NRMP vs. ERAS

NRMP and the Electronic Residency Application Service (ERAS®) are separate organizations with separate systems.

- ERAS is the application service provided by the AAMC® where you will review applications and supporting materials.

- NRMP is the matching service where you will register both yourself and your program, rank applicants, and receive Match results.

- NRMP partners with ERAS to conduct SOAP®.

THE MATCH

NATIONAL RESIDENT MATCHING PROGRAM
Program Set-up Options

Tracks

- Based on needs of programs.
- Can be created by the PD, IA, or IO. Must be activated by the IO for participation.
- Examples: location, research, rural, external funding, etc.
- Reversions can be created to guard against being unfilled.
Program Set-up Options

Reversions

- Donate unfilled positions in one program or track to another during the matching process.
- Reversions do not roll over. Must be created each year.
- Donor program creates the reversion.
- If used, the rank order list of the recipient program is used to fill the positions donated.
- Cannot revert more than the current program quota.
- Both programs must certify a rank order list.
- Reversions must be approved by IO.
Reversions

Algorithm Begins Processing:
- IM track fills its 2 positions
- IM/Rural track fills 1 of its 2 positions

1 unfilled IM/Rural track position reverts to the main IM track.

Algorithm tries to fill the position using the main IM track rank list.

IM track fills the 1 additional position reverted from the IM/Rural track.

Match Results:
- IM track fills 3
- IM/Rural track fills 1
- Both programs show as filled.
Joint Advanced-Preliminary Programs

• Link an advanced (A) program with a preliminary (P) program to create a full course of training for applicants.

• Only applicants ranking the A program on their primary ROL can rank the joined P program on the attached supplemental ROL.

• Applicants match to the P program only if they first match to the A program.

• Must be entered and approved by the IO before February 1.
