Applicants & 1st Year Positions In The Match 1952-2003

NATIONAL RESIDENT MATCHING PROGRAM

INTRODUCTION

The NRMP was established in 1952 to provide both applicants and residency program directors a fair opportunity to consider their options for appointment, to make reasoned decisions, and to have their decisions announced at a uniform time.

The first match was conducted in 1952 when 10,400 internship positions were available for 6,000 U.S. graduating seniors. By 1973, there were 19,000 positions in the match for just over 10,000 U.S. graduating seniors. Following the demise of internships in 1975, the number of first year post-graduate (PGY-1) positions in the match dropped to 15,700. The number of PGY-1 positions offered gradually increased through the 1994 Match, and then began to decline slowly until 1998. This year, a record high 20,908 positions were offered (Figure 1).

The increase in the total number of applicants since 1952 is more dramatic, starting with 6,000 in 1952 and rising to a high of 36,056 in 1999. However, there has been a decline of 5,052 applicants over the last four years, with 31,004 registering for the 2003 Match.

NRMP completed the total re-engineering of the matching process system for the 2002 Match. The new web-based Registration, Ranking and Results system (R3) was launched in July 2001. The new system is completely paperless and allows applicants and programs to complete all match related activities on-line including:

- registration, with applicants paying their registration fees on-line whether by credit card or electronic checking;

- entering their Rank Order Lists;
- and obtaining Match Results.

The new system is a user-based system rather than a program-based system, with all participants being assigned a unique ID number, which they will use again in matches in subsequent years. The system also relies almost exclusively on email communications, which allows the NRMP to send messages to participants on short notice.

For the 2002 and 2003 Matches, the NRMP augmented the release of Match Results on the web during Match Week with e-mail messages to applicants, program directors, and schools at critical times. In addition, the Registration, Ranking, and Results System (R3) was supported by an expanded pool of servers. Those two changes improved the performance of the application during peak times near the Rank Order List deadline and during Match Week.

The NRMP is managed by the Association of American Medical Colleges (AAMC). Operations are conducted in the AAMC's Division of Medical School Services and Studies.

Special data requests pertaining to this or prior matches should be directed in writing to:

TABLES 1 AND 2

The 2003 Match was highly successful, with higher program fill rates in most specialties and an overall match rate for applicants nearly identical to last year. Tables 1 and 2 illustrate the trends in the number of positions and the number of applicants participating in the Match during the past seven years. Many applicants, in addition to U.S. senior medical students, seek residency positions through the NRMP. The data for different categories of applicants are shown in Table 2. U.S. foreign graduates are defined as U.S. citizens who are graduates of foreign medical schools, and non-U.S. foreign graduates are non-U.S. citizen graduates of foreign medical schools.

The total number of positions offered in the 2003 Match was 23,365, an all-time high. The number PGY-1 positions increased by 306 (1.5%), and the number of PGY-2 positions grew by 143 (6.2%). The increase can be attributed primarily to 164 (9.8%) additional preliminary internal medicine positions, 39 (9.9%) more PGY-1 and 56 (7.2%) more PGY-2 anesthesiology positions, 41 (3.8%) more emergency medicine positions, and 55 (7.0%) additional diagnostic radiology PGY-2 positions.

Although the number of registrants had declined for the past three years, that trend slowed in 2003, with only 79 fewer applicants this year than last. After a three-year decline, the number of non-U.S. citizen foreign graduates grew by 185, the largest gain among 2003 applicants (Figure 2). The earlier decreases followed shortly after July 1, 1998, when the Educational Commission for Foreign Medical Graduates (ECFMG) required the successful completion of the Clinical Skills Assessment (CSA) examination for certification.

Further examination of U.S. citizen and non-U.S. citizen foreign medical graduates who registered for the match but did not actively participate shows that 1,713 were withdrawn because they lacked eligibility for certification by the ECFMG. That number is only 26 more than were withdrawn in 2002 for the same reason.

Only 60 fewer U.S. seniors registered for the 2003 Match, a decline of less than 1.0 percent. The number of U.S. seniors active in the Match stabilized at 14,332, only 4 fewer than in 2002. An active applicant is defined as one who submits a rank order list of residency program choices. As in years past, U.S. seniors had the highest match rate. This year, 93.2 percent (13,364) of the U.S. seniors who submitted rank order lists were matched to first-year positions. Adding the 231 seniors who matched to a PGY-2 position but not a PGY-1 position, 94.9 percent of U.S. seniors matched to at least one position.

Although the total number of applicants decreased slightly from 2002 to 2003, the number of active applicants grew by 506 (2.2%) to 23,965. Of those, 18,806 were matched to PGY-1 residency positions, 359 more than last year. Because the increase in active applicants was accompanied by a similar increase in positions offered, the match rate for all applicants was nearly identical to that for 2002 (Figure 3).

Note: Active Applicants are those who submit a list of residency program choices.

Note: Unmatched PGY-1 applicants includes applicants who matched to PGY-2 positions, but not to PGY-1 positions.

TABLE 3

The ratios of PGY-1 positions to active applicants from 1976 through 2003 are shown in Table 3. Active applicants are defined as those who submitted a rank order list.

- In 2003, the ratio of PGY-1 positions per active U.S. senior remained almost constant with the previous two years at 1.46/1. The ratio declined from 2.0/1 in 1972 (not shown) to a low of 1.25/1 in 1984 and 1985. Since then it has fluctuated between 1.32/1 and 1.46/1.
- The ratio of PGY-1 positions to total applicants (rather than only U.S. seniors) is quite different and has remained steady for the past three years. The 2003 figure reflects the increase in both total positions and active applicants.

TABLE 3
RATIO OF PGY-1 POSITIONS TO ACTIVE APPLICANTS
1976 - 2003

YEAR	NUMBER OF POSITIONS	ACTIVE U.S. SENIORS	POSITIONS PER U.S. SENIOR	ACTIVE TOTAL	POSITIONS PER ACTIVE APPLICANT
1976	16,112	11,735	1.37	16,728	0.96

1995	20,751	14,621	1.42	22,936	0.90
1996	20,563	14,539	1.41	24,718	0.83
1997	20,209	14,614	1.38	26,323	0.77
1998	20,299	14,610	1.39	26,360	0.77
1999	20,453	14,607	1.40	26,462	0.77
2000	20,598	14,358	1.43	25,056	0.82
2001	20,642	14,455	1.43	23,981	0.86
2002	20,602	14,336	1.44	23,459	0.88
2003	20,908	14,332	1.46	23,965	0.87

NOTE: Applicants who withdrew or did not rank programs are excluded.

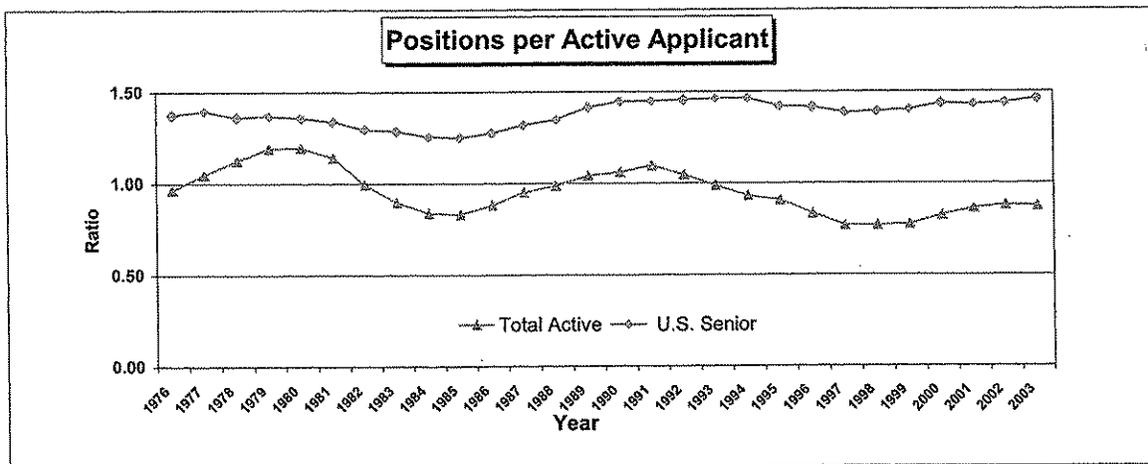

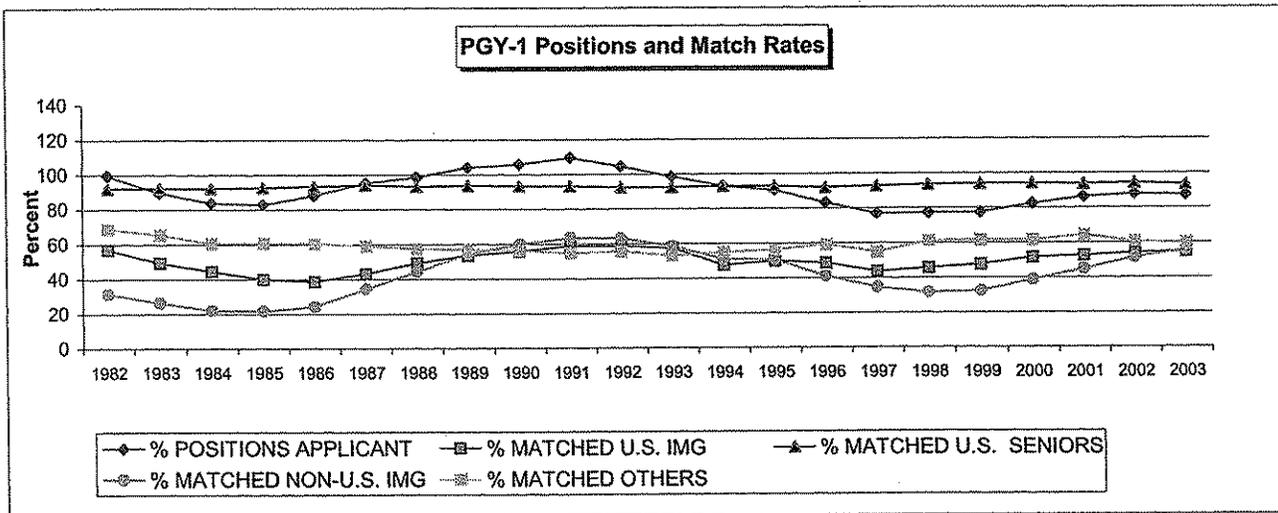

TABLE 4

Table 4 displays the match rates to PGY-1 positions for U.S. seniors, U.S. citizens trained in foreign medical schools, non-U.S. citizens trained in foreign medical schools, and others (Canadian, Osteopathic, Fifth Pathway, and U.S. physicians). Two of the four categories registered an increase in **match rates**, which is the percentage of active participants who matched to PGY-1 positions.

- 93.2 percent of U.S. seniors matched, down from the all-time high of 94.1 percent in 2002.
- Canadian, osteopathic, Fifth Pathway, and U.S. physicians collectively matched at 59.5 percent, a decrease of less than 1.0 percent from the 2002 Match.
- The match rate for U.S. citizen graduates of foreign medical schools rose by 0.8 percent, the sixth year of an increase.
- For the third consecutive year, the percentage of non-U.S. citizen graduates of foreign medical schools who matched increased significantly, jumping 4.4 percent. (See Table 1 and 2 comments).

TABLES 5 AND 6

Table 5 illustrates the numbers of positions offered in the Match by specialty, as well as the numbers filled by U.S. seniors and by an aggregate of all other applicants. Table 6 displays the same information in percentages.

- For the fifth year more than 20,000 matches were made to PGY-1 and PGY-2 positions, with an increase of 520 over 2002 and 1,020 for the five-year period.
- The **fill rate** for all programs also increased in 2003, and at 90.7 percent is the highest for the five-year period.
- The number of offered PGY-2 positions continues to rise with 143 more positions in the Match, including 55 more in diagnostic radiology positions and 56 more in anesthesiology.
- U.S. seniors filled 82.7 percent of the 1049 positions offered in surgery categorical programs, an increase of 7.4 percent. The overall fill rate for surgery programs rose as well, from 94.4 percent in 2002 to 99.0 percent in 2003.

Specialties of note are:

- Specialties and specialty tracks with at least 10 positions in the Match and 100 percent fill rates:
 - Dermatology: PGY-2
 - Radiation oncology: PGY-1 and PGY-2
- Specialties with at least 10 positions in the Match and over 90 percent filled by U.S. Seniors:
 - Orthopaedic surgery: PGY-1
 - Plastic surgery: PGY-1
 - Radiation oncology: PGY-2
- Four specialties had a fill rate variance greater than 5 percent when compared to 2002.
 - Dermatology PGY-1: declined by 6.1 percent
 - Pathology PGY-1: increased by 6.4 percent
 - Physical medicine and rehabilitation: PGY-1 increased by 5.2 percent and PGY-2 by 13.1 percent
 - Psychiatry PGY-2: increased by 8.6 percent

TABLES 7, 8, AND 9

Tables 7, 8, and 9 present the data by specialty for PGY-1 programs for three different groups: all applicants, U.S. seniors, and foreign-trained physicians. Foreign-trained physicians are U.S. citizen and non-U.S. citizen graduates of foreign medical schools, excluding Canadian, osteopathic, and Fifth Pathway applicants.

Generalist Specialties

In 2003, 44.2 percent (5,909) of U.S. seniors who were active applicants matched to a first-year residency position in one of the generalist specialties, a decrease of 2.2 percent from last year. The generalist specialties are defined as:

- Family practice
- Internal medicine, internal medicine-pediatrics, internal medicine-primary
- Pediatrics, pediatrics-primary.

All of those specialties except pediatrics matched fewer U.S. seniors in 2003 than in 2002.

- 1,226 (9.2%) of matched U.S. seniors will enter family practice residency programs, a decrease of 173 from 2002.
- 3,040 (22.7%) of matched U.S. seniors will enter internal medicine, internal medicine-pediatrics, or internal medicine-primary residency programs, a decrease of 194 from last year.
- 1,643 (12.3%) of matched U.S. seniors will enter pediatrics or pediatrics-primary residency programs, an increase of 23 from last year.

Table 9 shows by specialty the number of U.S. citizen and non-U.S. citizen foreign-trained physicians who matched to PGY-1 positions. By far the largest percentage (39.6%) received positions in internal medicine. The next largest group was in family practice, where foreign-trained physicians filled 18.0 percent of positions offered, an increase of 0.6 percent over the 2002 Match.

TABLE 10

There are two parts to this table. The first (on the left) displays the number of programs ranked by U.S. seniors, and the second (on the right) reports the information for all applicants. For example, an applicant ranking ten programs would contribute a count of ten to the total. Very competitive specialties are likely to have higher ratios of numbers of ranks per numbers of positions, as applicants tend to rank more programs in those specialties.

The Ranked Positions column describes the total number of times a particular specialty was ranked. Using anesthesiology PGY-1 for Total Applicants (the right side of the table) as an example:

- The first two columns show that 73 programs offered 431 anesthesiology PGY-1 positions.
- The Ranked Positions Column shows that collectively all applicants ranked those anesthesiology programs 3,728 times.
- The next column (#Ranks/Position) shows the ratio of the number of ranks to the number of positions was 8.6/1 (3,728/431).
- The next two columns show that 415 of the 431 anesthesiology PGY-1 positions offered were filled for a fill rate of (96.3 %).
- The last column indicates that 12 anesthesiology programs had unfilled positions after the Match.

Source: National Resident Matching Program 2003 Match Data

TABLE 11

Table 11 displays by specialty the program choices made by matched and unmatched U.S. seniors and independent applicants. Independent applicants include the following categories:

- U.S. citizen graduates of foreign medical schools
- Non-U.S. citizen graduates of foreign medical schools
- Canadian applicants
- Osteopathic applicants
- Fifth Pathway applicants
- Previous U.S. graduates

In past years, this table counted only PGY-1 positions. This year, PGY-2 positions were included so that the table now reflects the total number of positions offered within a specialty. Thus, an applicant who ranked categorical dermatology programs as well as advanced dermatology programs would be counted once under the "Dermatology Only Choice" column. Likewise, an applicant who ranked internal medicine categorical and internal medicine preliminary would be counted as having made internal medicine as the only choice.

The table also shows the ratio of applicants choosing a specialty to the number of positions in that specialty. For example:

- 378 U.S. seniors ranked at least one dermatology program. With only 272 positions offered, the ratio of positions to U.S. senior applicants was 0.7:1, indicating a competitive specialty.
- On the other hand, 967 U.S. seniors ranked at least one diagnostic radiology program. With 979 positions offered, the ratio of positions to U.S. senior applicants was 1.0:1, indicating the supply and the demand are almost equal for those positions.

While the ratios for U.S. seniors and the total applicant pool are similar in many specialties, there are some notable exceptions. In three specialties, the ratios for U.S. students were significantly higher than for all applicants combined, meaning all other applicants ranked those specialties much more frequently.

Specialty	U.S. Ratios	Total Applicant Ratio
Family practice	2.2	0.8
Pathology	1.5	0.6
Psychiatry	1.4	0.6

Although the ratios also were higher for preventive medicine, the numbers are too small to be statistically significant.

TOTAL	6,766	2,867			23,365	

NOTE: *Active applicants includes totals of both U.S. Seniors and Independent Applicants.

NOTE: **Beginning in 2003, TOTAL POSITIONS in Table 11 includes PGY-2 positions in addition to PGY-1 positions.

TABLE 12

Table 12 examines the 84.0 percent of U.S. seniors who submitted a rank order list with only one type of specialty ranked. That number is 4.3 percent lower than in the 2002 Match. High unmatched rates for applicants in such specialties as dermatology (22.8%), radiation oncology (24.0%), and orthopaedic surgery (15.9%) reflect the fact that there are significantly more applicants interested in those specialties than there are available positions. That disparity also is reflected in the high fill rates (Table 6) for the PGY-1 positions of the three specialties, which were 93.9 percent, 100.0 percent, and 98.8 percent respectively.

Only 49 of the 947 U.S. seniors who ranked transitional programs (see Table 11) ranked only transitional programs. That relatively small number gives a “false positive” high percentage of unmatched applicants in those programs.

TABLE 12

Unmatched U.S. Seniors Who Ranked Only One Specialty

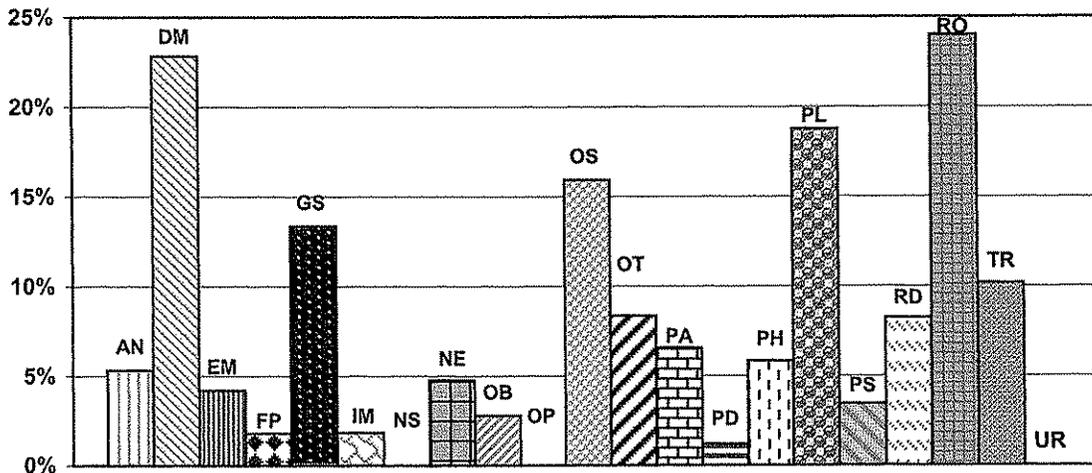

TABLE 13

Table 13 displays the number of matches obtained by U.S. seniors to programs that were ranked by the students first, second, third, fourth, or fifth and lower. Of all matches to first- and second-year programs, 87.5 percent were to one of the first three choices of U.S. medical school seniors. The percent of matches to programs ranked among the top three choices is up slightly from 86.3 percent in 2002. Approximately, 63.2 percent were first choice matches, 15.8 percent were second choice, and 8.5 percent were third choice.

As indicated in the footnote on the table, results before 2000 combined matches and applicants unmatched to PGY-1 positions together to create the denominator for calculating percentages. The resulting percentages were misleading. Both PGY-1 and PGY-2 matches are included in the first choice, second choice, etc. numbers. Thus, applicants who matched to both types of programs had their choices counted twice, while applicants who received a PGY-1 or PGY-2 match, and had also ranked choices for the other type of program, were only represented once. Also, unmatched applicants were counted once although they might have ranked choices for both PGY-1 and PGY-2 programs.

Note: Beginning in 1991, Table 13 includes PGY-2 positions in addition to PGY-1.

TABLE 13

2001	9,156	60.5	2,359	15.6	1,347	8.9	757	5.0	1,513	10.0	15,132
2002	9,414	61.6	2,387	15.6	1,392	9.1	741	4.9	1,343	8.8	15,277
2003	9,617	63.2	2,398	15.8	1,298	8.5	736	4.8	1,172	7.7	15,221

NOTES: -Prior to 1991 only PGY-1 positions included in statistics
 -This version of Table 13 was introduced in 2000 and excludes unmatched applicants as a category. Previous versions combined matches and applicants in the denominator resulting in percentages that were misleading. These data only refer to matches obtained.

% of Matches by Rank Number

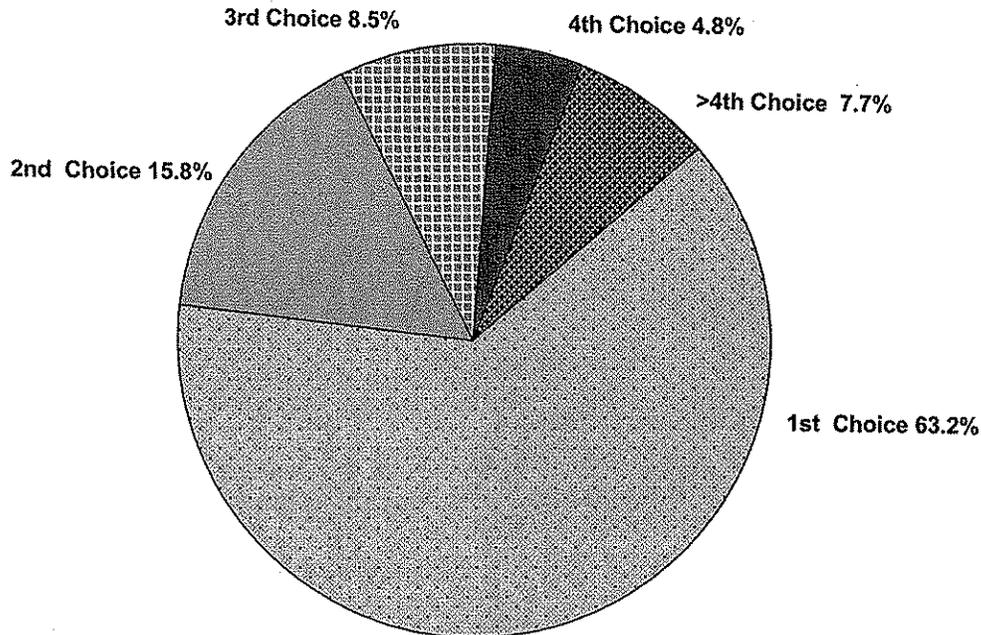

TABLE 14

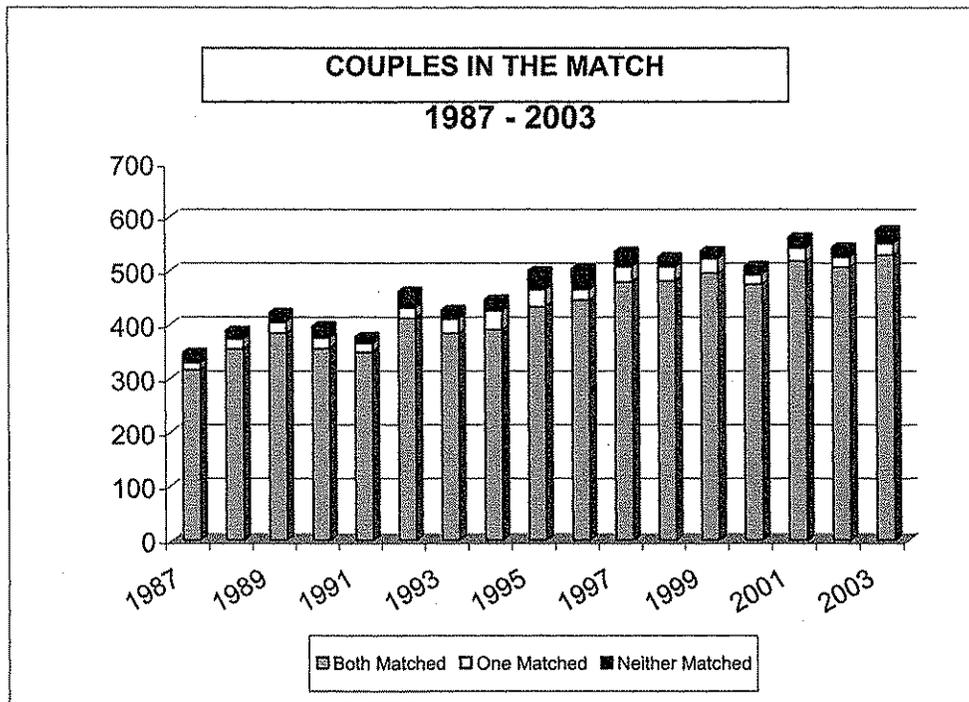

Couples have been able to participate together in the NRMP's Main Match since 1984. The two partners identify themselves as a couple to NRMP and submit rank order lists of identical length. The algorithm treats the two lists as a unit, matching the couple to the highest linked program choices where both partners match to programs on their lists.

Couples enjoy great success in the Match, with match rates above 90 percent every year since 1984. In 2003, the match rate for couples was 93.9 percent. The vast majority (80.9%) of couples are U.S. seniors, and their match rates are very similar to their classmates, varying within 1 or 2 percent each year.

Couples have had the option of one partner indicating a willingness to go unmatched at a certain rank on the rank order list if the partner matches to the program that is linked to that rank. Table 14 shows the number of couples matched with this option in the *One Matched* column.

**TABLE 14
COUPLES IN THE MATCH
1987 - 2003**

Year	Couples	Individuals	Both Matched	One Matched	Neither Matched	Match Rate %
1987	347	694	316	14	17	93.1

NRMP PROGRAM RESULTS 2003 MATCH

NRMP Program Results lists every hospital that participated in the Match and the number of candidates requested and the number matched for each hospital program.

Hospitals are arranged alphabetically within state. The listing includes the hospital name (abbreviated in some instances), the program code, which identifies each program, the quota (the number of positions offered by the program), and the number of applicants matched with that program.

There are three reasons why a program that ranked an adequate number of applicants did not fill its quota: the applicants preferred other programs having vacancies; the applicants did not rank the program; or the applicants had withdrawn from the Match.

There are also three reasons why applicants may not be matched with their most preferred program: the program was filled with applicants it preferred; the program did not rank the applicant; or the program had withdrawn from the Match.

The following types of programs are offered through the NRMP:

- Categorical (C) positions are positions in programs that expect applicants who enter in their first post graduate year to complete the training required for certification in that specialty, provided their performance is satisfactory. Categorical programs in primary medicine and primary pediatrics are designated by (M) to distinguish them from regular medicine and pediatrics programs.
- Preliminary (P) positions are for one or two years of training as prerequisite for entering advanced positions in specialty programs that require one or more years of broad clinical training. Internal medicine, surgery, and transitional programs commonly offer preliminary positions.
- Advanced (A) positions (to begin in 2004) are positions in specialty programs that begin after completion of one or more years of preliminary training. Applicants without prior graduate medical education can apply for those positions while also applying for preliminary positions (to begin in 2003) that are compatible with their plans.
- Physician (R) positions are positions that are reserved for physicians who have had prior graduate medical education. Physician positions are not available to senior U.S. medical students.

NRMP Program Code Structure

The NRMP program code is a **9-character** code based on the following criteria.

- The **first four characters** are the Institution Code
- The **fifth through the seventh characters** represent specialty code obtained from the **first three digits** of the program's **ACGME Code** and designates the specialty.

- The **eighth character** represents the program type:
 - P – Preliminary program
 - C – Categorical program
 - M – Primary program
 - A – Advanced program
 - R - Physician program
 - F – Fellowship program
- The **ninth character** represents the track
 - 0 – first program/track in the specialty and program type at the institution
 - 1 – second program/track in the same specialty and program type at the same institution (i.e. 34th Street Clinic)
 - 2 – third program/track in the same specialty and program type at the same institution (i.e. Rural Clinic)

Examples

Institution: 1022 - UC San Francisco-FRESNO
 ACGME Number: 140-05-31-033 - internal medicine
 Program Type: P - preliminary
 First Track: 0
PROGRAM CODE: 1022140P0

Second Track: 1
PROGRAM CODE: 1022140P1

Note: See ACGME Specialty Codes on the following page.
