APPLICANTS & 1ST YEAR POSITIONS IN THE MATCH 1952-2002

NATIONAL RESIDENT MATCHING PROGRAM

INTRODUCTION

The National Resident Matching Program celebrates its 50th anniversary in 2002. The NRMP was established in 1952 to provide both applicants and residency program directors a fair opportunity to consider their options for appointment, to make reasoned decisions and to have their decisions announced at a uniform time.

The first match was conducted in 1952 when 10,400 internship positions were available for 6,000 U.S. graduating seniors. By 1973, there were 19,000 positions in the match for just over 10,000 U.S. graduating seniors. Following the demise of internships in 1975, the number of first year post-graduate (PGY-1) positions in the match dropped to 15,700. The number of PGY-1 positions offered gradually increased to a high of 20,772 in the 1994 Match. This year, 20,602 positions were offered (Figure 1).

The increase in the total number of applicants since 1952 is more dramatic starting with 6,000 in 1952 and rising to a high of 36,056 in 1999. However, there has been a decline of 4,973 applicants over the last three years with 31,083 registering for the 2002 Match.

NRMP completed the total re-engineering of the matching process system for the 2002 Match. The new web-based Registration, Ranking and Results system (R3) was launched in July 2001. The new system is completely paperless and allows applicants and programs to complete all match related activities on-line including:

- registration, with applicants paying their registration fees on-line whether by credit card or electronic checking;

- entering their Rank Order Lists;
- and obtaining Match Results.

The new system is a user-based system rather than a program-based system, with all participants being assigned a unique ID number, which they will use again in matches in subsequent years. The system also relies almost exclusively on communications via e-mail which allows for very timely messages being sent to participants on short notice.

For the 2002 Match, NRMP augmented the release of Match Results on the web during Match Week with e-mail messages to applicants, program directors and schools at critical times. In addition, the Registration, Ranking and Results system (R3) was supported by an expanded pool of servers. These two changes improved the performance of the application during peak times near the Rank Order List deadline and during Match Week.

The NRMP is managed by the Association of American Medical Colleges (AAMC). NRMP operations are conducted in the AAMC's Division of Student Affairs and Education Services, Section for Student Services.

Special data requests, pertaining to this or prior matches, should be directed in writing to:

TABLES 1 AND 2

The 2002 Match can be characterized as a success, with higher fill rates and match rates almost across the board. Tables 1 and 2 illustrate the trends in the number of positions and the number of applicants participating in the Match during the past seven years. Many applicants, in addition to U.S. senior medical students, seek residency positions through the NRMP. The data for different categories of applicants are shown in Table 2. U.S. foreign graduates are defined as U.S. citizens who are graduates of foreign medical schools, and non-U.S. foreign graduates are non-U.S. citizen graduates of foreign medical schools.

The number of PGY-1 positions offered in the Match decreased by 40 (0.2%). However, the number of PGY-2 positions increased 3.5% with 78 more positions offered in 2002 compared with 2001. The increase in positions can be attributed to 44 (5.7%) additional anesthesiology PGY-2 positions and 50 (6.3%) additional diagnostic radiology PGY-2 positions along with a decrease in psychiatry PGY-2 positions.

For the third year, there is a significant change in the number of applicants registered for the Match, with a decline of 873 (2.7%) as compared to the 2001 Match. The decline in the number of non-U.S. foreign graduates was the greatest, dropping by 460 (5.1%) over 2001. This is the third year in a row of a decline (Figure 2). The decrease was significantly less than the 16.6% and 22.5% declines in 2001 and 2000 respectively. These decreases in the number of non-U.S. citizen foreign graduates noted above followed shortly after the Educational Commission on Foreign Medical Graduates (ECFMG) required the successful completion of the Clinical Skills Assessment (CSA) examination for certification beginning July 1, 1998.

There were 565 (3.6%) fewer U.S. Seniors registered for the 2002 Match. However, this percent of decline did not carryover to the number of U.S. Seniors active in the Match. An active applicant is defined as one who submits a list of residency program choices. That decline of active U.S. Seniors was 119 (0.8%), compared with 2001 reflecting 379 fewer withdrawals and 67 fewer not submitting a Rank Order List among U.S. Seniors.

Further examination of the registrations for the graduates of foreign medical schools, both U.S. citizens and non U.S.-citizens, who registered for the match but did not actively participate, shows that 1,687 were withdrawn from the match because they lacked eligibility for certification by the ECFMG. This is an increase of 401 (32.3%) over the number withdrawn from the 2001 Match for this reason.

The decline in applicants from 2001 to 2002 was also reflected in 522 (2.2%) fewer active applicants (those submitting a Rank Order List). But 93 more applicants were matched to a PGY-1 position. Of the total number of applicants, 18,447 were matched to a PGY-1 residency position. With fewer active applicants and more positions filled, the match rate for all applicants rose to 78.6%, the highest since 1996 (Figure 3).

In the 2002 Match, 94.1% (13,489) of the 14,336 U. S. medical seniors who actively participated were matched to a first year position. This is the highest percentage ever. Adding the 236 seniors who matched to a PGY-2 position but not a PGY-1 position, 95.7% of U.S. Seniors were matched to at least one position in the Match.

Note: Active Applicants are those who submit a list of residency program choices.

Note: Unmatched PGY-1 applicants includes applicants who matched to PGY-2 positions, but not to PGY-1 positions.

TABLE 3

The ratios of PGY-1 positions to active applicants from 1975 through 2002 are shown in Table 3. Active applicants are defined as those who submitted a Rank Order List.

- In 2002, the ratio of PGY-1 positions per active U.S. Senior remained almost constant with the previous two years at 1.44/1. The ratio declined from 2.0/1 in 1972 (not shown) to a low of 1.25/1 in 1984 and 1985. Since then it has fluctuated between 1.32/1 and 1.46/1.
- The ratio of PGY-1 positions to total applicants (rather than only U.S. Seniors) is quite different and rose for the third year due to the decline in non-U.S. citizen, foreign-trained medical graduates participating in the Match.

TABLE 3
RATIO OF PGY-1 POSITIONS TO ACTIVE APPLICANTS
1975 - 2002

| YEAR | NUMBER OF POSITIONS | ACTIVE U.S. SENIORS | POSITIONS PER U.S. SENIOR | ACTIVE TOTAL | POSITIONS PER ACTIVE APPLICANT |
|------|---------------------|---------------------|---------------------------|--------------|--------------------------------|
| 1975 | 15,691 | 10,802 | 1.45 | 14,153 | 1.11 |
| 1976 | 16,112 | 11,735 | 1.37 | 16,728 | 0.96 |
| 1977 | 16,574 | 11,898 | 1.39 | 15,854 | 1.05 |
| 1978 | 17,219 | 12,666 | 1.36 | 15,354 | 1.12 |
| 1979 | 17,824 | 13,036 | 1.37 | 14,985 | 1.19 |
| 1980 | 18,055 | 13,322 | 1.36 | 15,129 | 1.19 |
| 1981 | 18,331 | 13,705 | 1.34 | 16,104 | 1.14 |
| 1982 | 18,300 | 14,144 | 1.29 | 18,410 | 0.99 |
| 1983 | 17,952 | 13,969 | 1.29 | 20,044 | 0.90 |
| 1984 | 18,457 | 14,741 | 1.25 | 22,052 | 0.84 |
| 1985 | 18,535 | 14,849 | 1.25 | 22,386 | 0.83 |
| 1986 | 18,770 | 14,737 | 1.27 | 21,357 | 0.88 |
| 1987 | 19,047 | 14,466 | 1.32 | 20,054 | 0.95 |
| 1988 | 19,513 | 14,499 | 1.35 | 19,808 | 0.99 |
| 1989 | 19,955 | 14,117 | 1.41 | 19,207 | 1.04 |
| 1990 | 20,101 | 13,908 | 1.45 | 19,004 | 1.06 |
| 1991 | 20,192 | 13,943 | 1.45 | 18,450 | 1.09 |
| 1992 | 20,394 | 14,030 | 1.45 | 19,519 | 1.04 |
| 1993 | 20,598 | 14,094 | 1.46 | 20,916 | 0.98 |
| 1994 | 20,772 | 14,207 | 1.46 | 22,352 | 0.93 |
| 1995 | 20,751 | 14,621 | 1.42 | 22,936 | 0.90 |
| 1996 | 20,563 | 14,539 | 1.41 | 24,718 | 0.83 |
| 1997 | 20,209 | 14,614 | 1.38 | 26,323 | 0.77 |
| 1998 | 20,299 | 14,610 | 1.39 | 26,360 | 0.77 |
| 1999 | 20,453 | 14,607 | 1.40 | 26,462 | 0.77 |
| 2000 | 20,598 | 14,358 | 1.43 | 25,056 | 0.82 |
| 2001 | 20,642 | 14,455 | 1.43 | 23,981 | 0.86 |
| 2002 | 20,602 | 14,336 | 1.44 | 23,459 | 0.88 |

NOTE: Applicants who withdrew or did not rank programs are excluded.

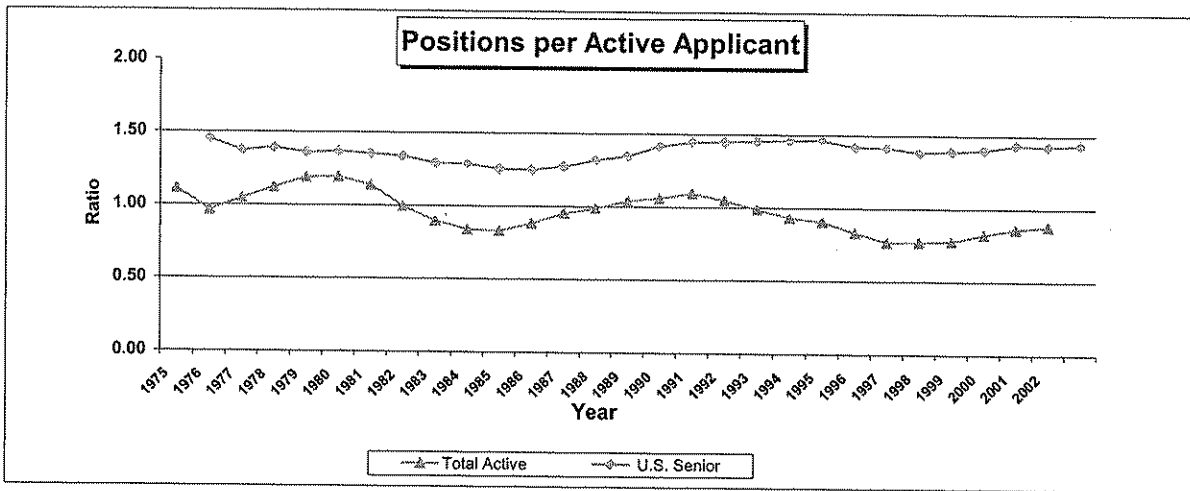

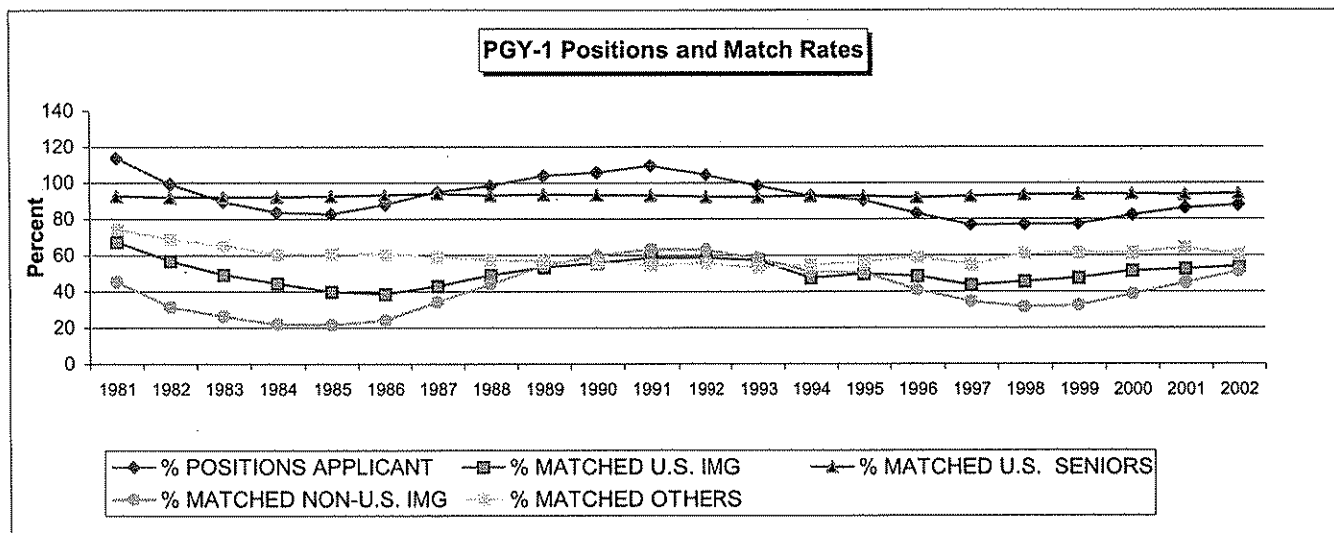

TABLE 4

Table 4 shows the match rates to PGY-1 positions for U.S. Seniors, U.S. citizens trained in foreign medical schools, non-U.S. citizens trained in foreign medical schools, and Others (Canadian, Osteopathic, Fifth Pathway and U.S. physicians). Three of the four categories registered an increase in **match rates**, the percentage of active participants who received a match in the 2002 Match for PGY-1 programs. The group of Others' match rate declined 3.7% from the previous year.

- 94.1% of U.S. Seniors matched, the highest rate ever.
- U.S. citizen IMGs' match rate increased by 1.4%, the fifth year of an increase.
- Canadian, Osteopathic, Fifth Pathway and U.S. physicians collectively matched at 60.3%, a decrease of 3.7% from the 2001 Match.
- The percentage of non-U.S. IMGs who matched had a significant increase for the second consecutive year with a jump of 6.5%. (See Table 1 and 2 comments.)

TABLE 4

| 2001 | 20,642 | 23,981 | 86.1 | 93.7 | 64.0 | 52.4 | 44.8 |
| 2002 | 20,602 | 23,459 | 87.8 | 94.1 | 60.3 | 53.8 | 51.3 |

TABLES 5 AND 6

The numbers of positions offered in the Match by specialty, and the number filled by U.S. Seniors and by an aggregate of all other applicants are depicted in Table 5. Table 6 displays the same information in percentages.

- For the fourth year, more than 20,000 matches were made to PGY-1 and PGY-2 positions in the Match, with an increase of 260 over 2001.
- The **fill rate** for all programs increased by 190 over 2001 to 90.2%
- The number of PGY-2 positions offered continues to increase, with 78 more positions in the Match, including 50 more diagnostic radiology positions and 44 more anesthesiology positions in 2002.
- U.S. Seniors filled 75.3% of the 1,039 positions offered in surgery categorical programs, a drop of 3.5%. But the overall fill rate for surgery programs increased by 0.9% to 94.4%.

Specialties of note are:

- Specialties and specialty tracks with greater than 10 positions offered in the Match that had 100% fill rates.
 - Dermatology PGY1 & PGY2
 - Peds/Psych/Child Psych PGY1
 - Plastic Surgery PGY1
 - Radiation Oncology PGY1
- Specialties with greater than 10 positions offered in the Match that had over 90% of the offered positions filled by U.S. Seniors:
 - Dermatology PGY1
 - Orthopaedic Surgery PGY1
 - Peds/Psych/Child Psych PGY1
 - Plastic Surgery PGY1
 - Radiation Oncology PGY2
- Three specialties had a fill rate variance greater than 5% when compared to 2001.
 - Anesthesiology PGY1 increased by 6.2% and PGY2 increased by 7.5%
 - Physical Medicine and Rehabilitation PGY1 increased by 5.2% and PGY2 by 13.1%
 - Pediatrics had a 6.6% decrease all attributable to 143 fewer U.S. Seniors matching in that specialty.

TABLES 7, 8 AND 9

Tables 7, 8 and 9 present the data on specialties for PGY-1 programs for three different groups: all applicants, U.S. Seniors, and foreign-trained physicians. Foreign-trained physicians are U.S. citizen and non-U.S. citizen graduates of foreign medical schools but exclude Canadian, Osteopathic, and Fifth Pathway applicants.

Generalist Specialties

In 2002, 46.4% or 6,253 U.S. medical school seniors who were active applicants matched to a first-year residency position in one of the generalist specialties, a decrease of 2.5% from last year. The generalist specialties are defined as:

- Family practice,
- Internal medicine, internal medicine-pediatrics, internal medicine-primary,
- Pediatrics, pediatrics-primary.

All of these specialties except pediatrics primary matched fewer U.S. Seniors in 2002 than in 2001.

- 10.4% of matched U.S. Seniors, or 1,399 individuals, will enter family practice residency programs, a decrease of 104 from 2001.
- 23.8% of matched U.S. Seniors, or 3,234 individuals, will enter internal medicine, internal medicine-pediatrics, or internal medicine-primary residency programs, a decrease of 135 over last year.
- 12% of matched U.S. Seniors, or 1,620 individuals participating in the Match, will enter pediatrics and pediatrics-primary residency programs, a decrease of 135 from last year.

Table 9 shows the number of U.S. citizen and non-U.S. citizen foreign-trained physicians, those graduates of medical schools outside of the United States and Canada, who matched to PGY-1 positions by specialty. By far the largest percentage (36.5%) of foreign-trained applicants who matched, received positions in internal medicine. Family practice has the next largest group of foreign-trained physicians matching to 16.8% of positions offered, an increase of 1.7% over the 2001 Match.

TABLE 10

There are two parts to this table. The first (on the left) shows the number of programs ranked by U.S. Seniors, and the second (on the right) reports the information for all applicants. For example, an applicant ranking ten programs would contribute a count of ten to the total. Very competitive specialties are likely to have higher ratios of numbers of ranks per numbers of positions, as applicants tend to rank more programs in those specialties.

The Ranked Positions column describes the total number of times a particular specialty was ranked. Using Anesthesiology PGY-1 for Total Applicants (the right side of the table) as an example:

- The first two columns show that 73 programs offered 392 Anesthesiology PGY-1 positions in the Match.
- The Ranked Positions Column shows that collectively all applicants ranked these Anesthesiology programs 3,573 times.
- The next column (#Ranks/Position) shows the ratio of the number of ranks to the number of positions was 9.1/1 (3,573/392).
- The next two columns show that 375 of the 392 Anesthesiology PGY-1 positions offered were filled for a fill rate of (95.7 %).
- The last column indicates that 8 Anesthesiology programs had unfilled positions after the Match.

Source: National Resident Matching Program 2002 Match Data

TABLE 11

Table 11 shows the program choices made by U.S. Seniors and Independent Applicants, both matched and unmatched, by specialty. Independent Applicants include the following categories:

U.S. citizen graduates of foreign medical schools,
Non-U.S. citizen graduates of foreign medical schools,
Canadian applicants,
Osteopathic applicants,
Fifth Pathway applicants, and
Previous U.S. graduates.

Within each specialty the following categories of programs offering PGY-1 positions are included: categorical, preliminary, and primary programs. Thus an applicant who ranked Internal Medicine Categorical and Internal Medicine Preliminary would be counted as having Internal Medicine as his/her only choice.

The table also shows the ratio of applicants choosing a specialty and the number of positions in that specialty. For example:

- 938 U.S. Seniors ranked at least one Diagnostic Radiology program. With only 132 positions offered, the ratio of positions to U.S. senior applicants was 0.1/1, indicating a very competitive specialty for U.S. Seniors.
- On the other hand, 1,096 U.S. Seniors ranked a Transitional program and 1,062 positions were offered. The ratio in this “specialty” is 1.0/1 (or 1,062/1,096), indicating the supply and the demand are almost equal for this specialty.

While the ratios for U.S. Seniors and the total applicant pool are similar in many specialties, there are some notable exceptions. In three specialties, the ratios for U.S. students were significantly higher than for all applicants combined, meaning all other applicants ranked these specialties much more frequently.

| Specialty | U.S. Ratios | Total Applicant Ratio |
|-----------------|-------------|-----------------------|
| Family Practice | 1.9 | 0.8 |
| Pathology | 1.9 | 0.6 |
| Psychiatry | 1.5 | 0.6 |

NOTE: *Active applicants includes totals of both U.S. Seniors and Independent Applicants.

TABLE 12

Table 12 examines the 88.3% of the population of U.S. Seniors submitting a Rank Order List with only one type of specialty ranked. This is 2.8% higher than in the 2001 Match. High unmatched rates for applicants, in such specialties as Dermatology (16.1%), Radiation Oncology (17.9%), and Orthopaedic Surgery (14.8%), reflect the fact that there are significantly more applicants interested in these specialties than there are positions in the specialty. This disparity is also reflected in the high fill rates (Table 6) for the PGY-1 positions of the three specialties which were 100%, 100.0%, and 99.3 % respectively.

Of the 1,096 U.S. Seniors who ranked Transitional programs (see Table 11), only 79 of them ranked only Transitional programs. This relatively small number appears to give a “false positive” high percentage of unmatched applicants in this specialty.

Unmatched U.S. Seniors Who Ranked Only One Specialty

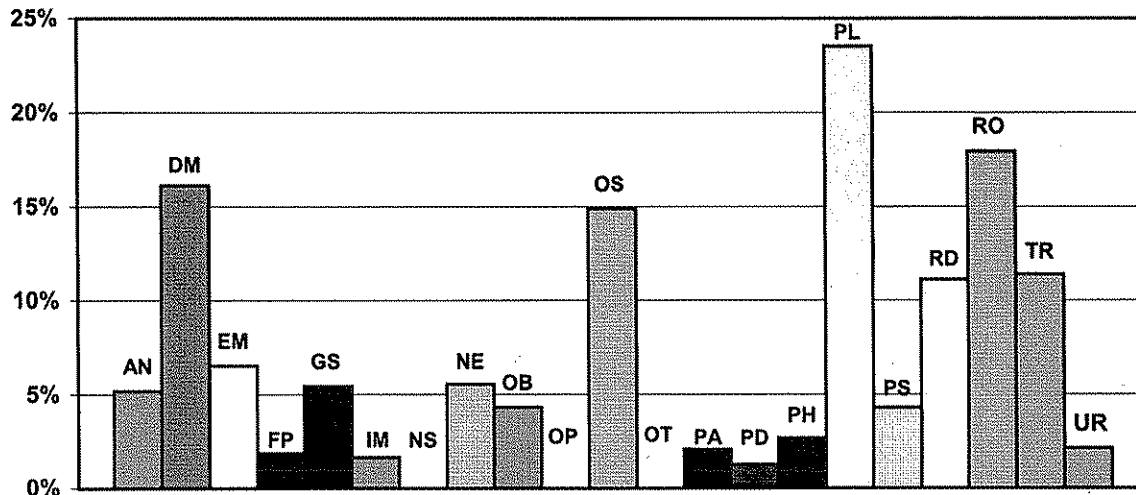

TABLE 13

Table 13 shows the number of matches obtained by U.S. Seniors to programs that were ranked by the students first, second, third, fourth, or fifth and lower. Of all the matches to first- and second-year programs, 86.3 percent were to one of the first three choices of U.S. medical school seniors. The percent of matches to programs ranked among the top three choices is up slightly from 85.0 percent in 2001. Approximately, 61.6 percent were first choice matches, 15.6 percent were second choice, and 9.1 percent were third choice.

As indicated in the footnote on the table, results before 2000 combined matches and applicants unmatched to PGY-1 positions together to create the denominator for calculating percentages. The resulting percentages were misleading. Both PGY-1 and PGY-2 matches are included in the First Choice, Second Choice, etc. numbers. Thus applicants who match to both types of programs have their choices counted twice, while applicants who received a PGY-1 or PGY-2 match, and had also ranked choices for the other type of program, were only represented once for the match they received. Also, unmatched applicants were counted once although they may have ranked choices for both PGY-1 and PGY-2 programs.

Note: Beginning in 1991, Table 13 includes PGY-2 positions in addition to PGY-1.

TABLE 13
RANK NUMBER OBTAINED FOR PGY-1 AND PGY-2 MATCHES
U.S. SENIORS 1989-2002

| YEAR | FIRST CHOICE | PERCENT MATCHES | SECOND CHOICE | PERCENT MATCHES | THIRD CHOICE | PERCENT MATCHES | FOURTH CHOICE | PERCENT MATCHES | >FOURTH CHOICE | PERCENT MATCHES | TOTAL # MATCHES |
|------|--------------|-----------------|---------------|-----------------|--------------|-----------------|---------------|-----------------|----------------|-----------------|-----------------|
| 1989 | 8,252 | 62.4 | 2,091 | 15.8 | 1,079 | 8.2 | 604 | 4.6 | 1,189 | 9.0 | 13,215 |

| 2000 | 9,303 | 62.3 | 2,285 | 15.3 | 1,291 | 8.6 | 706 | 4.7 | 1,354 | 9.1 | 14,939 |
| 2001 | 9,156 | 60.5 | 2,359 | 15.6 | 1,347 | 8.9 | 757 | 5.0 | 1,513 | 10.0 | 15,132 |
| 2002 | 9,414 | 61.6 | 2,387 | 15.6 | 1,392 | 9.1 | 741 | 4.9 | 1,343 | 8.8 | 15,277 |

NOTES: -Prior to 1991 only PGY-1 positions included in statistics
 -This version of Table 13 was introduced in 2000 and excludes unmatched applicants as a category. Previous versions combined matches and applicants in the denominator resulting in percentages that were misleading. This data only refers to matches obtained.

% of Matches by Rank Number

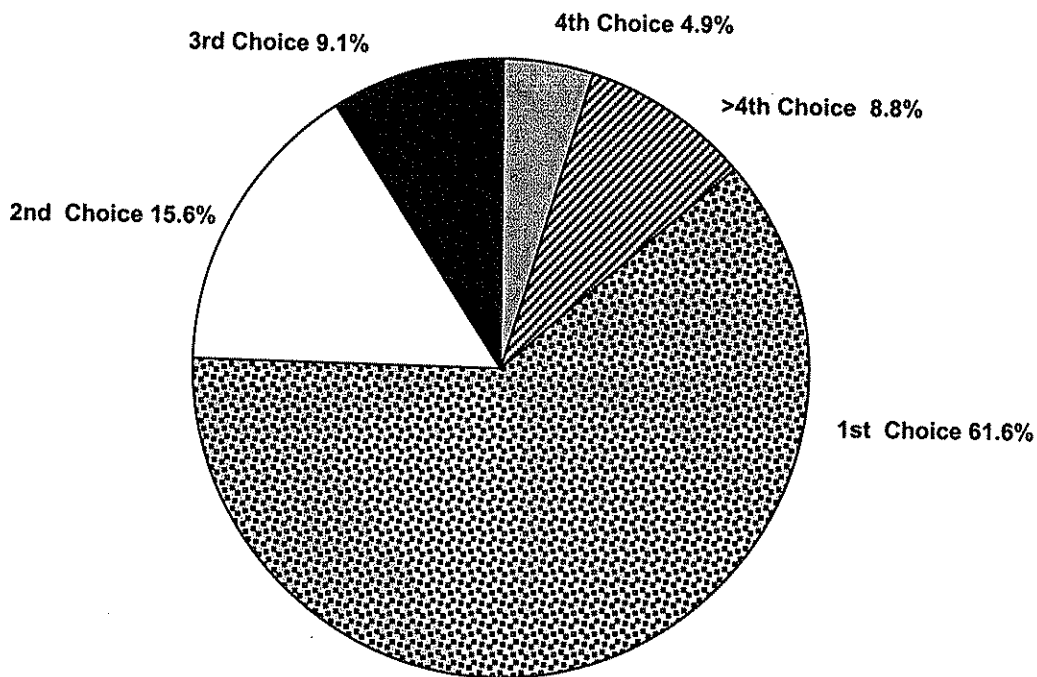

TABLE 14

Couples have been able to participate together in the NRMP Match since 1984. The two partners identify themselves as a couple to NRMP and submit Rank Order Lists of identical length. The algorithm treats the two lists as a unit, matching the couple to the highest linked program choices where both partners match to the programs listed.

Couples enjoy great success in the Match with match rates over 90% every year since 1984, and in 2002 matching at 95.1%. The vast majority of partners participating as a couple are U.S. Seniors (84.0%), and their match rates are very similar to their classmates, varying within 1 or 2 percent each year.

Couples have had the option of one partner indicating his/her willingness to go unmatched at a certain rank on his/her rank order list if the partner matches to the program linked to this rank. Table 14 shows the number of couples matched with this option in the *One Matched* column.

**TABLE 14
COUPLES IN THE MATCH
1986 - 2002**

| Year | Couples | Individuals | Both Matched | One Matched | Neither Matched | Match Rate % |
|------|---------|-------------|--------------|-------------|-----------------|--------------|
| 1986 | 360 | 720 | 325 | 20 | 15 | 93.1 |
| 1987 | 347 | 694 | 316 | 14 | 17 | 93.1 |
| 1988 | 388 | 776 | 355 | 19 | 14 | 93.9 |
| 1989 | 421 | 842 | 384 | 21 | 16 | 93.7 |
| 1990 | 397 | 794 | 356 | 20 | 21 | 92.2 |
| 1991 | 377 | 754 | 349 | 17 | 11 | 94.8 |
| 1992 | 461 | 922 | 412 | 20 | 29 | 91.5 |
| 1993 | 427 | 854 | 384 | 27 | 16 | 93.1 |
| 1994 | 446 | 892 | 391 | 35 | 20 | 91.6 |

NRMP PROGRAM RESULTS 2002 MATCH

NRMP Program Results lists every hospital that participated in the Match and the number of candidates requested and the number matched for each hospital program.

Hospitals are arranged alphabetically within state. The listing includes the hospital name (abbreviated in some instances), the program code, which identifies each program, the quota (the number of positions offered by the program), and the number of applicants matched with that program.

There are three reasons why a program that ranked an adequate number of applicants did not fill its quota: the applicants preferred other programs having vacancies; the applicants did not rank the program; or the applicants had withdrawn from the Match.

There are also three reasons why applicants may not be matched with their most preferred program: the program was filled with applicants it preferred; the program did not rank the applicant; or the program had withdrawn from the Match.

The following types of programs are offered through the NRMP:

- Categorical (C) positions are positions in programs that expect applicants who enter in their first post graduate year to complete the training required for certification in that specialty, provided their performance is satisfactory. Categorical programs in primary medicine and primary pediatrics are designated by (M) to distinguish them from regular medicine and pediatrics programs.
- Preliminary (P) positions are for one or two years of training as prerequisite for entering advanced positions in specialty programs that require one or more years of broad clinical training. Internal medicine, surgery, and transitional programs commonly offer preliminary positions.
- Advanced (A) positions (to begin in 2003) are positions in specialty programs that begin after completion of one or more years of preliminary training. Applicants without prior graduate medical education can apply for these positions while also applying for preliminary positions (to begin in 2002) that are compatible with their plans.
- Physician (R) positions are positions that are reserved for physicians who have had prior graduate medical education. Physician positions are not available to senior U.S. medical students.

NRMP Program Code Structure

The NRMP program code is a **9-character** code based on the following criteria.

- The **first four characters** are the Institution Code
- The **fifth through the seventh characters** represent specialty code obtained from the **first three digits** of the program's **ACGME Code** and designates the specialty.

- The **eighth character** represents the program type:
 - P – Preliminary program
 - C – Categorical program
 - M – Primary program
 - A – Advanced program
 - R - Physician program
 - F – Fellowship program
- The **ninth character** represents the track
 - 0 – first program/track in the specialty and program type at the institution
 - 1 – second program/track in the same specialty and program type at the same institution (i.e. 34th Street Clinic)
 - 2 – third program/track in the same specialty and program type at the same institution (i.e. Rural Clinic)

Examples

Institution: **1022 - UC San Francisco-FRESNO**
 ACGME Number: **140-05-31-033 - internal medicine**
 Program Type: **P - preliminary**
 First Track: **0**
PROGRAM CODE: 1022140P0

Second Track: **1**
PROGRAM CODE: 1022140P1

Note: See ACGME Specialty Codes on the following page.
