NATIONAL RESIDENT MATCHING PROGRAM

INTRODUCTION

The National Resident Matching Program (NRMP) was established in 1952 to provide both applicants and residency program directors a fair opportunity to consider their options for appointment, to make reasoned decisions and to have their decisions announced at a uniform time. This brief introduction is followed by the year 2000 NRMP match results.

The first match was conducted in 1952 when 1100 internship positions were available for 6,000 U.S. graduating seniors. By 1973, there were 19,000 positions for just over 10,000 U.S. graduating seniors. Following the demise of internships in 1975, the number of first year post-graduate (PGY-1) positions dropped to 16,000. The number of PGY-1 positions gradually increased to a high of 20,772 in the 1994 Match. This year, 20,598 positions were offered (Figure 1). The increase in the number of applicants since 1952 is more dramatic going from 6,000 in 1952 to a high of 36,056 in 1999.

The NRMP is managed by Association of American Medical Colleges (AAMC). NRMP operations are conducted in the AAMC's Division of Student Affairs and Education Services, Section for Student Services.

In 1999 the NRMP moved two major functions of the Match to the Web. The submission of Rank Order Lists on the Web replaced the old system that used computer disks and paper copies. Applicants and program directors entered their choices on the Web and submitted their lists to the NRMP electronically. Additionally, the results of the Match were posted to the Web for simultaneous release to various constituent groups. Users are required to enter an NRMP code and password to gain access to Match information.

Beginning in 2000, with the release of Match information now on the Web, the NRMP has combined the Results Book and Data Book published for previous matches into one document. You will find the Match Outcome for All Programs in the Appendix. NRMP no longer releases the Unfilled Programs List to the general public. Rather, it was posted to the Web during Match Week for use by participants. Table 14 "Couples in the Match" is a new addition this year.

Special data requests, pertaining to this or prior matches, should be directed in writing to:

TABLES 1 AND 2

The 2000 Match can be characterized as a success, with improvements in fill rates and match rates almost across the board. Tables 1 and 2 illustrate the trends in the number of positions and the number of applicants participating in the Match during the past seven years. Many applicants, in addition to U.S. senior medical students, seek residency positions through the NRMP. The data for different categories of applicants are shown in Table 2. U.S. Foreign Graduates are defined as U.S. citizen graduates of foreign medical schools, and Non-U. S. Foreign Graduates are Non-U.S. citizen graduates of foreign medical schools.

The number of teaching hospitals participating in the 2000 Match was virtually unchanged over recent years with 701 registered with the Match. However, the number of PGY-1 positions offered in the Match increased by 145. The increase was spread evenly among the medical specialties as shown in Table 1. The number of PGY-2 positions was stable with 7 fewer positions offered in 2000 compared with 1999.

The most significant change in the 2000 Match is the number of applicants registered for the Match declined by 2528 (7.0%). The decline in the number of non-US foreign graduates was even more dramatic dropping by 3,146 (22.5%) over 1999, the first decline in 10 years (Figure 3). This decline reversed a three-year trend of foreign-trained graduates exceeding the number of US trained graduates in the Match.

Two categories of registrants experienced notable increases in registrations: 214 (+14.7%) more osteopathic graduates and 597 (+20.9%) more US foreign graduates registered for the 2000 Match than the 1999 Match.

A comparison of 1999 and 2000 Match data shows that the drop in foreign-trained registrants was almost exclusively in first-time registrants. In 1999, 8398 Educational Commission for Foreign Medical Graduates (ECFMG) certified registrants participated in the Match for the first time, and this year there were only 5741 first-time registrants who were ECFMG certified. The decrease in the number of non-US foreign graduates followed shortly after the ECFMG required the successful completion of the Clinical Skills Assessment (CSA) examination for certification. Foreign medical graduates certified by ECFMG prior to July 1, 1998 are not required to pass the CSA exam for certification.

The decline in registrants was also reflected in 1406 (5.3%) fewer applicants submitting a Rank Order List thereby actively participating in the matching process. But only 7 fewer applicants were matched to a PGY-1 position. With fewer active participants, the match rate for all applicants rose to 73.4%, the highest in five years (Figure 2).

In 2000, 25,056 individuals actively participated in the Match by submitting program choices, a decrease from the 26,462 that participated last year. Of the total, 18,391 or 69.5% were matched to a PGY-1 residency program. Eighty-nine percent of the positions available in the Match were filled, the same rate as in 1999.

In the 2000 Match, 93.9% of the 14,358 U. S. medical seniors who actively participated in the match received a first year position. This is virtually the same rate as 1999 (93.8%). Adding the 196 seniors who matched to a PGY-2 position but not a PGY-1 position, 95.3% of U.S. Seniors were matched to at least one position in the Match.

TABLE 3

The ratios of PGY-1 positions to active applicants from 1974 through 2000 are shown in Table 3.

- This year the ratio of PGY-1 positions *per active U.S. senior* remained constant at 1.4/1 for the sixth consecutive year. The ratio declined from 2.0/1 in 1972 to a low of 1.2/1 in 1985. Since then it has fluctuated between 1.3/1 and 1.5/1.
- The ratio of such positions to total applicants (rather than only U.S. Seniors) is quite different and again is 0.8/1 for the fifth straight year.

TABLE 3
PGY-1 POSITIONS FOR APPLICANTS ACTIVE IN THE MATCH

YEAR	NUMBER OF POSITIONS	ACTIVE U.S. SENIORS	POSITIONS PER U.S. SENIOR	ACTIVE TOTAL	POSITIONS PER ACTIVE TOTAL
1974	17,403	9,860	1.8	12,798	1.4
1975	15,691	10,802	1.5	14,153	1.1

1992	20,394	14,030	1.5	19,519	1.0
1993	20,598	14,094	1.5	20,916	1.0
1994	20,772	14,207	1.5	22,352	0.9
1995	20,751	14,621	1.4	22,936	0.9
1996	20,563	14,539	1.4	24,718	0.8
1997	20,209	14,614	1.4	26,323	0.8
1998	20,299	14,610	1.4	26,360	0.8
1999	20,453	14,607	1.4	26,462	0.8
2000	20,598	14,358	1.4	25,056	0.8

NOTE: Applicants who withdrew or did not rank programs are excluded.

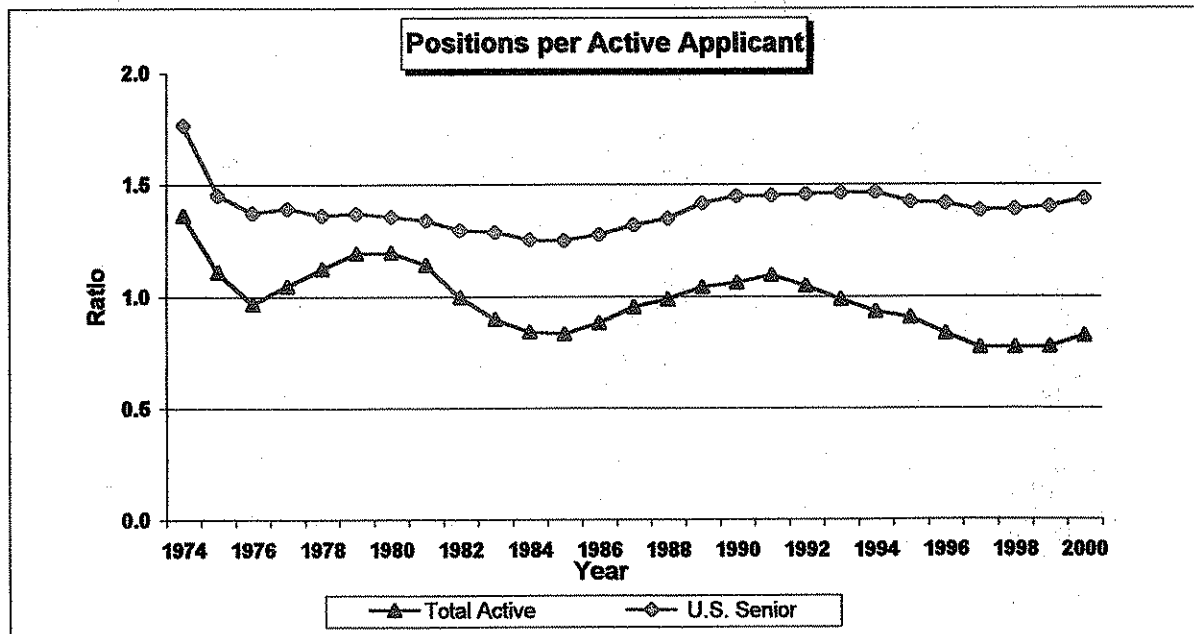

TABLE 4

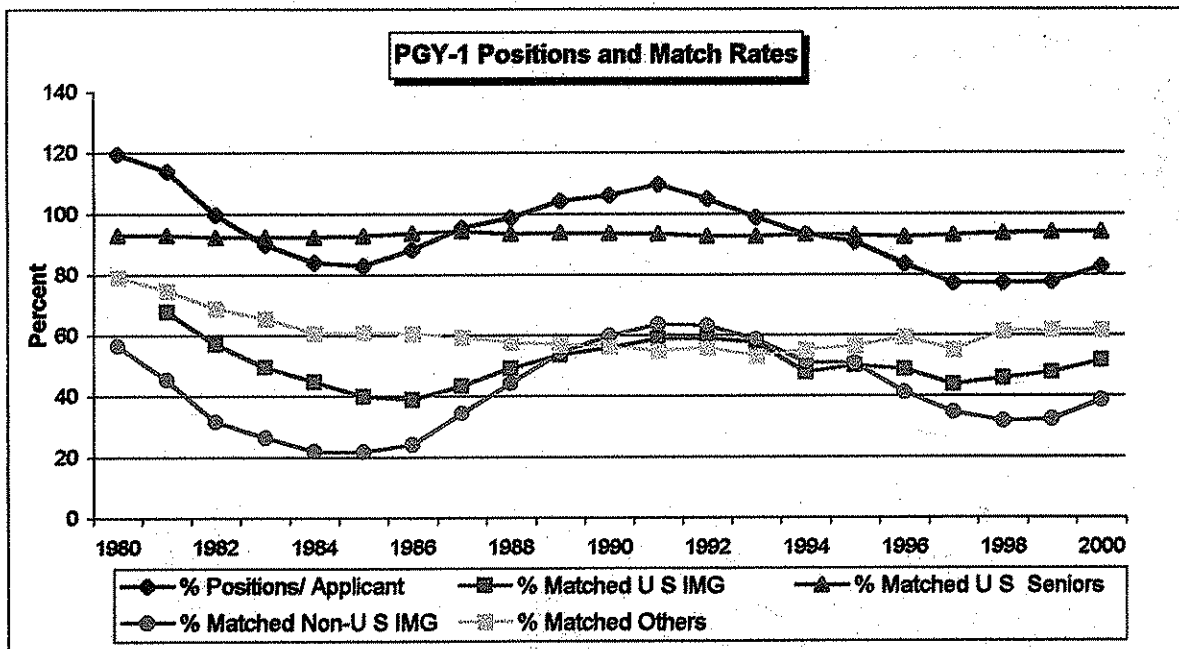

Table 4 shows the match rates to PGY-1 positions for U.S. Seniors, U.S. IMGs (U.S. citizens trained in foreign medical schools), non-U.S. IMGs (non-U.S. citizens trained in foreign medical schools), and Others (Canadian, Osteopathic, Fifth Pathway and U.S. physicians). Three of the four categories registered an increase in **match rates**, the percentage of active participants who received a match in the 2000 Match for PGY-1 programs. The fourth (Others) was unchanged.

- 93.9% of U.S. Seniors matched, highest since 1989.
- U.S. IMGs' match rate increased significantly by 3.9%, the third year of an increase after a general decline beginning in 1992.
- Canadian, Osteopathic, Fifth Pathway and U.S. physicians collectively matched at 61.3%, unchanged from 1999.
- The Non-U.S. IMGs had a big increase to 38.5%. (See Table 1 and 2 comments.)

TABLE 4
PGY-1 POSITIONS, ACTIVE APPLICANTS AND MATCH RATES

Year	Positions in NRMP	Total Active Applicants	% Positions/ Applicant	% Matched U S Seniors	% Matched Others	% Matched U S IMG	% Matched Non-U S IMG

1997	20,209	26,323	76.8	92.7	54.8	43.5	34.5
1998	20,299	26,360	77.0	93.5	60.8	45.5	31.4
1999	20,453	26,462	77.3	93.8	61.3	47.5	32.2
2000	20,598	25,056	82.2	93.9	61.3	51.4	38.5

NOTE: Prior to 1981 US citizen IMGs combined with Non-US citizens IMGs.

TABLES 5 AND 6

The numbers of positions offered in the Match by specialty, and the number filled by U.S. Seniors and by an aggregate of all applicants are depicted in Table 5. Table 6 displays the same information in percentages.

- For the second year, more than 20,000 matches were made to PGY-1 and PGY-2 positions in the Match, an increase of 102 over 1999.
- The **fill rate** for programs remained virtually unchanged in 2000, 89.2%, compared to 89.3% in 1999.
- The number of PGY-1 positions offered increased for the third year, with 145 more positions in the Match.
- PGY-2 advanced specialty programs, beginning in 2001, offered 7 fewer positions in the 2000 Match than last year.

Specialties of note are:

- Nine specialties and specialty tracks had 100% fill rates for their positions in the Match.
 - Dermatology C
 - Medicine-Emergency Medicine C
 - Pediatrics-Emergency Medicine C
 - Pediatrics-PM & R C
 - Psychiatry-Neurology C
 - Radiation Oncology C
 - Radiology-Diagnostic C
 - Dermatology S
 - Physical Medicine & Rehabilitation S
- Five specialties had over 90% of the offered positions filled by U.S. Seniors:
 - Dermatology C
 - Surgery-Plastic Surgery C
 - Medicine-Emergency Medicine C
 - Pediatrics-Emergency medicine C
 - Radiology-Diagnostic C
- Anesthesiology S programs filled 108 more positions than in 1999, a 26.9% increase and 37 (14.5%) more Anesthesiology C positions filled this year.

TABLES 7, 8 AND 9

The next three tables present the data on specialties for PGY-1 programs for three different groups: total applicants, U.S. Seniors, and foreign-trained physicians. Foreign-trained physicians are U.S. citizen and Non-U.S. citizen graduates of foreign medical schools but exclude Canadian, Osteopathic, and Fifth Pathway applicants.

GENERALIST SPECIALTIES

In 2000, 51.4% or 6,931 U.S. medical school seniors who were active applicants matched to a first-year residency position in one of the generalist specialties, a decrease of 2.9%. The generalist specialties are defined as:

- Family Practice,
- Internal Medicine, Internal Medicine-Pediatrics, Internal Medicine-Primary,
- Pediatrics, Pediatrics-Primary.

All six of these specialties have fewer U.S. Seniors matched in the 2000 Match than in 1999. However, all but one specialty, Pediatrics Primary, had an increase in the number of independent applicants matched.

- Nearly 25 percent of matched U.S. Seniors, or 3,419 individuals, will enter internal medicine, internal medicine-pediatrics, or internal medicine-primary residency programs, a decrease of 138 over last year. A total of 5,729 generalist residency positions were offered in internal medicine this year, of which U.S. Seniors filled 60 percent. Graduates of non-U.S. medical schools filled an additional 33 percent.
- Approximately 14 percent of matched U.S. Seniors, or 1,817 individuals, will enter family practice residency programs, a decrease of 198 from 1999. U.S. medical school seniors filled 57 percent of the 3,183 positions offered in family practice, and other applicants filled 24 percent.
- Nearly 13 percent of matched U.S. Seniors, or 1,695 individuals participating in the Match, will enter pediatrics and pediatrics-primary residency programs, a decrease of 110 from last year. Overall, pediatrics and pediatrics-primary programs filled 47 fewer positions.

Table 9 shows the number of foreign-trained physicians, graduates of medical schools outside of the United States and Canada, matched to PGY-1 positions by specialty. Of note is 39.3% of matched foreign-trained applicants who received positions in Internal Medicine. The next largest group is 12.9% who matched to Family Practice positions.

TABLE 10

There are two parts to this table. The first (on the left) shows the number of programs ranked by U.S. Seniors, and the second (on the right) reports the information for all applicants. For example, an applicant ranking ten programs would contribute a count of ten to the total. Very competitive specialties are likely to have higher ratios of numbers of ranks vs. numbers of positions, as applicants tend to rank more programs in those specialties.

The Ranked Positions column describes the total number of times a particular specialty was ranked. Using Anesthesiology C for Total Applicants as an example:

- The first two columns on the right show that 76 programs offered 349 Anesthesiology C positions in the Match.
- The Ranked Position Column shows that collectively all applicants ranked Anesthesiology C programs 2448 times.
- The next column (#Ranks/Positions) shows the ratio of the number of ranks to the number of positions was 7/1 (2448/349).
- The next two columns show that 292 of the 349 Anesthesiology positions offered were filled for a fill rate of 83.7 %.
- The last column indicates that 24 of the programs had unfilled positions after the Match.

TABLE 10

TABLE 11

Table 11 shows the program choices made by U.S. Seniors and Independent Applicants, both matched and unmatched, by specialty. Independent Applicants includes the following categories:

U.S. citizen graduates of foreign medical schools,
Non-U.S. citizen graduates of foreign medical schools,
Canadian applicants,
Osteopathic applicants,
Fifth Pathway applicants, and
Previous U.S. graduates.

Within each specialty the following categories of programs offering PGY-1 positions are included: categorical, preliminary, and primary programs. Thus an applicant who ranked Internal Medicine C and Internal Medicine Preliminary would be counted as having Internal Medicine as his/her only choice.

The table also shows the ratio of applicants choosing a specialty and the number of positions in that specialty. For example:

- 358 U.S. Seniors ranked at least one Dermatology program. With only 35 positions offered, the ratio of positions to U.S. senior applicants was 0.1/1, indicating a very competitive specialty for U.S. Seniors.
- On the other hand, 870 U.S. Seniors ranked a Transitional program and 1005 positions were offered. The ratio in this “specialty” is 1.2/1 (or 1005/870), indicating the supply exceeds the demand for this specialty.

While the ratios for U.S. Seniors and the total applicant pool are similar in many specialties, there are some notable exceptions. In two specialties, the ratios for U.S. students were significantly higher than for all applicants combined.

<i>Specialty</i>	<i>U.S. Ratios</i>	<i>Total Applicant Ratio</i>
Pathology	2.5	0.5
Psychiatry	1.7	0.5

NOTE: *Total applicants includes totals of both U.S. Seniors and Independent Applicants.

TABLE 12

Table 12 examines the 92.4% of the population of U.S. Seniors submitting a Rank Order List with only one type of specialty ranked. High unmatched rates for applicants, in such specialties as Dermatology (24.3%), Radiation Oncology (16.9%), Orthopaedic Surgery (14.3%), and Diagnostic Radiology (14.1%) reflect the fact that there are significantly more applicants interested in these specialties than there are positions in the specialty. This disparity is also reflected in the high fill rates (Table 6) of the four specialties which were 100%, 100.0%, 100.0%, and 99.5 % respectively.

Unmatched US Seniors Who Ranked Only One Specialty

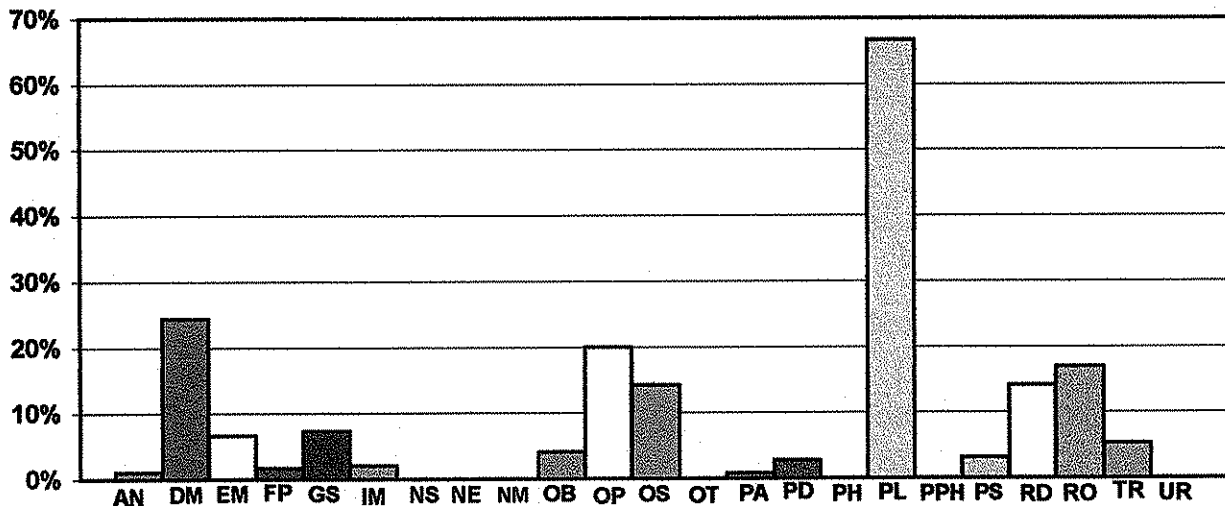

TABLE 13

Table 13 has undergone a major change. The new version shows the number of matches obtained by U.S. Seniors that were ranked by the students first, second, third, fourth, or fifth and lower. Of all the matches to first- and second-year programs, 86.7 percent were one of the first three choices of U.S. medical school seniors. The percent of matches to programs ranked among the top three choices is up slightly from 85.4 percent in 1999. Approximately, 62.3 percent were first choice matches, 15.3 percent were second choice, and 9.1 percent were third choice.

As indicated in the footnote on the table, previous versions combined matches and applicants unmatched to PGY-1 positions together to create the denominator for calculating percentages. The resulting percentages were misleading. Both PGY-1 and PGY-2 matches are included in the First Choice, Second Choice, etc. numbers. Thus applicants who matches to both types of programs have their choices counted twice. But applicants who got a PGY-1 or PGY-2 match, but had also ranked choices for the other type of program were only represented once for the match they received. Also unmatched applicants were counted once although they may have ranked choices for both PGY-1 and PGY-2 programs.

Note: Beginning in 1991, Table 13 includes PGY-2 positions in addition to PGY-1.

TABLE 13

**RANK NUMBER OBTAINED FOR PGY-1 AND PGY-2 MATCHES
U.S. MEDICAL SCHOOL SENIORS 1988 - 2000**

YEAR	FIRST CHOICE	PERCENT MATCHES	SECOND CHOICE	PERCENT MATCHES	THIRD CHOICE	PERCENT MATCHES	FOURTH CHOICE	PERCENT MATCHES	>FOURTH CHOICE	PERCENT MATCHES	TOTAL # MATCHES

1999	9,175	60.9	2,361	15.7	1,320	8.8	826	5.5	1,396	9.3	15,078
2000	9,303	62.3	2,285	15.3	1,291	8.6	706	4.7	1,354	9.1	14,939

NOTES: -Prior to 1991 only PGY-1 positions included in statistics

-This is a new version of Table 13 excluding unmatched applicants as a category. Previous versions combined matches and applicants in the denominator resulting in percentages that were misleading. This data only refers to matches obtained.

% of Matches by Rank Number

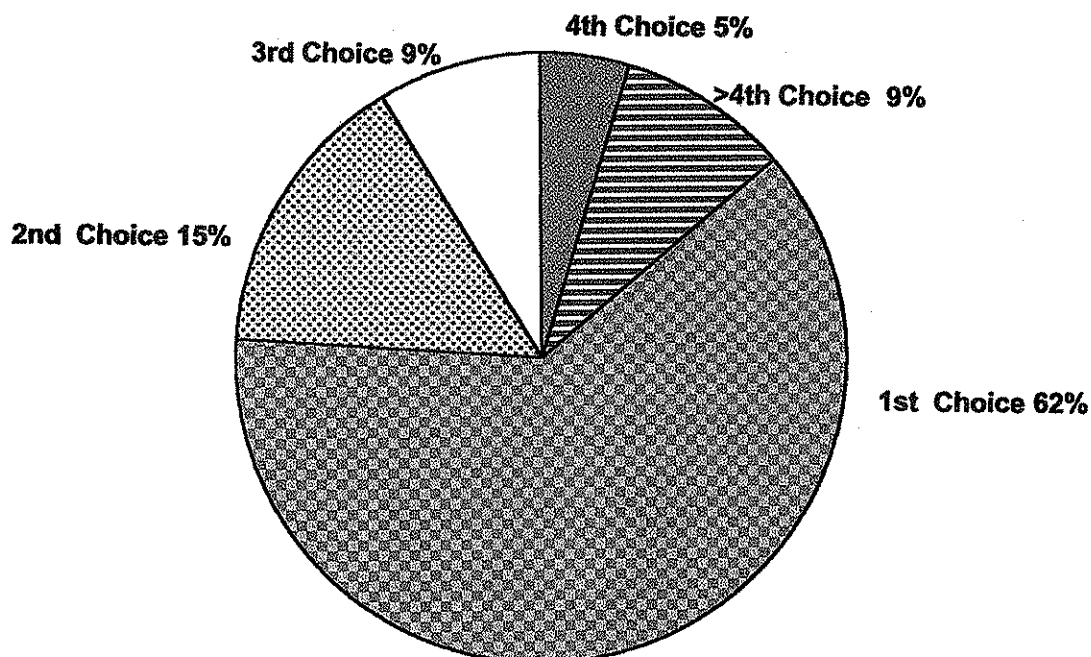

TABLE 14

This is a new table. Couples have been able to participate together in the NRMP Match since 1984. The two partners identify themselves as a couple to NRMP and submit Rank Order Lists of identical length. The algorithm treats the two lists as a unit, matching the couple to the highest linked program choices where both partners match to the programs listed.

Couples enjoy great success in the Match with match rates over 90% every year since 1984, and in 2000 matching at 95.3%. The vast majority of couples are U.S. Seniors, and their match rates are very similar to their classmates, varying within 1 or 2% points each year.

Since 1990 couples have the option of one partner indicating as a choice on his/her rank order list the willingness to go unmatched if his/her partner matches to the linked program choice. Table 14 shows the number of couples matched with this option in the *One Matched* column.

TABLE 14
COUPLES IN THE MATCH
From 1984 To 2000

Year	Couples	Individuals	Both Matched	One Matched	Neither Matched	Match Rate %
1984	406	812	374		32	92.1

2000	508	1016	475	18	15	95.3

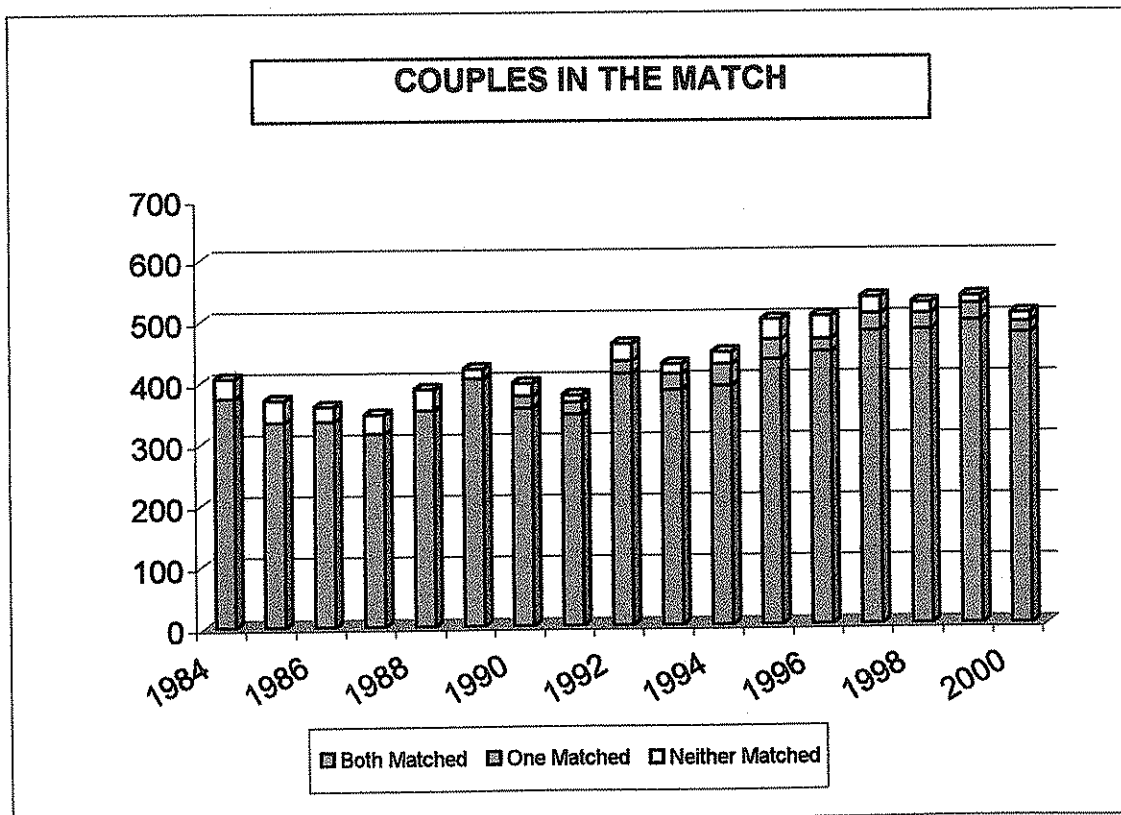

TABLE 15

Table 15 shows the matches made by specialty and by geographic breakdown by state. It reflects only PGY-1 positions and is restricted to those specialties or sub-specialties that had 30 or more positions offered in the Match. It further displays the information by applicant category, and at the end of each specialty table gives a total summary for the specialty.

An index to the headings follows:

ST	state abbreviation
POS	positions offered
US SR	U.S. Seniors
US MD	Previous U.S. graduates
5th PA	Fifth Pathway students
US FMG	U.S. citizen graduates of foreign medical schools
OST	Osteopathic students
CAN	Canadian students
NUS FMG	Non-U.S. citizen graduates of foreign medical schools
% USS	% of positions filled by U.S. Seniors
% Total	% of positions filled by all applicants

NRMP PROGRAM RESULTS 2000 MATCH

NRMP Program Results lists every hospital that participated in the Match and the number of candidates requested and the number matched for each hospital program.

Hospitals are arranged alphabetically by city within state. The listing includes the hospital name (abbreviated in some instances), a six-digit NRMP code, which identifies each program, the quota (the number of positions offered by the program), and the number of applicants matched with that program.

A plus sign, (+), indicates a program did not fill but reverted (donated) one or more of its unfilled positions to another program.

The following types of programs are offered through the NRMP:

- Categorical (C) positions are positions in programs that expect applicants who enter in their first post graduate year to complete the training required for certification in that specialty, provided their performance is satisfactory.
- Preliminary (P) positions are for one or two years of training as prerequisite for entering advanced positions in specialty programs that require one or more years of broad clinical training. Internal medicine, surgery, and transitional programs commonly offer preliminary positions.
- Advanced (S) positions (to begin in 2001) are positions in specialty programs that begin after completion of one or more years of preliminary training. Applicants without prior graduate medical education can apply for these positions while also applying for preliminary positions (to begin in 2000) that are compatible with their plans.
- Physician (R) positions are positions that are reserved for physicians who have had prior graduate medical education. Physician positions are not available to senior U.S. medical students.

The NRMP is not publishing the list of unfilled programs to the general public this year. Instead, it was posted to the Web during Match Week for use by the participants.

There are three reasons why a program that ranked an adequate number of applicants did not fill its quota: the applicants preferred other programs having vacancies; the applicants did not rank the program; or the applicants had withdrawn from the Match.

There are also three reasons why applicants may not be matched with their most preferred program: the program was filled with applicants it preferred; the program did not rank the applicant; or the program had withdrawn from the Match.
