

All of these specialties except Pediatrics matched fewer U.S. Seniors in 2001 than in 2000. Approximately 11 percent of matched U.S. Seniors, or 1,503 individuals, will enter family practice residency programs, a decrease of 314 (12.2%) from 2000.

- Nearly 25 percent of matched U.S. Seniors, or 3,369 individuals, will enter internal medicine, internal medicine-pediatrics, or internal medicine-primary residency programs, a decrease of 50 over last year.
- Thirteen percent of matched U.S. Seniors, or 1,755 individuals participating in the Match, will enter pediatrics and pediatrics-primary residency programs, an increase of 60 from last year.

Table 9 shows the number of U.S. citizen and non-U.S. citizen foreign-trained physicians, those graduates of medical schools outside of the United States and Canada, who matched to PGY-1 positions by specialty. By far the largest percentage (38.7%) of foreign-trained applicants who matched, received positions in Internal Medicine. Family Practice has the next largest group of foreign-trained physicians matching to 15.1% of positions offered, an increase of 2.2% over the 2000 Match.

## TABLE 10

There are two parts to this table. The first (on the left) shows the number of programs ranked by U.S. Seniors, and the second (on the right) reports the information for all applicants. For example, an applicant ranking ten programs would contribute a count of ten to the total. Very competitive specialties are likely to have higher ratios of numbers of ranks per numbers of positions, as applicants tend to rank more programs in those specialties.

The Ranked Positions column describes the total number of times a particular specialty was ranked. Using Anesthesiology PGY-1 for Total Applicants as an example:

- The first two columns on the right show that 73 programs offered 371 Anesthesiology C positions in the Match.
- The Ranked Position Column shows that collectively all applicants ranked Anesthesiology C programs 2,861 times.
- The next column (#Ranks/Positions) shows the ratio of the number of ranks to the number of positions was 7.7/1 (2,861/371).
- The next two columns show that 332 of the 371 Anesthesiology positions offered were filled for a fill rate of 89.5 %.
- The last column indicates that 16 anesthesiology programs had unfilled positions after the Match.

## TABLE 11

Table 11 shows the program choices made by U.S. Seniors and Independent Applicants, both matched and unmatched, by specialty. Independent Applicants includes the following categories:

- U.S. citizen graduates of foreign medical schools,
- Non-U.S. citizen graduates of foreign medical schools,
- Canadian applicants,
- Osteopathic applicants,
- Fifth Pathway applicants, and
- Previous U.S. graduates.

Within each specialty the following categories of programs offering PGY-1 positions are included: categorical, preliminary, and primary programs. Thus an applicant who ranked Internal Medicine Categorical and Internal Medicine Preliminary would be counted as having Internal Medicine as his/her only choice.

The table also shows the ratio of applicants choosing a specialty and the number of positions in that specialty. For example:

- 999 U.S. Seniors ranked at least one Diagnostic Radiology program. With only 137 positions offered, the ratio of positions to U.S. senior applicants was 0.1/1, indicating a very competitive specialty for U.S. Seniors.
- On the other hand, 949 U.S. Seniors ranked a Transitional program and 1,031 positions were offered. The ratio in this "specialty" is 1.1/1 (or 1,031/949), indicating the supply exceeds the demand for this specialty.

While the ratios for U.S. Seniors and the total applicant pool are similar in many specialties, there are some notable exceptions. In three specialties, the ratios for U.S. students were significantly higher than for all applicants combined, meaning all other applicants ranked these specialties much more frequently.

Specialty	U.S. Ratios	Total Applicant Ratio
Family Practice	1.8	0.8
Pathology	2.0	0.6
Psychiatry	1.5	0.5

## TABLE 12

Table 12 examines the 85.5% of the population of U.S. Seniors submitting a Rank Order List with only one type of specialty ranked. This is 6.9% lower than in the 2000 Match. High unmatched rates for applicants, in such specialties as Dermatology (26.8%), Radiation Oncology (33.9%), Orthopaedic Surgery (16.0%), and Diagnostic Radiology (15.6%) reflect the fact that there are significantly more applicants interested in these specialties than there are positions in the specialty. This disparity is also reflected in the high fill rates (Table 6) for the PGY-1 positions of the four specialties which were 100%, 100.0%, 98.4%, and 99.3 % respectively.

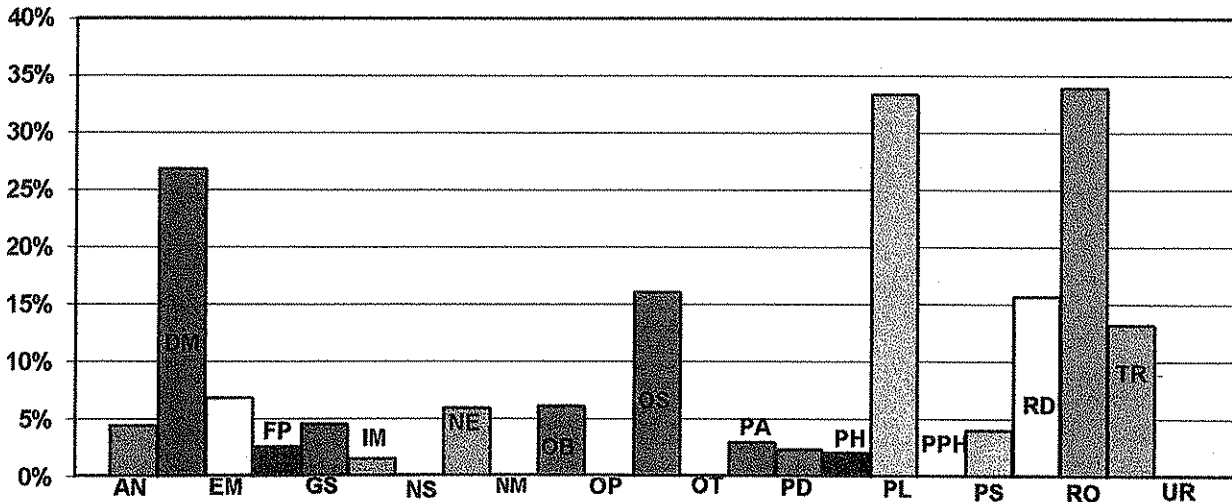

Of the 949 U.S. Seniors who ranked Transitional programs (see Table 11), only 99 of them ranked only Transitional programs. This relatively small number appears to give a "false positive" high percentage of unmatched applicants in this specialty.

\* 85.5 Percent of Active Seniors

**Unmatched US Seniors Who Ranked Only One Specialty**

## TABLE 13

Table 13 shows the number of matches obtained by U.S. Seniors to programs that were ranked by the students first, second, third, fourth, or fifth and lower. Of all the matches to first- and second-year programs, 85.0 percent were to one of the first three choices of U.S. medical school seniors. The percent of matches to programs ranked among the top three choices is down slightly from 86.7 percent in 2000. Approximately, 60.5 percent were first choice matches, 15.6 percent were second choice, and 8.9 percent were third choice.

As indicated in the footnote on the table, results before 2000 combined matches and applicants unmatched to PGY-1 positions together to create the denominator for calculating percentages. The resulting percentages were misleading. Both PGY-1 and PGY-2 matches are included in the First Choice, Second Choice, etc. numbers. Thus applicants who match to both types of programs have their choices counted twice, while applicants who received a PGY-1 or PGY-2 match, and had also ranked choices for the other type of program, were only represented once for the match they received. Also, unmatched applicants were counted once although they may have ranked choices for both PGY-1 and PGY-2 programs.

**Note:** Beginning in 1991, Table 13 includes PGY-2 positions in addition to PGY-1.

TABLE 13

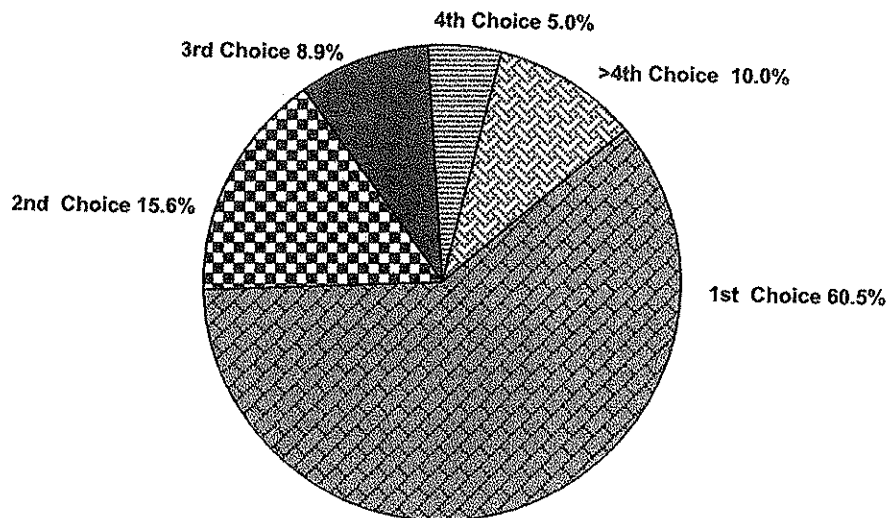

**RANK NUMBER OBTAINED FOR PGY-1 AND PGY-2 MATCHES  
U.S. MEDICAL SCHOOL SENIORS 1989 - 2001**

YEAR	FIRST CHOICE	PERCENT MATCHES	SECOND CHOICE	PERCENT MATCHES	THIRD CHOICE	PERCENT MATCHES	FOURTH CHOICE	PERCENT MATCHES	>FOURTH CHOICE	PERCENT MATCHES	TOTAL # MATCHES
1989	8,252	62.4	2,091	15.8	1,079	8.2	604	4.6	1,189	9.0	13,215

1994	9,210	63.9	2,192	15.2	1,164	8.1	596	4.1	1,255	8.7	14,417
1995	8,722	59.8	2,270	15.6	1,282	8.8	799	5.5	1,513	10.4	14,586
1996	8,459	59.8	2,218	15.7	1,181	8.3	823	5.8	1,464	10.3	14,145
1997	8,676	59.4	2,336	16.0	1,359	9.3	774	5.3	1,454	10.0	14,599
1998	8,690	58.4	2,446	16.4	1,392	9.3	849	5.7	1,512	10.2	14,889
1999	9,175	60.9	2,361	15.7	1,320	8.8	826	5.5	1,396	9.3	15,078
2000	9,303	62.3	2,285	15.3	1,291	8.6	706	4.7	1,354	9.1	14,939
2001	9,156	60.5	2,359	15.6	1,347	8.9	757	5.0	1,513	10.0	15,132

NOTES: -Prior to 1991 only PGY-1 positions included in statistics

-This version of Table 13 was introduced in 2000 and excludes unmatched applicants as a category. Previous versions combined matches and applicants in the denominator resulting in percentages that were misleading. This data only refers to obtained.

**% of Matches by Rank Number**

## TABLE 14

Couples have been able to participate together in the NRMP Match since 1984. The two partners identify themselves as a couple to NRMP and submit Rank Order Lists of identical length. The algorithm treats the two lists as a unit, matching the couple to the highest linked program choices where both partners match to the programs listed.

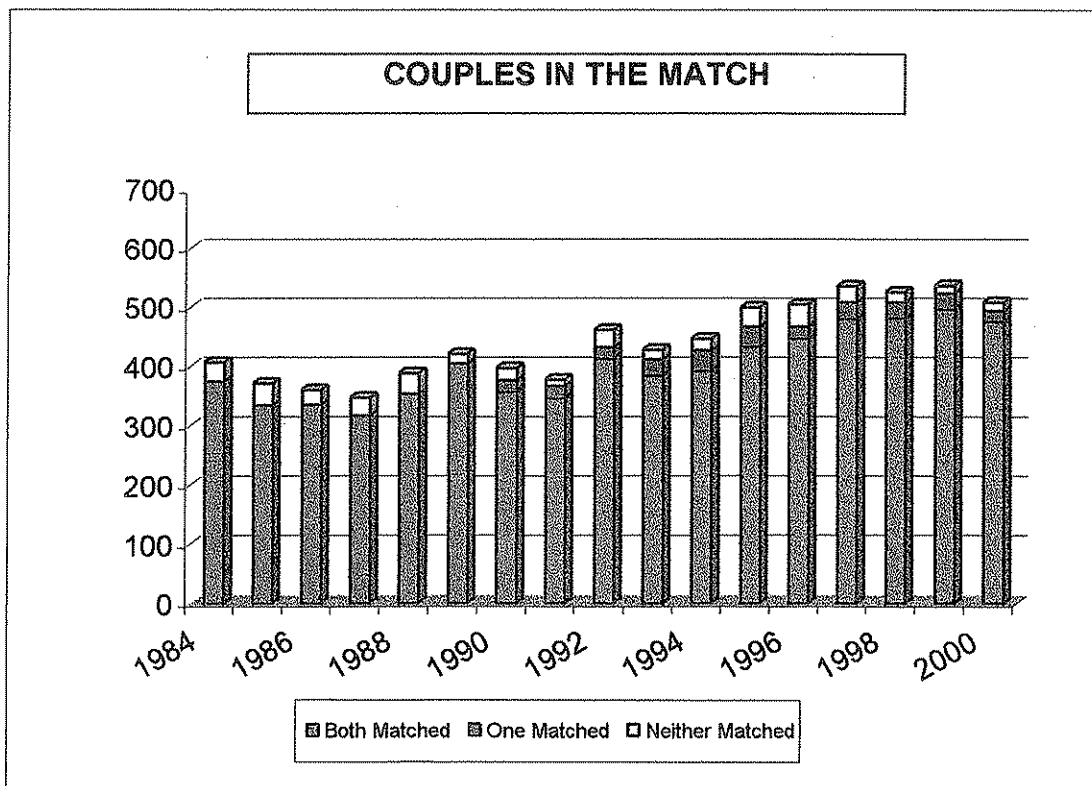

Couples enjoy great success in the Match with match rates over 90% every year since 1984, and in 2001 matching at 94.6%. The vast majority of couples are U.S. Seniors, and their match rates are very similar to their classmates, varying within 1 or 2 percent each year.

Since 1990, couples have had the option of one partner indicating his/her willingness to go unmatched at a certain rank on his/her rank order list if the partner matches to the program linked to this rank. Table 14 shows the number of couples matched with this option in the *One Matched* column.

**TABLE 14  
COUPLES IN THE MATCH  
From 1985 To 2001**

Year	Couples	Individuals	Both Matched	One Matched	Neither Matched	Match Rate %
1985	371	742	334		37	90.0
1986	360	720	335		25	93.1
1987	347	694	316		31	91.1
1988	388	776	353		35	91.0
1989	421	842	404		17	96.0
1990	397	794	356	20	21	92.2
1991	377	754	346	20	11	94.4

1998	525	1050	481	27	17	94.2
1999	536	1072	496	27	13	95.1
2000	508	1016	475	18	15	95.3
2001	561	1122	518	25	18	94.6

## TABLE 15

Table 15 shows the matches made by specialty and by geographic breakdown by state. It reflects only PGY-1 positions and is restricted to those specialties or sub-specialties that had 30 or more positions offered in the Match. It further displays the information by applicant category, and at the end of each specialty table gives a total summary for the specialty.

An index to the headings follows:

ST	state abbreviation
POS	positions offered
US SR	U.S. Seniors
US MD	Previous U.S. graduates
5th PA	Fifth Pathway students
US FMG	U.S. citizen graduates of foreign medical schools
OST	Osteopathic students
CAN	Canadian students
NUS FMG	Non-U.S. citizen graduates of foreign medical schools
% USS	% of positions filled by U.S. Seniors
% Total	% of positions filled by all applicants

## NRMP PROGRAM RESULTS 2001 MATCH

*NRMP Program Results* lists every hospital that participated in the Match and the number of candidates requested and the number matched for each hospital program.

Hospitals are arranged alphabetically by city within state. The listing includes the hospital name (abbreviated in some instances), a six-digit NRMP code, which identifies each program, the quota (the number of positions offered by the program), and the number of applicants matched with that program.

A plus sign, (+), indicates a program did not fill but reverted (donated) one or more of its unfilled positions to another program.

The following types of programs are offered through the NRMP:

- Categorical (C) positions are positions in programs that expect applicants who enter in their first post graduate year to complete the training required for certification in that specialty, provided their performance is satisfactory.
- Preliminary (P) positions are for one or two years of training as prerequisite for entering advanced positions in specialty programs that require one or more years of broad clinical training. Internal medicine, surgery, and transitional programs commonly offer preliminary positions.
- Advanced (S) positions (to begin in 2002) are positions in specialty programs that begin after completion of one or more years of preliminary training. Applicants without prior graduate medical education can apply for these positions while also applying for preliminary positions (to begin in 2001) that are compatible with their plans.
- Physician (R) positions are positions that are reserved for physicians who have had prior graduate medical education. Physician positions are not available to senior U.S. medical students.

The NRMP is not publishing the list of unfilled programs to the general public this year. Instead, it was posted to the Web during Match Week for use by the participants.

There are three reasons why a program that ranked an adequate number of applicants did not fill its quota: the applicants preferred other programs having vacancies; the applicants did not rank the program; or the applicants had withdrawn from the Match.

There are also three reasons why applicants may not be matched with their most preferred program: the program was filled with applicants it preferred; the program did not rank the applicant; or the program had withdrawn from the Match.
