NRMP Specialties Matching Service: Program Results for 2019 Appointments	95

About the Specialties Matching Service®

The National Resident Matching Program (NRMP) is a private, not-for-profit corporation established in 1952 to optimize the rank-ordered choices of applicants and graduate medical education program directors. The NRMP is not an application processing service; rather, it provides an impartial venue for matching applicants' and program directors' preferences for each other.

The NRMP Specialties Matching Service® (SMS®) conducts Matches for advanced residency and fellowship positions. The first Fellowship Match was conducted in 1984 for Colon and Rectal Surgery; for the 2019 appointment year the SMS provided services for 66 subspecialties in 23 separate Matches. Five new specialties joined the SMS for 2019 appointments: Adult Congenital Heart Disease and Clinical Cardiac Electrophysiology in the Medical Specialties Matching Program, which continues to be the largest Fellowship Match with 17 subspecialties; Academic General Pediatrics in the Pediatric Specialties Fall Match; and Clinical Ultrasound and Emergency Medical Services in a new Emergency Medicine Match that also includes Medical Toxicology. Pediatric Cardiology and Pediatric Hematology/Oncology, the last two subspecialties in the Pediatric Specialties Spring Match, joined the Pediatric Specialties Fall Match, making it the second largest Fellowship Match with 15 subspecialties. After three years of participation, Headache Medicine and Obstetric Anesthesiology withdrew from the SMS for the 2019 appointment year.

A complete list of the subspecialties participating in the SMS for the 2019 appointment year is shown in Figure 1.

Fellowship Matches occur throughout the year, and each requires its own registration process with the NRMP. Fellowship positions generally begin in July. Because Fellowship Match appointments may begin anywhere from 6 to 14 months after their Match Days, data are reported for the appointment year instead of the Match year.

Introduction

This report summarizes all Fellowship Matches conducted by the NRMP Specialties Matching Service® (SMS®). Data are reported for Matches conducted in 2018 and early 2019 for appointments beginning in July 2019. Graphs display five-year trend data by specialty for the numbers of programs, positions, and applicants as well as match rates. Numbers of positions offered and filled for each participating program are listed at the end of this report.

The 2019 report includes five new specialties: Clinical Ultrasound, Emergency Medical Services, Adult Congenital Heart Disease, Clinical Cardiac Electrophysiology, and Academic General Pediatrics.

The 2019 appointment year was the largest in the history of the SMS. The Matches encompassed:

- 4,750 programs in 66 subspecialties offering 10,936 fellowship positions; of those, 9,378 (85.8%) were filled

- Of the 4,750 participating programs, 3,666 (77.2%) filled all positions when the matching algorithm was processed

- 11,467 applicants participated in at least one Fellowship Match and 9,378 (81.8%) obtained positions

Numbers of applicants, matched applicants, positions, and programs offering positions between 1993 and 2019 are shown in Figure 2 below.

Table 1

Table 1 provides a summary of the SMS® Fellowship Matches for appointment year 2019.

Using Allergy and Immunology as an example:

- The first two columns (“No. of Applicants”) show that 117 U.S. allopathic medical school graduates and 172 total applicants ranked at least one Allergy and Immunology program.
- The next two columns (“Positions Offered” and “No. of Pgms”) show that a total of 137 positions were offered by 89 Allergy and Immunology programs.
- The “No. of Matches” columns show that of the 137 positions offered in Allergy and Immunology, 98 were filled by U.S. allopathic graduates, and 133 were filled overall.
- The percent of positions filled (calculated as “No. of Matches” divided by “Positions Offered”) can be found in the “% Filled” columns. Of the fellowship positions offered in Allergy and Immunology, 71.5 percent were filled by U.S. allopathic graduates and 97.1 percent were filled overall.
- The “Ranked Positions” columns show that the 89 Allergy and Immunology programs were ranked 932 times by U.S. allopathic graduates and 1,289 times by all applicants (including U.S. allopathic graduates).
- The last column (“Unfilled Programs”) indicates that 4 Allergy and Immunology programs had at least 1 unfilled position after the matching algorithm had been processed.

Of the 66 participating subspecialties, 32 filled 90 percent or more and 20 filled less than 75 percent of the positions offered. Eight subspecialties filled 75 percent or more and 28 filled less than 50 percent of their positions with graduates of U.S. allopathic medical schools.

Some specialties are under the auspices of multiple RCs, and some specialties (or programs within a specialty) are not accredited by the ACGME. In those cases, the fellowship programs are grouped under one RC deemed appropriate. For 2019 appointments, the grouped specialties and their RCs are:

- Brain Injury Medicine: Neurology and Physical Medicine & Rehabilitation; also includes programs not accredited by the ACGME
- Female Pelvic Medicine and Reconstructive Surgery: Urology and OB/GYN

+ Applicants can rank multiple specialties within the combined specialties Matches; in addition, a small number of applicants participate in more than one Fellowship Match within a single appointment year, but they cannot match to concurrent year positions.

++ Graduates of U.S. allopathic medical schools

Table 2

Table 2 shows the number and percent of matches in each specialty by applicant type. Of the specialties offering at least 30 positions:

- Hand Surgery had the highest proportion filled by graduates of U.S. allopathic medical schools (92.1%) and Nephrology had the lowest (27.5%). The top five specialties in the percentage of positions filled by graduates of U.S. allopathic medical schools are Hand Surgery (92.1%), Gynecologic Oncology (89.7%), Reproductive Endocrinology (88.5%), Female Pelvic Medicine and Reconstructive Surgery (87.9%), and Pediatric Surgery (86.4 %).
- The top five specialties in the percentage of positions filled by graduates of osteopathic medical schools are Spinal Cord Injury Medicine (36.8%), Sports Medicine (35.1%), Pediatric Infectious Disease (21.6%), Pediatric Pulmonology (20.0%), and Medical Toxicology (19.4%).
- The top five specialties in the percentage of positions filled by U.S. citizen graduates of international medical schools are Sleep Medicine (21.1%), Nephrology (20.3%), Geriatric Medicine (19.2%), Consultation-Liaison Psychiatry (18.3%), and Endocrinology, Diabetes, and Metabolism (18.0%).
- The top five specialties in the percentage of positions filled by Non-U.S. citizen graduates of international medical schools are Interventional Pulmonology (40.0%), Nephrology (39.2%), Clinical Cardiac Electrophysiology (38.3%), Endocrinology, Diabetes, and Metabolism (35.0%), and Vascular Neurology (34.0%).

Table 3

The ratios of fellowship positions to active applicants are provided in Table 3 for appointment years 2015 through 2019 and are shown graphically in Figure 3 for appointment years between 2002 and 2019. Active applicants are defined as those who submit certified rank order lists of programs. The red line in Figure 3 indicates the point at which there are equal numbers of positions and applicants.

- The number of fellowship positions per *active U.S. allopathic graduate* was 1.74 in 2019, the highest on record. Across all years, there were more fellowship positions offered than there were U.S. allopathic graduate applicants.
- The ratio of fellowship positions to *all active applicants* was 0.95 for the 2019 appointment year, also the highest on record.

Table 4

Table 4 displays applicants by applicant type in the SMS® Fellowship Matches between 2015 and 2019.

Applicants are grouped based on citizenship and medical school of graduation. For example, *graduates of U.S. allopathic medical schools* are graduates of U.S. allopathic medical schools regardless of citizenship. *U.S. citizen graduates of international medical schools* are defined as U.S. citizens who are graduates of international medical schools, and *non-U.S. citizen graduates of international medical schools* are non-U.S. citizen graduates of international medical schools.

The total number of registrants for the 2019 appointment year was 11,897, an increase of 667 over 2018. Over 70 percent of the increase was due to higher numbers of U.S. allopathic medical school graduates (285) and graduates of osteopathic medical schools (200). There also were increases in the numbers of U.S. citizen graduates of international medical schools (137) and non-U.S. citizen graduates of international medical schools (43).

An *active applicant* is one who submits a certified rank order list of programs. Between 2015 and 2019, the number of active applicants rose 20.2 percent from 9,538 to 11,467. Among the different applicant groups, graduates of U.S. allopathic medical schools had the largest increase in number (1,129) and graduates of osteopathic medical schools had the largest percentage increase (57.8%). Compared with 2018, the total number of active applicants increased by 689 (6.4%), attributable to higher numbers of graduates of U.S. allopathic medical schools (299 or 5.0%), graduates of osteopathic medical schools (210 or 19.1%), U.S. citizen graduates of international medical schools (132 or 10.0%), and non-U.S. citizen graduates of international medical schools (52 or 2.3%).

For 2019 appointments, 81.8 percent of all active applicants matched to a fellowship position. Among different applicant groups, graduates of U.S. allopathic medical schools enjoyed the highest match rate (89.4%). Graduates of osteopathic medical schools had a match rate of 78.9 percent, a 2.1 percentage point increase over 2018. The match rate for non-U.S. citizen graduates of international medical schools was 71.4 percent, the highest on record. U.S. citizen graduates of international medical schools enjoyed their second-highest match rate on record, 68.5 percent.

The trends in the numbers of active applicants and their match rates are shown graphically in Figure 4.

Table 5

Table 5 displays Fellowship Match results by specialty and applicants' preferred choices. *Rank choice* is determined by the placement of programs on an applicant's rank order list. *Preferred specialty* is the specialty of the program ranked first on the applicant's rank order list.

For single-specialty Matches (top half of the table), the data presentation and interpretation are straightforward. For multi-specialty Matches (bottom half of table), they are more complicated.

Single-Specialty Matches

Using Laryngology as an example, 16 of 18 applicants matched. Of the 16 matched applicants, 10 (55.6%) matched to the program that was listed first on their rank order list, 5 (27.8%) matched to their second choice, and 1 (5.6%) to a choice lower than third. Two applicants in Laryngology did not match, representing 11.1 percent of the total.

Multi-Specialty Matches

To count unique applicants for the multi-specialty Matches, each applicant is included in the counts for the specialty ranked first on the rank order list (preferred specialty). Because applicants can match to another specialty within the same Match, "Matched in Another Specialty" data also are provided.

For example, Cardiovascular Disease participated with 16 other specialties in the Medical Specialties Matching Program (MSMP). Of the 1,315 applicants who ranked Cardiovascular Disease, 1,313 ranked it first. Overall, 944 applicants matched to Cardiovascular Disease, and all listed it as the preferred specialty.

Of the 1,315 applicants who ranked Cardiovascular Disease, 486 (37.0%) matched to the program that was listed first on the rank order list, 163 (12.4%) matched to the second choice, 107 (8.1%) to the third choice, 188 (14.3%) to a choice lower than third, and 12 (0.9%) matched to another specialty within the MSMP.

Of the 1,315 applicants who ranked Cardiovascular Disease, 359 (27.3%) failed to match.

* In most cases specialties are grouped by the ACGME Review Committees (RCs). Some specialties are under the auspices of multiple RCs and some specialties (or programs within a specialty) are not accredited by the ACGME. In those cases, the fellowship programs are grouped under one RC deemed appropriate. For 2019 appointments, the grouped specialties and their RCs are:

- Brain Injury Medicine: Neurology and Physical Medicine & Rehabilitation; also includes programs not accredited by the ACGME
- Female Pelvic Medicine and Reconstructive Surgery: Urology and OB/GYN
- Geriatric Medicine: Family Medicine and Internal Medicine
- Hand Surgery: Orthopaedic Surgery, Surgery, and Plastic Surgery
- Medical Toxicology: Emergency Medicine and Preventive Medicine
- Pediatric Emergency Medicine: Pediatrics and Emergency Medicine
- Pediatric Surgery: Surgery; also includes programs not accredited by the ACGME
- Sleep Medicine: Internal Medicine, Neurology, Pediatrics, and Psychiatry
- Sports Medicine: Emergency Medicine, Family Medicine, and Physical Medicine & Rehabilitation
- Surgical Oncology: Surgery; also includes programs not accredited by the ACGME

** Not accredited by the ACGME

+ Applicants can rank multiple specialties within the combined specialties Matches. In addition, a small number of applicants participate in more than one Fellowship Match within a single appointment year, but they cannot match to concurrent year positions.

Table 6

Table 6 displays data between 2015 and 2019 for the numbers of positions offered by specialty, as well as the percent filled by U.S. allopathic medical school graduates and by all applicants. To provide a complete picture, the table includes all specialties that participated during the five-year period regardless of when they joined and whether they remained in the SMS®. The data in Table 6 are calculated as a percentage of positions filled by applicant type, whereas the data in Table 2 are calculated as a percentage of matches by applicant type.

A graphical summary of the data for each specialty listed in Table 6 can be found on the following pages.

Specialties Matching Service®: Program Results for 2019 Appointments

This section of the report lists every hospital that participated in the SMS® along with the number of positions offered and filled for each of the institution's programs.

Hospitals are arranged alphabetically within state. The listing includes the hospital name (abbreviated in some instances); the program code, which identifies each program; the quota (the number of positions offered by the program); and the number of applicants matched with that program.

There are three reasons why a program that ranked an adequate number of applicants did not fill its quota: (1) the applicants preferred other programs; (2) the applicants did not rank the program; or (3) the applicants had withdrawn from the Match. There are also three reasons why applicants may not have matched with their most preferred program: (1) the program was filled with applicants it preferred; (2) the program did not rank the applicant; or (3) the program had withdrawn from the Match.

NRMP Program Code Structure

The NRMP program code is a **9-character** code based on the following criteria.

- The first four characters are the Institution Code.
- The fifth through the seventh characters represent specialty code obtained from the first three digits of the program's ACGME Code and designates the specialty (see below).
- The eighth character represents the program type: F - Fellowship program
- The ninth character represents the track:
 - 0 - first program/track in the specialty and program type at the institution
 - 1 - second program/track in the same specialty and program type at the same institution (i.e. 34th Street Clinic)
 - 2 - third program/track in the same specialty and program type at the same institution (i.e. Rural Clinic).
