After the Main Residency Match has concluded, NRMP asks medical school officials and administrators to verify, and update if necessary, the USMLE scores and/or passing status of students and graduates who participated in the Match. Score verification in the Registration, Ranking, and Results® (R3®) system ensures the NRMP possesses the most accurate applicant data for its reports and publications, including *Charting Outcomes in the Match*.

Although verification is voluntary, each school that completes the score verification process will receive in September a *Characteristics of Matched Seniors* report comparing the characteristics of the school's matched senior students with national percentile information.

To address confidentiality concerns, the Match Participation Agreement states that applicants authorize their medical schools to release, verify, and transmit USMLE test scores and status to NRMP. In addition, during the Match registration process, applicants may elect not to enter their information in the R3 system and/or opt out of having their data used for research.
