## About the Specialties Matching Service®

The National Resident Matching Program (NRMP) is a private, not-for-profit corporation established in 1952 to optimize the rank-ordered choices of applicants and graduate medical education program directors. The NRMP is not an application processing service; rather, it provides an impartial venue for matching applicants' and program directors' preferences for each other.

The NRMP Specialties Matching Service® (SMS®) conducts Matches for advanced residency and fellowship positions. The first Fellowship Match was conducted in 1984 for Colon and Rectal Surgery; for the 2023 appointment year the SMS provided services for 73 subspecialties in 20 separate Matches. Two subspecialties joined the SMS for 2023 appointments as part of the Medicine and Pediatric Specialties Match: Addiction Medicine and Addiction Psychiatry. Headache Medicine returned to the Match for 2023 appointments as a single-specialty Match after last participating in 2018.

A complete list of the subspecialties participating in the SMS for the 2023 appointment year is shown in Figure 1.

Fellowship Matches occur throughout the year, and each requires its own registration process with the NRMP. Fellowship positions generally begin in July. Because Fellowship Match appointments may begin anywhere from 6 to 14 months after their Match Days, data are reported for the appointment year instead of the Match year.

## Introduction

This report summarizes all Fellowship Matches conducted by the NRMP Specialties Matching Service® (SMS®). Data are reported for Matches conducted in 2022 and early 2023 for appointments beginning in July 2023. Graphs display five-year trend data by subspecialty for the numbers of programs, positions, and applicants as well as match rates. Numbers of positions offered and filled for each participating program are listed at the end of this report.

The 2023 report includes two new subspecialties: Addiction Medicine and Addiction Psychiatry. Headache Medicine also returned to the Match for this appointment year after last participating for appointment year 2018.

The 2023 appointment year was the largest in the history of the SMS. The Matches encompassed:

- 5,734 programs that submitted certified rank order lists in 73 subspecialties and offered 13,365 fellowship positions, of which 11,548 (86.4%) were filled

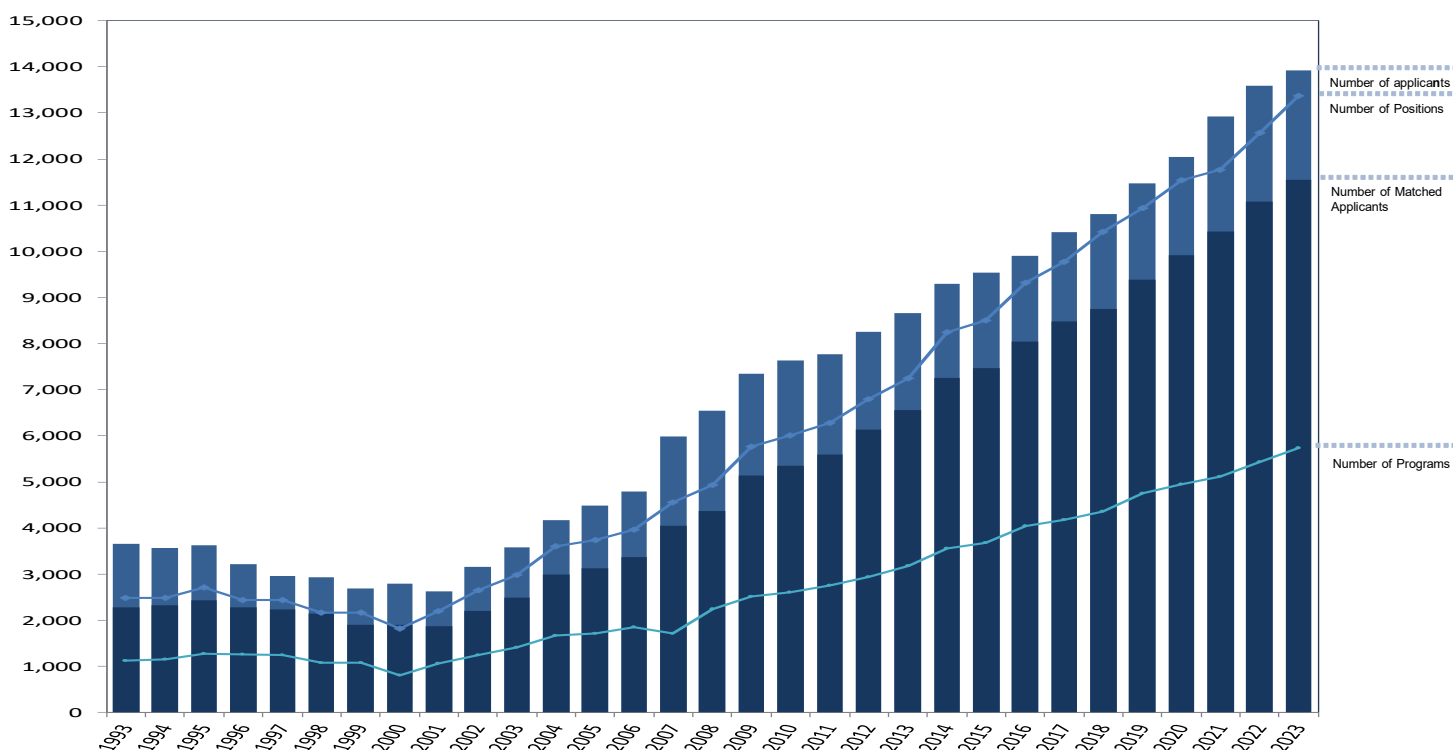

- Of the 5,734 participating programs, 4,517 (78.8%) filled all positions when the matching algorithm was processed
- 13,919 active applicants participated in at least one Fellowship Match, of whom 11,548 (83.0%) obtained positions

Numbers of applicants, matched applicants, positions, and programs offering positions between 1993 and 2023 are shown in Figure 2 below.

## Table 1

Table 1 provides a summary of the SMS® Fellowship Matches for appointment year 2023.

Using Allergy and Immunology as an example:

- The first two columns (“No. of Applicants”) show that 124 U.S. MD medical school graduates and 199 total applicants ranked at least one Allergy and Immunology program.
- The next two columns (“Positions Offered” and “No. of Pgms”) show that a total of 156 positions were offered by 96 Allergy and Immunology programs.
- The “No. of Matches” columns show that of the 156 positions offered in Allergy and Immunology, 107 were filled by U.S. MD graduates, and 153 were filled overall.
- The percentages of positions filled (calculated as “No. of Matches” divided by “Positions Offered”) can be found in the “% Filled” columns. Of the fellowship positions offered in Allergy and Immunology, 68.6 percent were filled by U.S. MD graduates and 98.1 percent were filled overall.
- The “Ranked Positions” columns show that the 96 Allergy and Immunology programs were ranked 1,305 times by U.S. MD graduates and 1,879 times by all applicants (including U.S. MD graduates).
- The last column (“Unfilled Programs”) indicates that 3 Allergy and Immunology programs had at least 1 unfilled position after the matching algorithm had been processed.

Of the 73 participating subspecialties, 33 filled 90 percent or more of the positions offered and 27 filled less than 75 percent, including 5 subspecialties that filled less than 50 percent of their positions.

+ Applicants can rank multiple specialties within the combined specialties Matches; in addition, a small number of applicants participate in more than one Fellowship Match within a single appointment year, but they cannot match to concurrent year positions.

++ Graduates of U.S. MD medical schools

## Table 2

Table 2 shows the number and percentage of matches in each specialty by applicant type. Of the specialties offering at least 30 positions:

- Gynecologic Oncology had the highest percentage filled by U.S. MD graduates (92.3%) and Nephrology had the lowest (28.7%). The five specialties with the highest percentages of positions filled by U.S. MD graduates include Gynecologic Oncology (92.3%), Hand Surgery (91.5%), Pediatric Surgery (89.8%), Reproductive Endocrinology (87.5%), and Female Pelvic Medicine and Reconstructive Surgery (86.9%).

## Table 3

The ratios of fellowship positions to active applicants are provided in Table 3 for appointment years 2019 through 2023 and are shown graphically in Figure 3 for appointment years between 2002 and 2023. Active applicants are defined as those who submit certified rank order lists of programs. The red line in Figure 3 indicates the point at which there are equal numbers of positions and applicants.

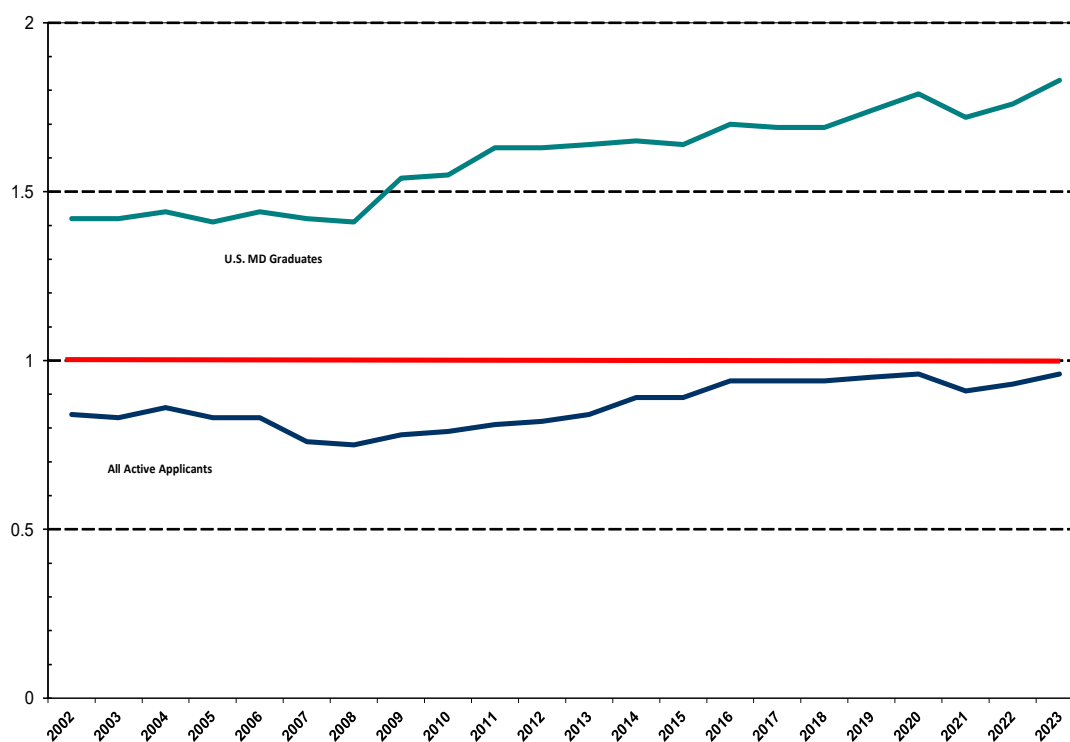

- The number of fellowship positions per *active U.S. MD graduate* was 1.83 in 2023, 0.07 more than last year.
- The ratio of fellowship positions to *all active applicants* was 0.96 for the 2023 appointment year, 0.03 more than last year.

**Table 3** Number of Positions per Active Applicant, 2019 - 2023

## Table 4

Table 4 displays applicants by applicant type in the SMS® Fellowship Matches between 2019 and 2023.

Applicants are grouped based on citizenship and medical school of graduation. For example, *graduates of U.S. MD medical schools* are graduates of U.S. MD medical schools regardless of citizenship, and *U.S. citizen graduates of international medical schools* are U.S. citizens who are graduates of international medical schools.

The total number of registrants for the 2023 appointment year was 14,385, an increase of 417 over 2022. The most substantial contributor to that increase was the growth in the number of U.S. MD graduates (182). There also were considerable increases in the numbers of U.S. DO graduates (124) and Non-U.S. citizen graduates of international medical schools (75).

An *active applicant* is one who submits a certified rank order list of programs. Between 2019 and 2023, the number of active applicants rose 21.4 percent from 11,467 to 13,919. During the same time period, U.S. MD graduates had the largest increase in number (991) followed by U.S. DO graduates (810). Compared with 2022 appointment year, the total number of active applicants who were U.S. MD graduates increased by 151 (2.1%) while the number of U.S. DO graduates increased by 129 (6.5%). The number of U.S. citizen graduates of international medical schools decreased by 2 (0.1%) while the number of non-U.S. graduates of international medical schools who were active applicants increased by 53 (2.0%).

For the 2023 appointment year, 11,548 active applicants matched to a fellowship position, 470 more over 2022. The number of matched applicants among U.S. MD graduates was 6,557, an increase of 163 over the 2022 appointment year. Among U.S. DO graduates, 1,738 matched, an increase of 160 from 2022. The number of matched U.S. citizen graduates of international medical schools was 1,219, an increase of 42 from 2022. The number who matched among non-U.S. citizen graduates of international medical schools was 1,992, an increase of 97 from 2022.

The trends in the numbers of active applicants and their match rates are shown graphically in Figure 4.

# Figure 4

Numbers of Active Applicants and Percentages Matched by Applicant Type, 2019 - 2023

## Table 5

Table 5 displays Fellowship Match results by subspecialty overall as well as applicants' preferred subspecialty. *Rank choice* is determined by the placement of programs on an applicant's rank order list. *Preferred specialty* is the subspecialty of the program ranked first on the applicant's rank order list.

For single specialty Matches (top half of the table), the data presentation and interpretation are straightforward; the preferred specialty is the single specialty so "Preferred Specialty" and "Matched in Another Specialty" columns reflect "n/a". Data for combined specialties Matches (bottom half of table) require more explanation.

### Single Specialty Matches

Using Headache Medicine as an example, 36 of the 40 applicants who ranked the subspecialty matched. Of those 36 matched applicants, 31 (86.1%) matched to the Headache Medicine program listed first on their rank order list, 4 (11.1%) matched to their second choice, 0 (0.0%) matched to their third choice, and 1 (2.8%) to a choice lower than third. Four applicants who ranked Headache Medicine did not match, representing 10.0 percent of the total.

### Combined Specialties Matches

In examining unique applicants for the combined specialties Matches, each applicant is included in the counts for the subspecialty ranked first on the rank order list (preferred specialty). Because applicants can rank more than one subspecialty within the same Match, "Matched in Another Specialty" data also are provided.

Using Cardiovascular Disease in the Medical Specialties Matching Program as an example, of the 1,685 applicants who ranked Cardiovascular Disease, 1,659 preferred it by ranking it first. Overall, 1,152 applicants matched to Cardiovascular Disease, and of those, 1,150 listed it as their preferred specialty.

Of the 1,685 applicants who ranked Cardiovascular Disease, 557 (33.1%) matched to the program that was listed first on the rank order list, 181 (10.7%) matched to the second choice, 115 (6.8%) to the third choice, 299 (17.7%) to a choice lower than third. There were 30 applicants (1.8%) who ranked Cardiovascular Disease and at least one other subspecialty who matched to another subspecialty.

Of the 1,685 applicants who ranked Cardiovascular Disease, 498 (29.6%) did not match.

\* In most cases specialties are grouped by the ACGME Review Committees (RCs). Some specialties are under the auspices of multiple RCs. For 2023 appointments, the specialties under the auspices of multiple RCs are:

- Addiction Medicine
- Brain Injury Medicine: Neurology and Physical Medicine & Rehabilitation
- Female Pelvic Medicine and Reconstructive Surgery: Urology and OB/GYN
- Geriatric Medicine: Family Medicine and Internal Medicine
- Hand Surgery: Orthopaedic Surgery, Surgery, and Plastic Surgery
- Medical Toxicology: Emergency Medicine and Preventive Medicine
- Pediatric Emergency Medicine: Pediatrics and Emergency Medicine
- Sleep Medicine: Internal Medicine, Neurology, Pediatrics, and Psychiatry
- Sports Medicine: Emergency Medicine, Family Medicine, Pediatrics, and Physical Medicine & Rehabilitation

\*\* Not accredited by the ACGME

\*\*\* Some specialties have programs within the specialty that are not accredited by the ACGME. For 2023 appointments, those specialties include:

- Complex Family Planning
- Musculoskeletal Radiology
- Pediatric Surgery
- Surgical Oncology

+ Applicants can rank multiple specialties within the combined specialties Matches. In addition, a small number of applicants participate in more than one Fellowship Match within a single appointment year, but they cannot match to concurrent year positions.

## Table 6

Table 6 displays the numbers of positions offered by subspecialty as well as the percentages filled by U.S. MD graduates and all applicants for appointment years 2019 through 2023. **To provide a complete picture, the table includes all subspecialties that participated during the five-year period regardless of when they joined and whether they remained in the SMS®;** years for which data cells are blank indicate either that the program had not yet joined or that it had left the SMS. The data in Table 6 are calculated as percentages of positions filled by applicant type, whereas the data in Table 2 are calculated as percentages of matches by applicant type.

A graphical summary of the data for each subspecialty listed in Table 6 can be found on the following pages.

# Specialties Matching Service®: Program Results for 2023 Appointments

This section of the report lists every hospital that participated in the SMS® along with the number of positions offered and filled for each of the institution's programs.

Hospitals are arranged alphabetically within state. The listing includes the hospital name (abbreviated in some instances); the program code, which identifies each program; the quota (the number of positions offered by the program); and the number of applicants matched with that program.

There are three reasons why a program that ranked an adequate number of applicants did not fill its quota: (1) the applicants preferred other programs; (2) the applicants did not rank the program; or (3) the applicants had withdrawn from the Match. There are also three reasons why applicants may not have matched with their most preferred program: (1) the program was filled with applicants it preferred; (2) the program did not rank the applicant; or (3) the program had withdrawn from the Match.

## NRMP Program Code Structure

The NRMP program code is a **9-character** code consisting of the following components.

- The first four characters are the Institution Code.
- The fifth through the seventh characters represent specialty code obtained from the first three digits of the program's ACGME Code and designates the specialty (see below).
- The eighth character represents the program type: F - Fellowship program, S - Fellowship Subspecialty
- The ninth character represents the track:
  - 0 - first program/track in the specialty and program type at the institution
  - 1 - second program/track in the same specialty and program type at the same institution (i.e. 34th Street Clinic)
  - 2 - third program/track in the same specialty and program type at the same institution (i.e. Rural Clinic).
