NRMP Specialties Matching Service: Program Results for 2009 Appointments	67

About the Specialties Matching Service

The National Resident Matching Program (NRMP) is a private, not-for-profit corporation established in 1952 to optimize the rank ordered choices of applicants and program directors. The NRMP is not an application processing service; rather, it provides an impartial venue for matching applicants' and programs' preferences for each other consistently.

In addition to the Main Residency Match for first and second year residency positions, the NRMP's Specialties Matching Service (SMS) conducts matches for advanced residency and fellowship positions. The NRMP conducted its first fellowship match in 1984 for Colon and Rectal Surgery, and in 2008 provided services for 37 sub-specialties within 21 separate matches. A full list of the specialties participating in the SMS for the 2009 appointment year can be found in Figure 1.

The specialty matches occur throughout the year, and each requires its own registration process with the NRMP. Fellowship positions generally begin in July. Because fellowship matches have appointments that start anywhere from 6 to 14 months after their match days, we have organized this report based on appointment year and not match year.

For more information about the NRMP's Specialties Matching Service, please visit: www.nrmp.org/fellow/.

Data and reports for the NRMP's Main Residency Match can be found at: www.nrmp.org/data/. Instructions on how to request additional data also are provided.

Introduction

This report summarizes all fellowship matches conducted by the NRMP's Specialties Matching Service (SMS). Specifically, data are provided for matches conducted in 2008 (and early 2009) for appointments beginning in July 2009. In addition, trend data over the past five years show the numbers of programs and positions as well as match rates by specialty. Lastly, the numbers of positions offered and filled for each participating program is presented at the end of this report.

The 2009 version of this report includes three new specialties (Endocrinology, Diabetes, and Metabolism; Neonatal-Perinatal Medicine; and Nephrology) and a new table. Table 5 provides data on the percentages of applicants who matched by program rank choice and specialty. In addition, the specialty-specific trend charts have been expanded to include additional measures and to allow better comparisons of measures with similar scale ranges.

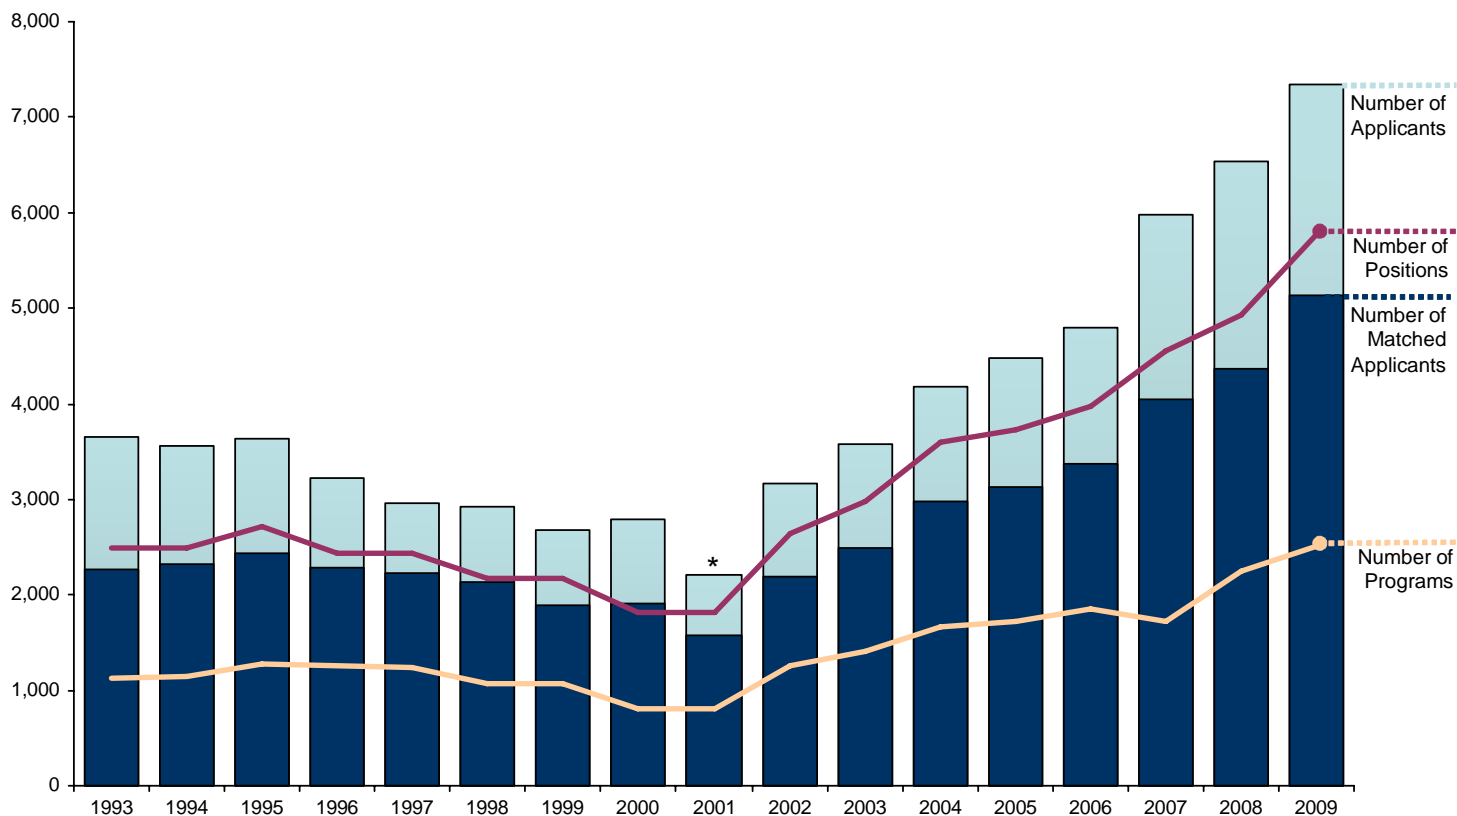

The 2009 appointment year was the largest in the history of the SMS. The matches included:

- 2,507 programs within 37 specialties offering 5,763 fellowship positions
- Of those positions, 5,130 (89.0%) were filled
- Of the 2,507 participating programs, 2,055 (82.0%) filled all their positions
- 7,344 applicants participated in at least one of the fellowship matches and 5,130 (69.9%) obtained a match

Questions regarding the NRMP's Specialties Matching Service should be directed in writing to:

Mona M. Signer, Executive Director
National Resident Matching Program
 2450 N Street NW
 Washington, DC 20037-1127
 nrmp@aamc.org

Figure 2 Numbers of Applicants and Programs Participating in the Specialties Matching Service (SMS) by Appointment Year, 1993-2009

*The decline in 2001 is an artifact of several specialties changing their appointment years.

Table 1

Table 1 provides a summary of the SMS fellowship matches for appointment year 2009.

Using Allergy and Immunology as an example:

- The first two columns show that 128 U.S. allopathic medical school graduates and 174 total applicants ranked at least one Allergy and Immunology program.
- The next two columns show that a total of 115 positions were offered in this specialty by 70 programs.
- The next two columns show that 89 of the 115 positions offered in Allergy and Immunology were filled by U.S. allopathic graduates and 108 were filled by all applicants.
- The percent filled (number filled/positions offered) can be found in the next two columns. Of the fellowship positions offered in Allergy and Immunology, 77.4 percent were filled by U.S. allopathic graduates and, overall, 93.9 percent were filled.
- The ranked positions columns show that collectively U.S allopathic graduates ranked those Allergy and Immunology programs 691 times and the total number of ranks for all applicants was 867.
- The last column indicates that 4 Allergy and Immunology programs had at least 1 unfilled position after the Match.

Of the 37 participating specialties, 23 filled more than 90 percent of the positions offered and 4 filled less than 75 percent of the positions offered. Six specialties filled 75 percent or more of the positions offered with graduates of U.S. allopathic medical schools and 13 specialties filled 50 percent or less of their positions offered with U.S. allopathic graduates.

*Specialties are grouped by Residency Review Committees (RRCs). Some specialties are under the auspices of multiple RRCs and some specialties (or programs within a specialty) are not accredited by the ACGME. In these cases the fellowship programs are grouped under the RRC with the preponderance of programs (for multiple RRCs) or the RRC that would have responsibility for the programs if accredited.

**Non ACGME accredited.

+Applicants can rank multiple specialties within the combined specialties matches. In addition, a small number of applicants participate in more than one fellowship match within a single appointment year.

++Graduates of U.S. allopathic medical schools.

Footnotes on opposite page.

Table 2

Table 2 shows the number and percent of matches in each specialty by applicant type. Of the specialties offering at least 30 positions:

- Reproductive Endocrinology had the highest proportion filled with *U.S. allopathic graduates* (86.8%) and Abdominal Transplant Surgery had the lowest (45.5%). The specialties of Allergy and Immunology, Colon and Rectal Surgery, Maternal-Fetal Medicine, Hand Surgery, and Surgical Critical Care filled 80 percent or more of their positions with graduates of U.S. allopathic medical schools.
- A larger than average percentage of *osteopathic graduates* matched to the specialties of Primary Care Sports Medicine, Pediatric Rheumatology, Foot and Ankle Orthopaedics, Neuroradiology, Pediatric Emergency Medicine, and Surgical Critical Care.
- A larger than average percentage of *Canadian graduates* matched to the specialties of Pediatric Surgery, Foot and Ankle Orthopaedics, and Hand Surgery.
- A larger than average percentage of *U.S. international medical school graduates* matched to the specialties of Pediatric Emergency Medicine, Primary Care Sports Medicine, and Child and Adolescent Psychiatry.
- A larger than average percentage of *Non-U.S. international medical school graduates* matched to the specialties of Abdominal Transplant Surgery and Clinical Oncology.

*Specialties are grouped by Residency Review Committees (RRCs). Some specialties are under the auspices of multiple RRCs and some specialties (or programs within a specialty) are not accredited by the ACGME. In these cases the fellowship programs are grouped under the RRC with the preponderance of programs (for multiple RRCs) or the RRC that would have responsibility for the programs if accredited.

**Non ACGME accredited.

Table 3

The ratios of fellowship positions to active applicants from 2004 through 2009 are provided in Table 3 and shown graphically in Figure 3. Active applicants are defined as those who submitted certified rank order lists. The red line in Figure 3 indicates the point at which there are equal numbers of positions and applicants.

- The ratio of fellowship positions per *active U.S. allopathic graduate* remained fairly constant between 2004 and 2008 before increasing to 1.54 positions per applicant in 2009. Across all five years, there were more fellowship positions offered than there were U.S. allopathic graduate applicants.
- The ratio of fellowship positions to *total active applicants* decreased slightly between 2004 and 2008, from 0.87 positions per applicant in 2004 to 0.75 positions per applicant in 2008, but increased slightly to 0.78 in 2009.

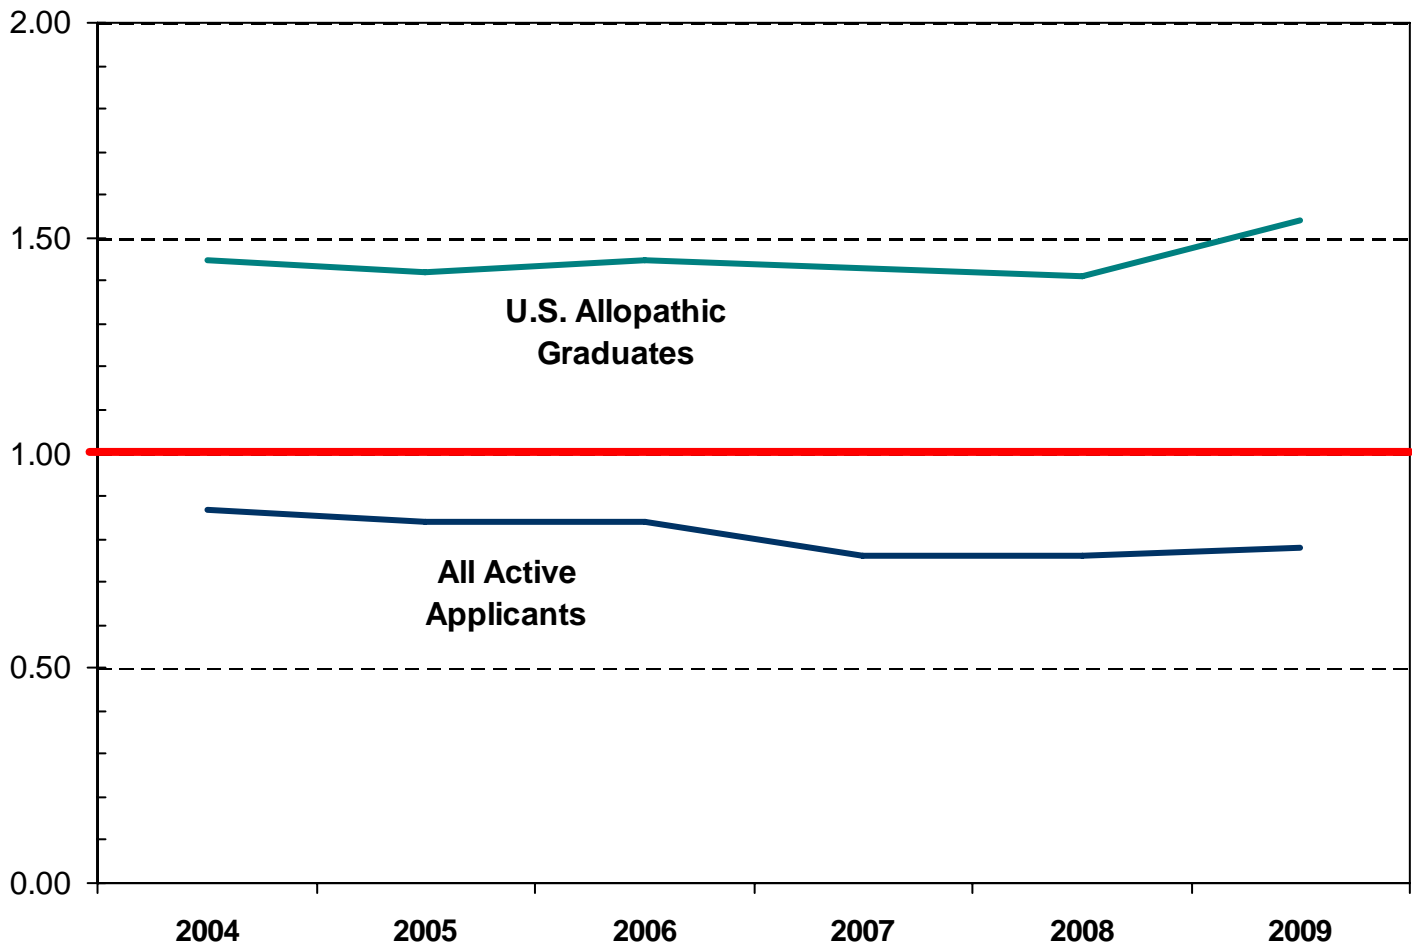

Taken together, these data suggest that the increase in the number of positions offered in the SMS matches between 2008 and 2009 was greater than the increase in the number of applicants when compared to the previous four years.

Table 3 Number of Positions per Active Applicant, 2004 - 2009

Year	Number of Positions	Active Applicants		Positions Per Active Applicant	
		U.S. Graduates*		U.S. Graduates*	
		U.S. Graduates*	All	U.S. Graduates*	All
2004	3,617	2,493	4,171	1.45	0.87
2005	3,753	2,645	4,479	1.42	0.84
2006	4,004	2,761	4,795	1.45	0.84
2007	4,573	3,207	5,985	1.43	0.76
2008	4,931	3,507	6,543	1.41	0.75
2009	5,763	3,752	7,344	1.54	0.78

Note: Applicants who withdrew or did not rank programs are excluded.
 *Graduates of U.S. allopathic medical schools

Figure 3 Positions per All Active and Active U.S. Allopathic Graduate Applicants, 2004-2009

Tables 4

Table 4 provides a summary of the participants in the SMS fellowship matches between 2005 and 2009 by applicant type. The total number of registrants for the 2009 appointment year (8,086) increased 8.6 percent from the 2008 figure of 7,212, and the number of active applicants grew by 801 (a 12.2% increase). An active applicant is one who submits a certified rank order list of programs. Those increases can be attributed to both the addition of new specialties (Endocrinology and Nephrology) and the increase in the number of applicants for some of the specialties participating over the entire period.

Applicants are grouped based on citizenship and medical school of graduation. For example, *U.S. allopathic graduates* are prior graduates of U.S. allopathic medical schools. *U.S. international graduates* are defined as U.S. citizens who are graduates of international medical schools, and *non-U.S. international graduates* are non-U.S. citizen graduates of international medical schools.

The increase between 2005 and 2009 in active applicants has not been uniform across applicant types. For example, active applicants who are non-U.S. international graduates rose by 111.7 percent while graduates of U.S. allopathic medical schools increased by only 41.2 percent. Active applicant groups that increased faster than the overall rate of 54.0 percent are identified in Table 4 with green arrows.

The trends in the numbers of active applicants and their match rates can be seen graphically in Figures 4.

▲ Denotes that the percentage increase in active applicants for this group was greater than the overall increase of 64.0% for all active applicants between 2005 and 2009.

Figure 4

Number of Active Applicants and Percent Matched, 2005 - 2009

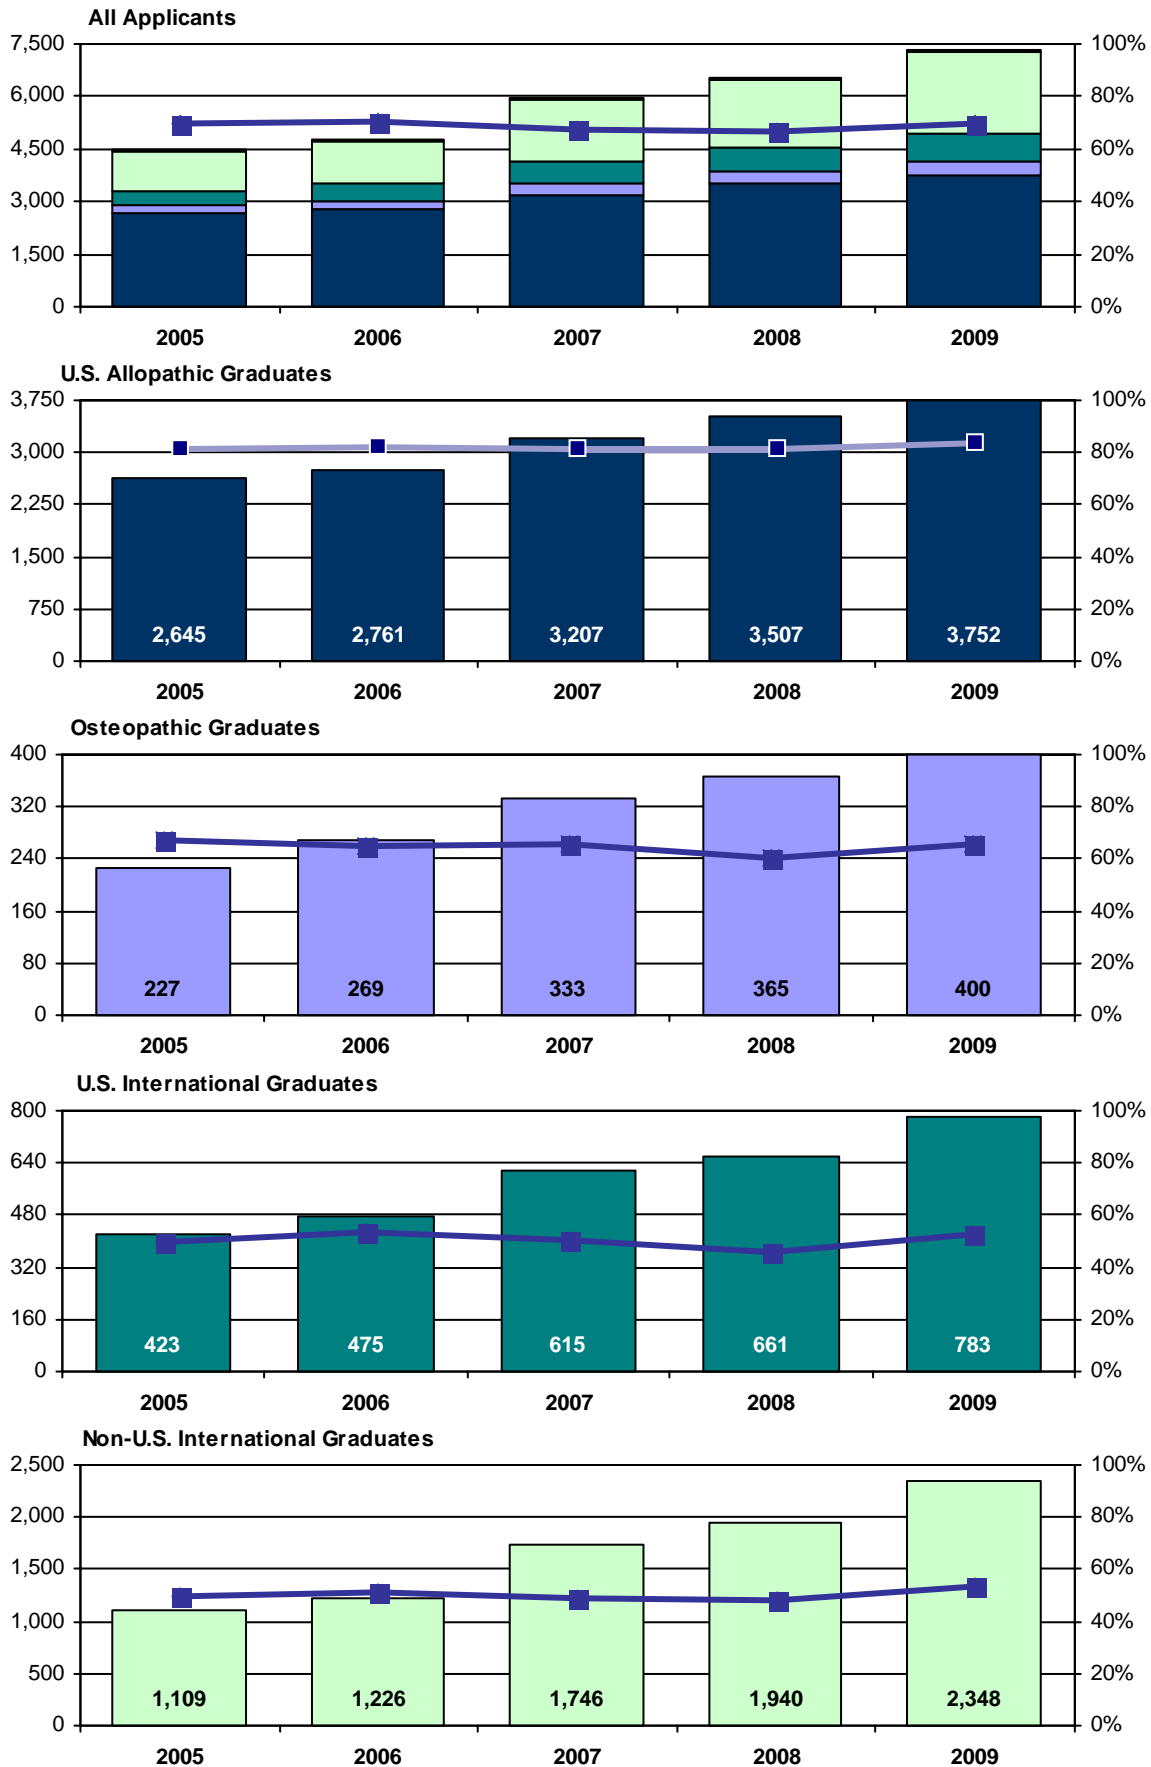

Table 5

Table 5 (new this year) displays fellowship match results by specialty and applicant choice. Applicant choice is determined by the placement of programs on applicants' rank order lists.

For single specialty matches (top half of table), the data presentation and interpretation are straightforward. For multiple specialty matches (bottom half of table) they are slightly more complicated.

Single Specialty Matches

Using Allergy and Immunology as an example, there were a total of 174 applicants, of whom 108 matched. Of the 108 matched applicants, 39.1 percent matched to the program that was listed first on their rank order list, 13.8 percent matched to their second choice, 6.9 percent to their 3rd choice, and 2.3 percent to a choice further down on their list. Sixty-six applicants in the Allergy and Immunology Fellowship Match did not match, representing 37.9 percent of the total number of applicants.

Combined Specialties Matches

In order to count applicants only once for the combined specialties matches, they are included in the counts for the specialty that they ranked first on their rank order lists (preferred specialty). Because these applicants can match to other specialties within the same match, "Matched in Another Specialty" data also are provided.

For example, Cardiovascular Disease participates with ten other specialties in the Medical Specialties Matching Program (MSMP) match. Of the 1,159 applicants who ranked Cardiovascular Disease, 1,147 ranked it first on their list of programs. Overall, 702 applicants matched to cardiovascular disease, and 702 of the applicants who preferred the specialty matched.

Of the 1,159 applicants who ranked Cardiovascular Disease, 37.4 percent matched to the program that was listed first on their rank order list, 10.1 percent matched to their second choice, 5.9 percent to their 3rd choice, 7.2 percent to a choice further down on their list, and 1.5 percent matched to another within the MSMP Match.

Four hundred and forty applicants who ranked Cardiovascular Disease programs failed to match in either specialty, representing 38.0 percent of the total number of applicants.

*Specialties are grouped by Residency Review Committees (RRCs). Some specialties are under the auspices of multiple RRCs and some specialties (or programs within a specialty) are not accredited by the ACGME. In these cases the fellowship programs are grouped under the RRC with the preponderance of programs (for multiple RRCs) or the RRC that would have responsibility for the programs if accredited.

**Non ACGME accredited.

+Applicants can rank multiple specialties within the combined specialties matches.

Table 6

Table 6 displays trends between 2005 and 2009 in the numbers of positions offered in the fellowship matches by specialty, as well as the percent filled by U.S. allopathic medical school graduates and by all applicants. To provide a complete picture, the table includes all specialties that participated during the five-year period regardless of when they joined and whether they remained in the SMS.

A graphical summary of the five year trends for each specialty listed in Table 5 can be found on the following pages.

*Specialties are grouped by Residency Review Committees (RRCs). Some specialties are under the auspices of multiple RRCs and some specialties (or programs within a specialty) are not accredited by the ACGME. In these cases the fellowship programs are grouped under the RRC with the preponderance of programs (for multiple RRCs) or the RRC that would have responsibility for the programs if accredited.

**Non ACGME accredited.

Specialties Matching Service: Program Results for 2009 Appointments

This section of the report lists every hospital that participated in the SMS, along with the number of positions offered and filled for each of the institution's programs.

Hospitals are arranged alphabetically within state. The listing includes the hospital name (abbreviated in some instances); the program code, which identifies each program; the quota (the number of positions offered by the program); and the number of applicants matched with that program.

There are three reasons why a program that ranked an adequate number of applicants did not fill its quota: (1) the applicants preferred other programs having vacancies; (2) the applicants did not rank the program; or (3) the applicants had withdrawn from the Match. There are also three reasons why applicants may not be matched with their most preferred program: (1) the program was filled with applicants it preferred; (2) the program did not rank the applicant; or (3) the program had withdrawn from the match.

NRMP Program Code Structure

The NRMP program code is a **9-character** code based on the following criteria.

- The first four characters are the Institution Code.
- The fifth through the seventh characters represent specialty code obtained from the first three digits of the program's ACGME Code and designates the specialty (see below).
- The eighth character represents the program type: F – Fellowship program
- The ninth character represents the track:
 - 0 – first program/track in the specialty and program type at the institution
 - 1 – second program/track in the same specialty and program type at the same institution (i.e. 34th Street Clinic)
 - 2 – third program/track in the same specialty and program type at the same institution (i.e. Rural Clinic).
