NRMP Specialties Matching Service: Program Results for 2011 Appointments.....	62
---	----

About the Specialties Matching Service

The National Resident Matching Program (NRMP) is a private, not-for-profit corporation established in 1952 to optimize the rank ordered choices of applicants and program directors. The NRMP is not an application processing service; rather, it provides an impartial venue for matching applicants' and programs' preferences for each other consistently.

In addition to the Main Residency Match for first and second year residency positions, the NRMP's Specialties Matching Service (SMS) conducts matches for advanced residency and fellowship positions. The NRMP conducted its first fellowship match in 1984 for Colon and Rectal Surgery, and in 2011 provided services for 40 sub-specialties within 20 separate matches. A full list of the specialties participating in the SMS for the 2011 appointment year can be found in Figure 1.

The specialty matches occur throughout the year, and each requires its own registration process with the NRMP. Fellowship positions generally begin in July. Since fellowship matches have appointments that start anywhere from 6 to 14 months after their match days, data are reported for the appointment year instead of the match year.

For more information about the NRMP's Specialties Matching Service, please visit: www.nrmp.org/fellow/.

Data and reports for the NRMP's Main Residency Match can be found at: www.nrmp.org/data/. Instructions on how to request additional data also are provided.

Introduction

This report summarizes all fellowship matches conducted by the NRMP's Specialties Matching Service (SMS). Data are provided for matches conducted in 2010 (and early 2011) for appointments beginning in July 2011. Five-year trend data by specialty are presented in graphs on numbers of programs, positions, and applicants as well as match rates. Numbers of positions offered and filled for each participating program are listed at the end of this report.

The 2011 report includes two new specialties, Developmental and Behavioral Pediatrics and Medical Genetics.

The 2011 appointment year was the largest in the history of the SMS. The matches included:

- 2,753 programs within 40 SMS specialties offering 6,276 fellowship positions
- Of those positions, 5,590 (89.1%) were filled

- Of the 2,753 participating programs, 2,243 (81.5%) filled all their positions
- 7,774 applicants participated in at least one of the fellowship matches and 5,590 (71.9%) obtained a match

Numbers of applicants, matched applicants, positions, and programs offering positions between 1993 and 2011 are shown in Figure 2 below.

Questions regarding the NRMP's Specialties Matching Service should be directed in writing to:

Mona M. Signer, Executive Director
National Resident Matching Program
2450 N Street NW
Washington, DC 20037-1127
nrmp@aamc.org

Figure 2 Numbers of Applicants and Programs Participating in the Specialties Matching Service (SMS) by Appointment Year, 1993-2011

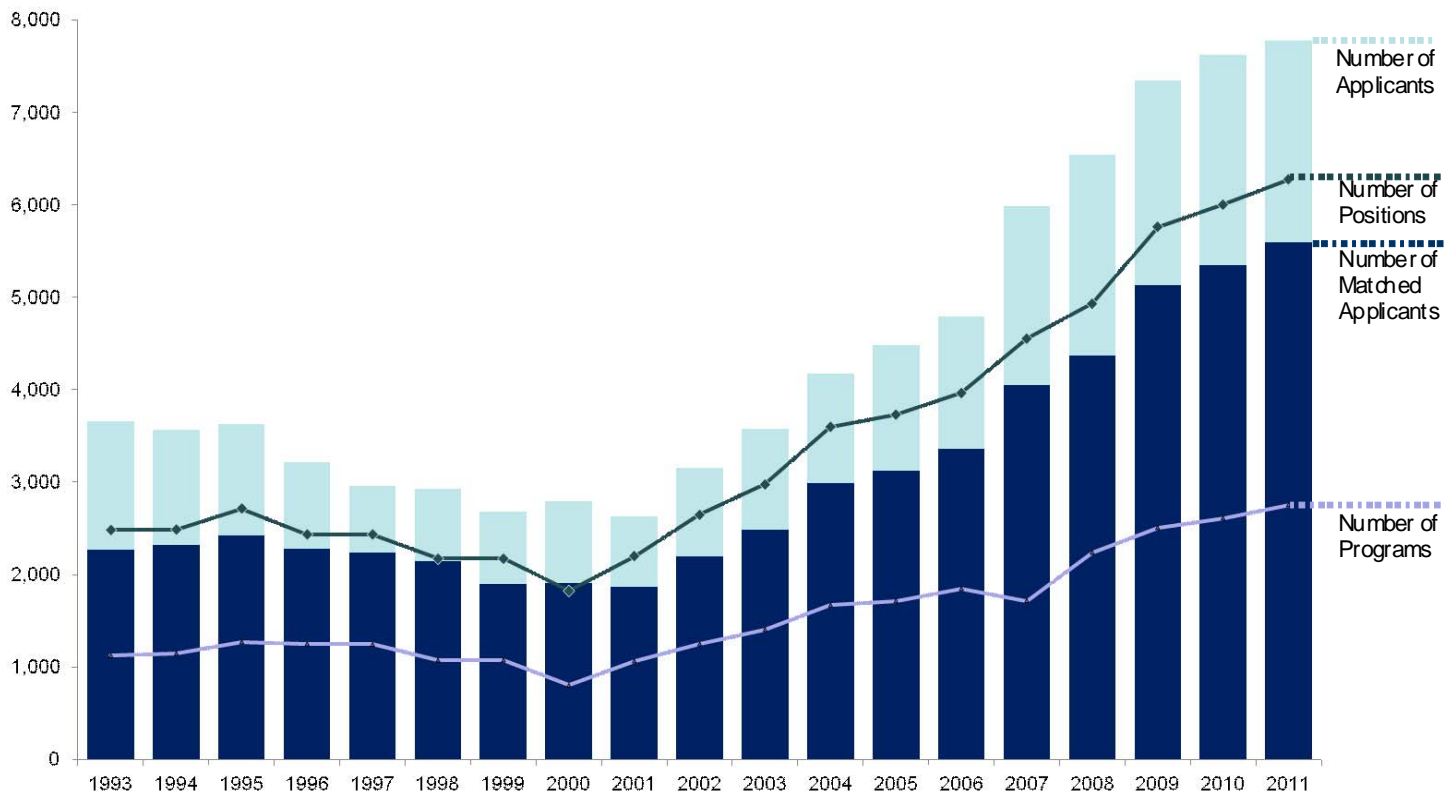

Table 1

Table 1 provides a summary of the SMS fellowship matches for appointment year 2011.

Using Allergy and Immunology as an example:

- The first two columns (“No. of Applicants”) show that 107 U.S. allopathic medical school graduates and 160 total applicants ranked at least one Allergy and Immunology program.
- The next two columns (“Positions Offered” and “No. of Programs”) show that a total of 125 positions were offered in this specialty by 79 programs.
- The “No. of Matches” columns show that, of the 125 positions offered in Allergy and Immunology, 86 were filled by U.S. allopathic graduates alone, while 112 were filled overall.
- The percent of positions filled (calculated as “No. of Matches” divided by “Positions Offered”) can be found in the “% Filled” columns. Of the fellowship positions offered in Allergy and Immunology, 68.8 percent were filled by U.S. allopathic graduates alone and 89.6 percent were filled overall.
- The “Ranked Positions” columns show that the 79 Allergy and Immunology programs were ranked 664 times by U.S. allopathic graduates and 929 times by all applicants (including U.S. allopathic graduates).
- The last column (“Unfilled Programs”) indicates that 13 Allergy and Immunology programs had at least 1 unfilled position after the Match.

Of the 40 participating specialties, 22 filled more than 90 percent of the positions offered and 6 filled less than 75 percent of the positions offered. Five specialties filled 75 percent or more of the positions offered with graduates of U.S. allopathic medical schools and 18 specialties filled 50 percent or less of their positions offered with U.S. allopathic graduates.

*Specialties are grouped by Residency Review Committees (RRCs). Some specialties are under the auspices of multiple RRCs and some specialties (or programs within a specialty) are not accredited by the ACGME. In those cases the fellowship programs are grouped under the RRC with the preponderance of programs (for multiple RRCs) or the RRC that would have responsibility for the programs if accredited.

**Non ACGME accredited.

+Applicants can rank multiple specialties within the combined specialties matches. In addition, a small number of applicants participate in more than one fellowship match within a single appointment year.

++Graduates of U.S. allopathic medical schools.

Footnotes on opposite page.

Table 2

Table 2 shows the number and percent of matches in each specialty by applicant type. Of the specialties offering at least 30 positions:

- Hand Surgery had the highest proportion filled with *U.S. allopathic graduates* (89.6%) and Nephrology had the lowest (26.7%). The specialties that filled 80 percent or more of their positions with graduates of U.S. allopathic medical schools are Hand Surgery (89.6%), Pediatric Surgery (86.4%), and Maternal-Fetal Medicine (82.0%).
- The top five specialties in terms of percentage of positions matched to *osteopathic graduates* are Primary Care Sports Medicine (24.5%), Oncology (12.1%), Child and Adolescent Psychiatry (11.0%), Surgical Critical Care (8.8%), and Pediatric Emergency Medicine (8.7%).
- The top five specialties in terms of percentage of positions matched to *Canadian graduates* are Female Pelvic Medicine and Reconstructive Surgery (5.0%), Neuroradiology (4.5%), Pediatric Surgery (4.5%), Hand Surgery (3.7%), and Oncology (3.0%).
- The top five specialties in terms of percentage of positions matched to *U.S. international medical school graduates* are Medical Genetics (20.0%), Developmental and Behavioral Pediatrics (16.0%), Primary Care Sports Medicine (13.9%), Pulmonology Disease and Critical Care Medicine (13.6%), and Child and Adolescent Psychiatry (13.5%).
- The top five specialties in terms of percentage of positions matched to *Non-U.S. international medical school graduates* are Nephrology (55.7%), Abdominal Transplant Surgery (52.5%), Pediatric Nephrology (48.3%), Oncology (45.5%), and Endocrinology, Diabetes, and Metabolism (36.7%).

*Specialties are grouped by Residency Review Committees (RRCs). Some specialties are under the auspices of multiple RRCs and some specialties (or programs within a specialty) are not accredited by the ACGME. In those cases the fellowship programs are grouped under the RRC with the preponderance of programs (for multiple RRCs) or the RRC that would have responsibility for the programs if accredited.

**Non ACGME accredited.

Table 3

The ratios of fellowship positions to active applicants from 2007 through 2011 are provided in Table 3 and shown graphically in Figure 3. Active applicants are defined as those who submitted certified rank order lists of programs. The red line in Figure 3 indicates the point at which there are equal numbers of positions and applicants.

- The number of fellowship positions per *active U.S. allopathic graduate* assumed an upward trend starting in 2008, reaching 1.63 positions per active U.S. allopathic graduate in 2011. Across all five years, there were more fellowship positions offered than there were U.S. allopathic graduate applicants.
- The ratio of fellowship positions to *all active applicants* also experienced a slight but steady increase between 2008 and 2011, up from 0.75 positions per applicant to 0.81 positions per applicant.

Table 3 Number of Positions per Active Applicant, 2007 - 2011

Year	Number of Positions	Active Applicants		Positions Per Active Applicant	
		U.S. Graduates*	All	U.S. Graduates*	All
2007	4,573	3,207	5,985	1.43	0.76
2008	4,931	3,507	6,543	1.41	0.75
2009	5,763	3,752	7,344	1.54	0.78
2010	6,002	3,866	7,627	1.55	0.79
2011	6,276	3,848	7,774	1.63	0.81

Note: Applicants who withdrew or did not rank programs are excluded.
 *Graduates of U.S. allopathic medical schools

Figure 3 Positions per All Active and Active U.S. Allopathic Graduate Applicants, 2006-2010

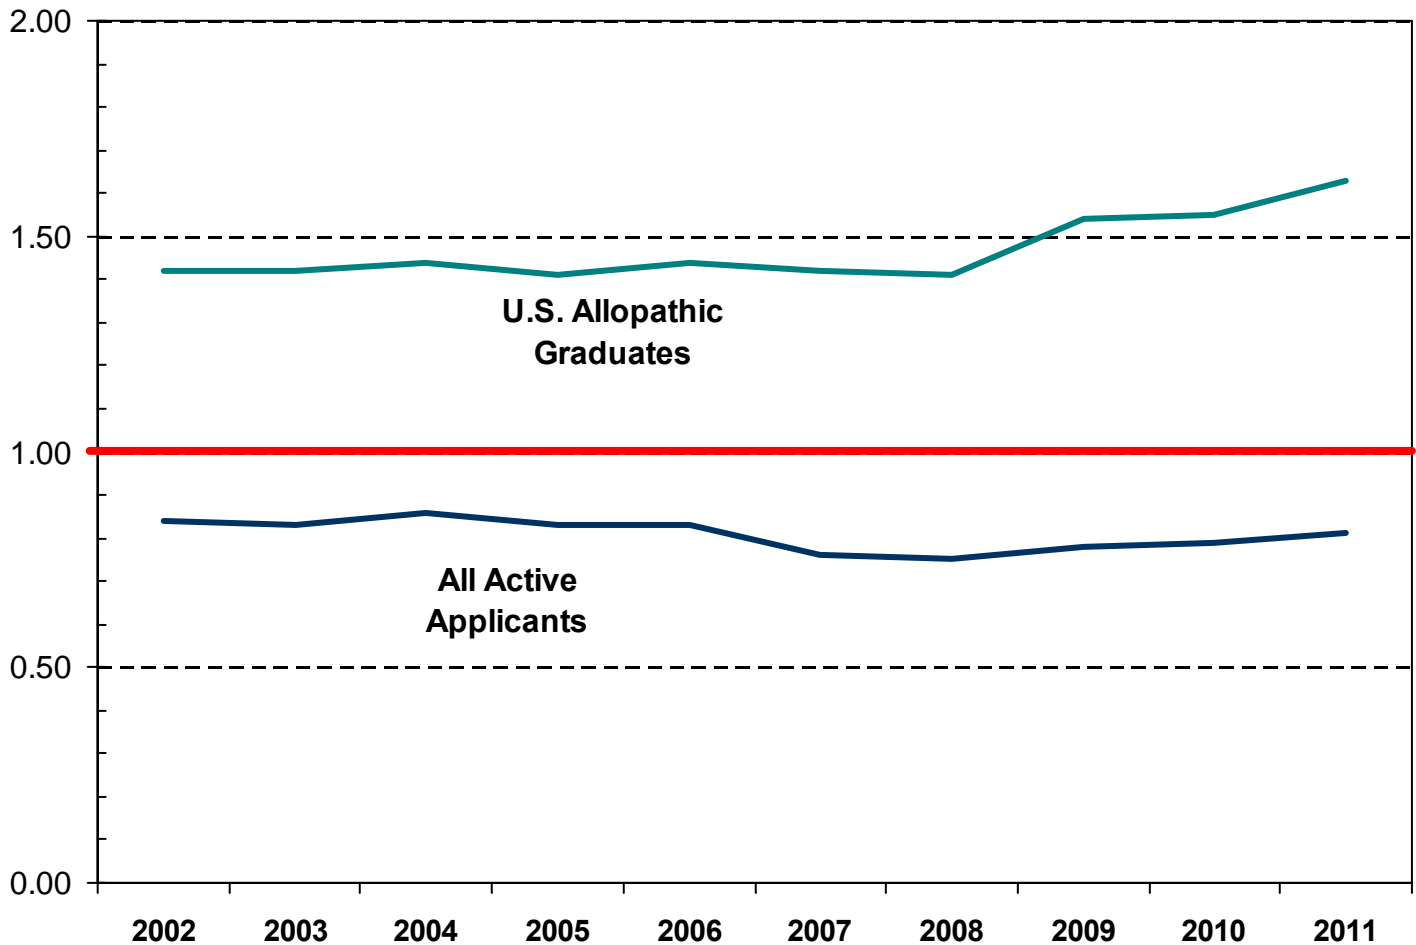

Table 4

Table 4 provides a summary of the participants in the SMS fellowship matches between 2007 and 2011 by applicant type.

Applicants are grouped based on citizenship and medical school of graduation. For example, *U.S. allopathic graduates* are prior graduates of U.S. allopathic medical schools. *U.S. international graduates* are defined as U.S. citizens who are graduates of international medical schools, and *non-U.S. international graduates* are non-U.S. citizen graduates of international medical schools.

The total number of registrants for the 2011 appointment year was 8,338, a small increase over 8,311 in 2010. For the first time in many years, the number of graduates of U.S. allopathic medical schools declined from 4,076 in 2010 to 4,043 in 2011, as did the number of non-U.S. citizen graduates of international medical schools (from 2,783 in 2010 to 2,698 in 2011). On the other hand, graduates of osteopathic medical schools and U.S. citizen graduates of international medical schools showed a steady growth between 2007 and 2011.

An *active applicant* is one who submits a certified rank order list of programs. Between 2007 and 2011, the number of active applicants rose for all applicant types except graduates of Canadian medical schools and graduates of Fifth Pathway programs. Active applicant groups that increased faster than the overall rate of 29.9 percent between 2007 and 2011 are identified in Table 4 with green arrows.

The trends in the numbers of active applicants and their match rates can be seen graphically in Figures 4.

▲ Denotes that the percentage increase in active applicants for this group was greater than the overall increase of 29.9% for all active applicants between 2007 and 2011.

Figure 4

Number of Active Applicants and Percent Matched, 2007 - 2011

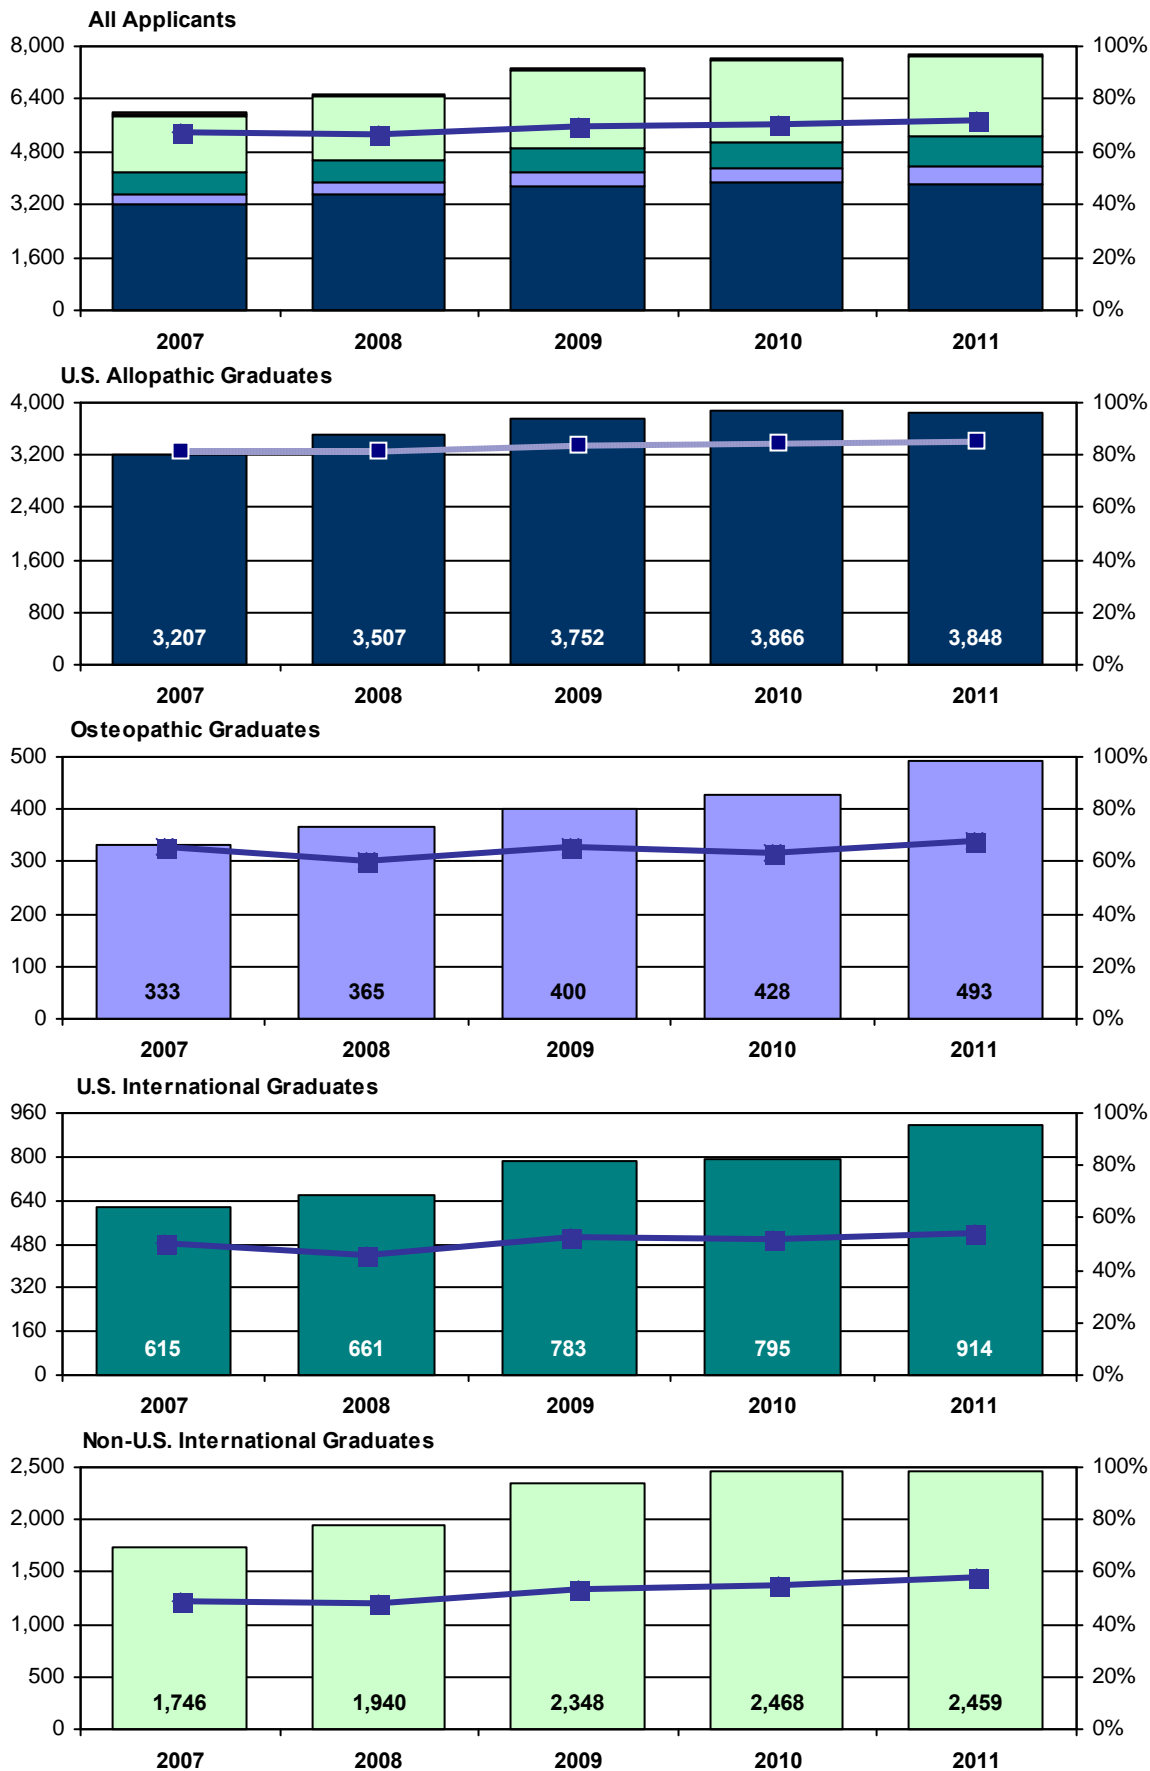

Table 5

Table 5 displays fellowship match results by specialty and applicant choice. Applicant choice is determined by the placement of programs on applicants' rank order lists.

For single specialty matches (top half of table), the data presentation and interpretation are straightforward. For multiple specialty matches (bottom half of table) they are slightly more complicated.

Single Specialty Matches

Using Allergy and Immunology as an example, 112 of 160 applicants matched. Of the 160 applicants, 41.9 percent matched to the program that was listed first on their rank order list, 11.9 percent matched to their second choice, 5.6 percent to their 3rd choice, and 10.6 percent to a choice lower on their list. Forty-eight applicants in the Allergy and Immunology Fellowship Match did not match, representing 30.0 percent of the total.

Combined Specialties Matches

To count unique applicants for the combined specialty matches, each applicant is included in the counts for the specialty ranked first on the rank order list (preferred specialty). Because applicants can match to other specialties within the same match, "Matched in Another Specialty" data also are provided.

For example, Cardiovascular Disease participates with ten other specialties in the Medical Specialties Matching Program (MSMP). Of the 1,119 applicants who ranked Cardiovascular Disease, 1,108 ranked it first. Overall, 719 applicants matched to Cardiovascular Disease, and 718 of the applicants who preferred the specialty matched.

Of the 1,119 applicants who ranked Cardiovascular Disease, 38.3 percent matched to the program that was listed first on the rank order list, 10.5 percent matched to the second choice, 5.5 percent to the 3rd choice, 9.8 percent to a choice lower on their list, and 1.0 percent matched to another within the MSMP.

Of the 1,119 applicants who ranked Cardiovascular Disease, 389 applicants failed to match, representing 34.8 percent of the total number of applicants.

*Specialties are grouped by Residency Review Committees (RRCs). Some specialties are under the auspices of multiple RRCs and some specialties (or programs within a specialty) are not accredited by the ACGME. In those cases the fellowship programs are grouped under the RRC with the preponderance of programs (for multiple RRCs) or the RRC that would have responsibility for the programs if accredited.

**Non ACGME accredited.

+Applicants can rank multiple specialties within the combined specialties matches.

Footnotes on opposite page.

Table 6

Table 6 displays trends between 2007 and 2011 in the numbers of positions offered by specialty, as well as the percent filled by U.S. allopathic medical school graduates and by all applicants. To provide a complete picture, the table includes all specialties that participated during the five-year period regardless of when they joined and whether they remained in the SMS. The data in Table 6 are calculated as a percentage of positions filled by applicant type, whereas the data in Table 2 are calculated as a percentage of matches by applicant type.

A graphical summary of the five year trends for each specialty listed in Table 5 can be found on the following pages.

*Specialties are grouped by Residency Review Committees (RRCs). Some specialties are under the auspices of multiple RRCs and some specialties (or programs within a specialty) are not accredited by the ACGME. In those cases the fellowship programs are grouped under the RRC with the preponderance of programs (for multiple RRCs) or the RRC that would have responsibility for the programs if accredited.

**Non ACGME accredited.

Specialties Matching Service: Program Results for 2011 Appointments

This section of the report lists every hospital that participated in the SMS, along with the number of positions offered and filled for each of the institution's programs.

Hospitals are arranged alphabetically within state. The listing includes the hospital name (abbreviated in some instances); the program code, which identifies each program; the quota (the number of positions offered by the program); and the number of applicants matched with that program.

There are three reasons why a program that ranked an adequate number of applicants did not fill its quota: (1) the applicants preferred other programs having vacancies; (2) the applicants did not rank the program; or (3) the applicants had withdrawn from the Match. There are also three reasons why applicants may not be matched with their most preferred program: (1) the program was filled with applicants it preferred; (2) the program did not rank the applicant; or (3) the program had withdrawn from the match.

NRMP Program Code Structure

The NRMP program code is a **9-character** code based on the following criteria.

- The first four characters are the Institution Code.
- The fifth through the seventh characters represent specialty code obtained from the first three digits of the program's ACGME Code and designates the specialty (see below).
- The eighth character represents the program type: F – Fellowship program
- The ninth character represents the track:
 - 0 – first program/track in the specialty and program type at the institution
 - 1 – second program/track in the same specialty and program type at the same institution (i.e. 34th Street Clinic)
 - 2 – third program/track in the same specialty and program type at the same institution (i.e. Rural Clinic).

ACGME SPECIALTY CODES

S02	Abdominal Transplant Surgery**	427	Interventional Radiology	328	Pediatric Nephrology
