## **NRMP Board of Directors**

#### NATIONAL RESIDENT MATCHING PROGRAM

455 Massachusetts Avenue, NW

Suite 310

Washington, DC 20001

The NRMP is governed by a 20-member Board of Directors, including:

- Chair, Chair-Elect, Secretary/Treasurer, and Immediate Past Chair
- · One Designated Institutional Official
- One Osteopathic Physician
- Two graduate medical education program directors
- Three medical students, one of whom must be enrolled in a U.S. Osteopathic medical school
- Three resident physicians, one who is a U.S. Osteopathic graduate and one who is an International Medical Graduate
- At least one public or non-physician member
- · President and CEO

#### Officers

- Chair: Deborah S. Clements, M.D., Chair, Family and Community Medicine, Northwestern University Feinberg School of Medicine
- Chair Elect: Natasha Bray, D.O. M.S.Ed, Dean, Cherokee Nation Campus, Associate Dean for Accreditation, Oklahoma State University Center for Health Sciences; Associate Program Director for the rural-based Tahlequah Medical Group Internal Medicine Residency Program; Clinical Associate Professor of Rural Medicine
- Secretary/Treasurer: Cathy Lazarus, M.D., Associate Dean for Student Affairs and Records, Professor of Medicine, Louisiana State University Health Sciences Center, New Orleans
- President and Chief Executive Officer: Donna L. Lamb, D.H.Sc., M.B.A., BSN., National Resident Matching Program

### Board Members, 2024-2025

- Bolatito Adeyeri, M.D. Candidate, Baylor College of Medicine
- Keith B. Armitage, M.D., Vice Chair for Education, Department of Medicine, University Hospitals Case Medical Center
- Peter Carek, M.D., M.S., Dean, Medical University of South Carolina/AnMed Clinical Campus; Professor of Family Medicine
- E. Sander Connolly, Jr., M.D., Vice Chair, Department of Neurological Surgery, Columbia University College of Physicians and Surgeons
- Donna D. Elliott, M.D., Ed.D., Vice Dean for Medical Education, University of Southern California, Keck School of Medicine
- Emily M. Hawes, PharmD, BCPS, CPP, Professor, University of North Carolina School of Medicine, Department of Family Medicine
- Michael G. Kavan, Ph.D., Associate Dean for Student Affairs, Professor of Family and Community Medicine and Professor of Psychiatry, Creighton University School of Medicine
- Jennifer LaFemina, M.D., F.A.C.S., Program Director, General Surgery, University of Massachusetts
- Melissa Garrett Mariano, D.O., Internal Medicine Resident, Mount Auburn Hospital
- Dakota J. Marshall, D.O. Candidate, Arizona College of Osteopathic Medicine
- Maria E. Padilla, M.D., F.A.A.P., Executive Associate Dean of Academic and Student Affairs, NOVA Southeastern University Dr. Kiran C. Patel College of Allopathic Medicine
- Robert L. Phillips Jr., MD, MSPH, Executive Director, The Center for Professionalism & Value in Health Care
- Sujay Ratna, M.D. Candidate, Icahn School of Medicine at Mount Sinai
- Claudia Mosquera Vasquez, M.D., Pediatric Nephrology Fellow, Nationwide Children's Hospital
- · Colin P.West, M.D., Ph.D., Professor of Medicine, Medical Education, and Biostatistics, Mayo Clinic
- · Acacia Williams, M.D., M.B.A., Internal Medicine Resident, Case Western Reserve University

### **About the NRMP**

The National Resident Matching Program® (NRMP®) is a private, not-for-profit corporation established in 1953 to optimize the rank-ordered choices of applicants and program directors for clinical training in the United States. The NRMP is not an application processing service, and interview service, or accreditor; rather, it provides an impartial venue for matching applicants' and programs' preferences for each other using an internationally recognized mathematical algorithm.

### Mission

The National Resident Matching Program (The Match), known for its integrity and transparency, is the foremost provider of reliable and trusted global matching services. The Match facilitates the efficient placement of physician learners to U.S.-based residency and fellowship training programs and leverages its premier data and analyses to enhance the healthcare environment while fostering innovation and advancing professionalism across the transition to residency and the physician workforce.

#### Vision

To empower a strong global physician workforce through pioneering and innovative matching solutions, novel data-driven insights, and national leadership on issues impacting medical education and ultimately, population health.

#### **Values**

Our vision is achieved through our core values and principles:

- Ethics:
  - o We act with honesty, trustworthiness, and accountability
- Equity:
  - o We ensure access and opportunity for all
- Efficacy:
  - o We leverage our experience and expertise to advance transformative and efficient match processes
- Engagement:
  - o We cultivate respectful, collaborative, and productive relationships through active listening and courageous and candid communications

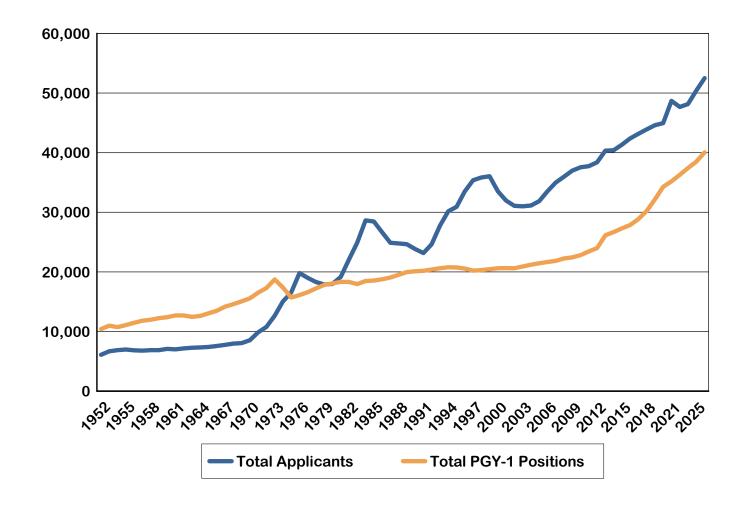

## **About the Match**

The first Main Residency Match® ("the Match") was conducted in 1952 when 10,400 internship positions were available for 6,000 graduating U.S. medical school seniors. By 1973, there were 19,000 positions for just over 10,000 graduating U.S. seniors.

In 1975 there was a decrease in the number PGY-1 (internship) positions that resulted from the incorporation of most internships into integrated residencies that encompass the full length of training. However, the number of PGY-1 positions rebounded quickly, increasing steadily with only a slight dip between 1994 and 1998. Since 1998, the number of PGY-1 positions has only increased. In the 2025 Main Residency Match, 40,041 PGY-1 positions were offered (Figure-1), representing the twenty-seventh consecutive annual increase.

Similar to total PGY-1 positions, the total number of applicants has continued to grow. As reflected in Figure 1, while there have been more fluctuations in the total number of applicants when compared to the more stable trajectory of total PGY-1 positions, the overall trend for applicants has been one of expansion. In 2025, there were 52,498 applicants who registered for the Match, representing an increase of 2,085 from 2024.

Figure 1 Applicants and 1st Year Positions in the Match, 1952 - 2025

For more information about the NRMP, please visit: www.nrmp.org. Additional data and reports for the Main Residency Match and the Specialties Matching Service® (SMS®) are available at:

https://www.nrmp.org/match-data-analytics/residency-data-reports/ and

https://www.nrmp.org/match-data-analytics/fellowship-data-reports/.

Instructions on how to request NRMP data are also provided.

### **Definitions/Organizations**

ACGME Accreditation Council for Graduate Medical Education.

Active Applicant An applicant who submits a certified rank order list of programs.

All In Policy

Any program registering for the Match must attempt to fill all positions through the Match or another national matching plan.

Applicant Type

The NRMP classifies applicants for the Main Residency Match into eight types:

- Senior Student of U.S. MD Medical School (U.S. MD Senior): A student who graduated from Liaison Committee on Medical Education (LCME) accredited medical school between June 30 of the calendar year the Match opens and 9:00 pm eastern time on the Rank Order List Certification Deadline in the year of the Match; also referred to as a MD senior.
- Senior Student of U.S. DO Medical School (U.S. DO Senior): A student who graduated from American Osteopathic Association (AOA) Commission on Osteopathic College Accreditation (COCA) accredited medical school between June 30 of the calendar year the Match opens and 9:00 pm eastern time on the Rank Order List Certification Deadline in the year of the Match; also referred to as a DO Senior.
- Previous Graduate of U.S. MD Medical School (U.S. MD Grad): An applicant who graduated from a LCME-accredited medical school prior to the year of the Match. Previous U.S. MD graduates are not sponsored by their medical schools.
- Previous Graduate of U.S. DO Medical School (U.S. DO Grad): An applicant who graduated from AOA COCA-accredited medical school prior to the year of the Match. Previous U.S. DO graduates are not sponsored by their medical schools.
- Student/Graduate of Canadian Medical School (Canadian): A senior student or graduate of a Canadian school of medicine accredited by the Committee on Accreditation of Canadian Medical Schools (CACMS).
- Graduate of Fifth Pathway Program (5th Pathway): A graduate of a U.S. Fifth Pathway program.
- U.S. Citizen Student/Graduate of International Medical School (U.S. IMG): A U.S. citizen who enrolled in, or a graduate of, a medical school outside the United States and Canada that is not accredited by the LCME, the AOA COCA, or the Committee on Accreditation of Canadian Medical Schools.
- Non-U.S. Citizen Student/Graduate of International Medical School (Non-U.S. IMG): A non-U.S. citizen who enrolled in, or a graduate of, a medical school outside the United States and Canada that is not accredited by the LCME, the AOA COCA, or the Committee on Accreditation of Canadian Medical Schools.

In this report, applicant types are sometimes combined into a smaller number of groups.

- Foreign-Trained Physicians: Includes U.S. citizen and non-U.S. citizen students and graduates of international medical schools.
- Others: Includes previous graduates of MD and DO medical schools, Canadian and Fifth Pathway applicants.

Couple

Any two applicants who register as a couple in the Match. The NRMP allows couples to form pairs of choices on their primary rank order lists, which are considered in rank order when the matching algorithm is processed. Couples match to the most preferred pair of programs where each partner has been offered a position.

PGY-1 & PGY-2 Post-graduate year one and post-graduate year two.

Program Type

The NRMP classifies programs for the Main Residency Match into five types:

- Categorical ("C") programs: Post graduate year one (PGY-1) programs that provide the full training required for board certification in a specialty.
- Categorical Primary Care ("M") programs: PGY-1 programs in medicine and pediatrics that provide a training emphasis on primary care.
- *Preliminary* ("P") programs: One-year transitional or specialty programs.
- Advanced ("A") programs: Specialty programs that begin the year after the Match and after one or more years of required preliminary training.
- *Physician* ("R") programs: Specialty programs that begin in the year of the Match and are reserved for physicians with prior graduate medical education. Positions in these programs are also known as "Physician Positions".

**SOAP** 

The Supplemental Offer and Acceptance Program® (SOAP®) is a process by which eligible unmatched applicants in the Main Residency Match apply for and are offered positions that did not fill when the matching algorithm was processed.

### Introduction

This report summarizes data from the National Resident Matching Program's (NRMP) 2025 Main Residency Match. The 2025 Main Residency Match was the largest in NRMP history when measured by the number of PGY-1 and PGY-2 positions offered (43,237) and filled (40,764). The 40,041 PGY-1 positions offered constituted an all-time high and an increase of 1,547 over 2024; half the increase was attributable to growth in Internal Medicine. There was also a record number of active applicants (47,208), with 2,355 more active applicants compared to 2024.

#### **Position Fill Rate**

A successful Match is measured not just by volume, but also by how well it matches the preferences of applicants and program directors who submitted certified rank order lists. Based on that criterion, the position fill rate for the 2025 Main Residency Match was 94.3 percent upon running the algorithm. After the matching algorithm was processed, 2,473 of the 43,237 positions offered were unfilled. An additional 118 positions were unfilled in programs that did not submit a rank order list, bringing the total unfilled to 2,591. Of those, 2,521 were placed in the Supplemental Offer and Acceptance Program® (SOAP®) offered by the NRMP during Match Week. At the conclusion of SOAP, 203 positions remained unfilled from 113 SOAP-participating programs. The overall fill rate, matching and SOAP processes combined, was 99.4 percent.

#### **Applicant Match Trends**

In the 2025 Match, 47,208 active applicants (those who submitted certified rank order lists of programs) vied for the 40,041 first year and 3,196 second year (including physician (R)) residency positions placed in the Match. U.S. MD senior students comprised 20,368 of the active applicants, 613 more than in 2024. Of the U.S. MD seniors who submitted a rank order list, 19,044 matched to a PGY-1 position for a match rate of 93.5 percent. Historically, the PGY-1 match rate for U.S. MD seniors is 92-95 percent.

The number of U.S. DO senior students continues to grow with 8,392 U.S. DO seniors having submitted a rank order list; 359 more than in 2024. Of those seniors, 7,773 matched to a PGY-1 position. The PGY-1 match rate for U.S. DO seniors in 2025 was 92.6 percent, up 0.3 percentage points from last year.

This year, 20,030 U.S. citizen and non-U.S. citizen IMGs registered for the Match, 980 more than 2024. This growth was entirely attributable to non-U.S. citizen IMGs: while 164 fewer U.S. citizen IMGs submitted rank order lists of programs in 2025, 1,444 more non-U.S. citizen IMGs submitted rank order lists in 2025 than in 2024, a 14.4 percent increase. Of the 4,587 U.S. IMGs who submitted rank order lists of programs in 2025, 3,108 matched to a PGY-1 position for a match rate of 67.8 percent. Of the 11,465 non-U.S. citizen IMGs who submitted rank order lists of programs, 6,653 matched to a PGY-1 position for a match rate of 58.0 percent.

#### Between 2021 and 2025:

- The number of U.S. DO seniors who submitted a rank order list grew by 1,291, or 18.2 percent.
- The number of U.S. IMGs who submitted a rank order list declined by 708, or 13.4 percent.
- The number of non-U.S. citizen IMGs who submitted a rank order list increased by 3,522, or 44.3 percent

#### **Applicant Placement Rate**

Placement rate accounts for applicants who received positions through either the matching algorithm or SOAP. There are two versions of this metric: one for active applicants and one for all applicants (i.e., active applicants plus SOAP-eligible applicants who did not submit a Rank Order List in the Match). By releasing both the match rate and placement rates, the NRMP ensures primary-source data about outcomes is being disseminated to the medical education community and establishes standardized definitions and accurate calculations of Match and SOAP outcomes data.

In 2025, the Active Applicant Placement Rate was 84.2 percent, and the All-Applicant Placement Rate was 79.3 percent, compared to 85.1 percent and 79.7 percent respectively in 2024.

### **Introduction Cont**

However, placement rates across applicant types vary significantly. Both metrics were nearly identical for U.S. MD Seniors (Active/All-Applicant Placement Rates 97.8 percent/97.3 percent, respectively) and U.S. DO Seniors (Active/All-Applicant Placement Rates 98.4 percent/97.4 percent). Both placement rate metrics exceeded the match rate metric for U.S. MD and DO Seniors as they tend to fill the majority of positions offered in SOAP. Due to the large number of U.S. and non-U.S. citizen IMG applicants who register for the Match but do not submit a Rank Order List, the All-Applicant Placement Rate was lowest, compared to both the match rate and Active Applicant Placement Rate. Specifically, the Active Applicant Placement Rate for U.S. IMGs was 73.5 percent, and the All-Applicant Placement Rate of 60.3 percent, compared to a 67.8 percent match rate. Non-U.S. IMGs had an Active Applicant Placement Rate of 60.3 percent and an All-Applicant Placement Rate of 52.3 percent, compared to a 58.0 percent match rate.

#### Couples

In the 2025 Match, there were 1,259 couples, of which 89.1 percent (1,122) both matched. There were 102 couples where only one individual matched, bringing the total couples match rate to 93.2 percent and there were 35 couples where neither individual matched.

### **Other Notable Trends**

With a total of 20,368 active U.S. MD senior applicants, the ratio of PGY-1 positions per active U.S. MD senior was 1.97, the highest since 1976. 8,392 active U.S. DO seniors resulted in a ratio of PGY-1 positions per active U.S. DO senior of 4.77. Collectively, with 28,760 active U.S. MD or DO senior applicants, the ratio of PGY-1 positions per active U.S. senior was 1.39. Meanwhile, 16,052 active IMG applicants (both U.S. IMGs and non-U.S. IMGs) account for about a third (34 percent) of all active applicants, with a ratio of PGY-1 positions per active IMG applicant of 2.49.

We hope you find the data contained in the following pages useful as you reflect on the 2025 Match.

Donna L. Lamb, D.H.Sc., M.B.A., B.S.N., President and Chief Executive Officer National Resident Matching Program 455 Massachusetts Ave NW, Suite 310 Washington, DC 20001 admin@nrmp.org

### Table 1

Table 1 summarizes the 2025 Main Residency Match and reflects the numbers of participating programs, offered positions, and unfilled programs. It also provides ranking and matching data for U.S. MD seniors (Table 1A), U.S. DO seniors (Table 1B), U.S. MD graduates (Table 1C), U.S. DO graduates (Table 1D), U.S. IMGs (Table 1E) and Non-U.S. IMGs (Table 1F).

Using Anesthesiology PGY-1 as an example on Table 1A:

- The first three columns ("No. of Programs," "No. of Positions Offered," and "No. of Positions Unfilled") show that 189 programs offered 1,805 Anesthesiology PGY-1 positions and that 1 of those positions was unfilled after the matching algorithm had been processed.
- The numbers of U.S. MD senior applicants and total applicants are provided in the next two columns under "No. of Applicants." In 2025, 1,784 U.S. MD seniors ranked at least one Anesthesiology program, and 3,017 applicants in total ranked Anesthesiology. Note that the figures do not mean that Anesthesiology was the preferred, or first choice of those applicants.
- The next two columns (under "No. of Matches") show that 1,301 of the 1,805 PGY-1 positions offered in Anesthesiology were filled by U.S. MD seniors, with 1,804 filled by all applicants.
- The fill rates (calculated as positions filled divided by positions offered) can be found in the two columns under "% Filled." Of the 1,805 PGY-1 positions offered in Anesthesiology, 72.1 percent were filled by U.S. MD seniors and 99.9 percent were filled overall.

The 2025 Match offered 43,237 positions, 1,734 more than 2024; of those, 40,041 were PGY-1 positions, 1,547 more than last year.

# Table 1A Match Summary for U.S. MD Seniors, 2025

<sup>\*</sup> Applicants can rank and match to multiple specialties and/or program types. "No. of Applicants/Matches" refers to the unique combination of applicant, specialty, and program type rather than unique individuals. Therefore, some individuals are counted multiple times, for example, if they matched to a PGY-1 and a PGY-2 position.

Physician (R) positions are PGY-2 positions starting in the year of the Match that are reserved for applicants who have had prior graduate medical education. Physician positions are not available to senior medical students.

<sup>\*</sup> Applicants can rank and match to multiple specialties and/or program types. "No. of Applicants/Matches" refers to the unique combination of applicant, specialty, and program type rather than unique individuals. Therefore, some individuals are counted multiple times, for example, if they matched to a PGY-1 and a PGY-2 position.

<sup>++</sup> Physician (R) positions are PGY-2 positions starting in the year of the Match that are reserved for applicants who have had prior graduate medical education. Physician positions are not available to senior medical students.

### Table 2

Table 2 shows the number of matches per specialty by applicant type. There was considerable variation in the specialties matched by applicant type. The data are described in more detail in Tables 10-12.

For example, the top five specialties to which U.S. MD seniors matched were:

- Internal Medicine (Categorical and Primary) (4,014)
- Anesthesiology (Categorical and Advanced) (1,516)
- Family Medicine (1,501)
- Pediatrics (Categorical and Primary) (1,494)
- Psychiatry (1,433)

#### For U.S. MD graduates, the top five specialties were:

- Anesthesiology (Categorical, Advanced, and Reserved) (167)
- Internal Medicine (Categorical and Primary) (159)
- Surgery (Categorical) (147)
- Family Medicine (Categorical) (90)
- Radiology-Diagnostic (Categorical, Advanced, and Reserved) (73)

#### For U.S. DO seniors, the top five specialties were:

- Internal Medicine (Categorical and Primary) (1,930)
- Family Medicine (1,482)
- Emergency Medicine (1,078)
- Pediatrics (Categorical and Primary) (644)
- Psychiatry (542)

### For U.S. DO graduates, the top five specialties were:

- Internal Medicine (Categorical and Primary) (54)
- Anesthesiology (Categorical, Advanced, and Reserved) (52)
- Family Medicine (52)
- Surgery (Categorical) (37)
- Emergency Medicine (35)

#### For U.S. citizen IMGs, the top five specialties were:

- Internal Medicine (Categorical and Primary) (1,169)
- Family Medicine (626)
- Emergency Medicine (315)
- Pediatrics (Categorical and Primary) (254)
- Psychiatry (153)

#### For non-U.S. citizen IMGs, the top five specialties were:

- Internal Medicine (Categorical and Primary) (3,655)
- Family Medicine (801)
- Pediatrics (Categorical and Primary) (620)
- Neurology (Categorical, Advanced, and Reserved) (279)
- Psychiatry (190)

Note: Preliminary and Transitional PGY-1 only programs were not included in the above lists

### Table 3

Table 3 shows the numbers of positions offered by specialty between 2021 and 2025. The 2025 Match offered 40,041 PGY-1 positions, an increase of 4,847 (13.8 percent) from 2021. The combined increase of PGY-1 and PGY-2 positions was 4,959 (13.1 percent) over 2021.

In 2025, the number of positions in primary care specialties, defined as Internal Medicine (Categorical, Primary), Family Medicine, Medicine-Pediatrics and Pediatrics (Categorical, Primary) was 20,300, an increase of 2,651 a 15.0 percent increase since 2021. Nearly three quarters of this increase was due to Internal Medicine, which experienced an increase of 1,887 positions between 2021 and 2025.

Other Specialties that experienced notable increases include:

- Psychiatry, which offered 481 more positions in 2025 than in 2021, a 25.2 percent increase.
- Anesthesiology (Categorical, Advanced, and Reserved), which offered 375 more positions in 2025 than in 2021, a 19.8 percent increase.
- Emergency Medicine, which offered 228 more positions in 2025 than in 2021, an 8.0 percent increase.
- Surgery (Categorical), which offered 209 more positions in 2025 than in 2021, a 13.3 percent increase.
- Neurology (Categorical, Advanced, and Reserved), which offered 195 more positions in 2025 than in 2021, a 19.7 percent increase.

Specialties that have increased or decreased by at least 10 percent and 10 positions in the Match between 2021 and 2025 are highlighted in Table 3 with arrows.

<sup>→</sup> Denotes increase/decrease in positions offered of more than 10 percent and 10 positions between 2021 and 2025.

Physician (R) positions are PGY-2 positions starting in the year of the Match that are reserved for applicants who have had \* prior graduate medical education. Physician positions are not available to senior medical students.

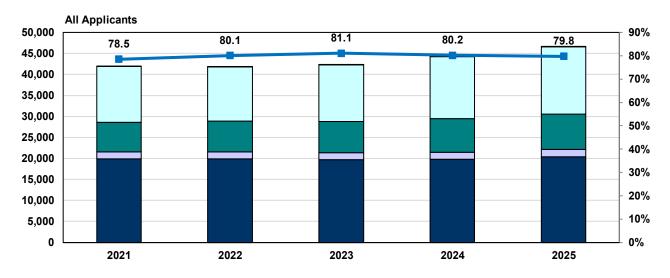

### Figure 2 and Table 4

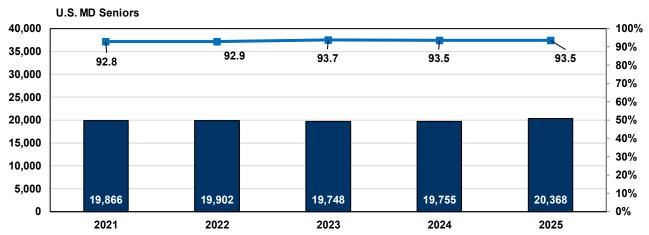

Five year trend data for different applicant groups are shown in Figure 2 and Table 4. In 2025, the number of active applicants was 47,208, 5.3 percent (2,355) more than in 2024 (44,853).

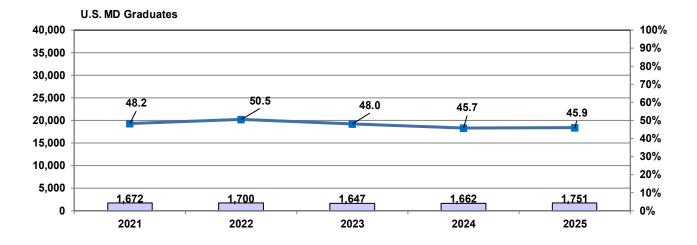

The arrows in Table 4 indicate percentage increases in the numbers of active applicants that were greater than the overall increase of 11.1 percent for all active applicants between 2021 and 2025. The number of active U.S. DO seniors in 2025 was 8,392, an increase of 1,291 (18.2 percent) since 2021 (7,101). The number of non-U.S. citizen IMGs was 11,465, an increase of 3,522 (44.3 percent) since 2021 (7,943). Meanwhile, the number of active U.S. citizen IMGs experienced a consistent downward trend, with 4,587 active U.S. citizen students/graduates of international medical schools in 2025 compared to 5,295 in 2021, a 13.4 percent (708) decrease.

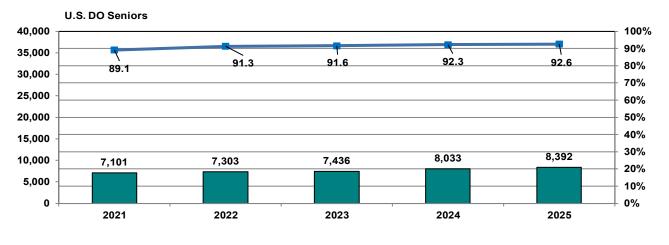

The number of applicants matched to PGY-1 positions grew across nearly all applicant groups. There were 19,044 U.S. MD seniors who obtained PGY-1 positions in the Match, an increase of 579 MD seniors compared to 2024. There were 7,773 U.S. DO seniors who obtained PGY-1 positions in the Match, an increase of 361. There were 6,653 non-U.S. citizen IMGs who obtained PGY-1 positions in the Match, an increase of 789. In addition, there were 3,108 U.S. citizen IMGs who obtained PGY-1 positions in the Match, a decrease of 73.

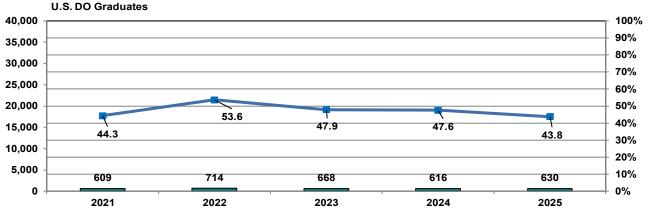

When considering all applicant types participating in the 2025 Match the overall PGY-1 match rate (when the algorithm was run) was 79.8 percent, 0.4 percentage points lower than 2024. The PGY-1 match rate for U.S. MD seniors (93.5 percent) were the same as in 2024 and are consistent with the over 30 year historical average of 92-95 percent. The PGY-1 match rate for U.S. MD graduates (45.9 percent) experienced an increase of 0.2 percentage points since 2024. The PGY-1 match rate for U.S. DO seniors (92.6 percent) is 0.3 percentage points higher than in 2024, while the match rate for U.S. DO graduates fell by 3.8 percentage points to 43.8 percent. The PGY-1 match rate for U.S. citizen IMGs (67.8 percent) was 0.8 percentage points higher than in 2024, while the rate for non-U.S. citizen IMGs fell to 58.0 percent, 0.5 percentage points lower than in 2024.

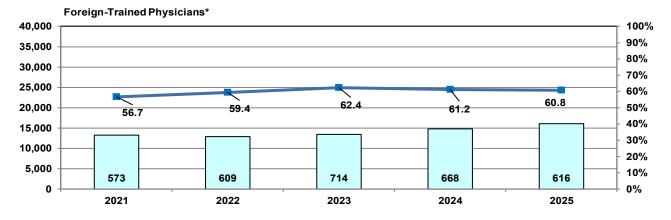

<sup>\*</sup>Foreign-trained physicians includes both U.S. citizen and non-U.S. citizen IMGs.

Applicants who submitted a certified rank order list of programs

Note: Match rates are based on all active applicants regardless of their ranking behavior. Therefore, applicants who matched to PGY-1 positions are counted as matched even if they ranked and did not match to a PGY-2 position. Applicants who ranked only advanced and physician (R) programs are counted as unmatched in this table because they did not match to a PGY-1 position.

### Tables 4A & 4B; Figure 2A

Tables 4A-4B and Figure 2A show the match and placement rates by applicant type as well as the number of applicants for each applicant type group. The match rate (once algorithm has run) has historically been reported each year by the NRMP. The NRMP began reporting placement rate in 2023, which accounts for those matched through the algorithm and those placed through SOAP. Placement rate is calculated twice based on two groups:

1. <u>Placement Rate - All Applicants</u>: the percentage of unique applicants who certified a ROL and/or were SOAP-eligible who successfully placed into a PGY-1 position through *either* the matching algorithm *or* SOAP. For this measure, the denominator includes active applicants *and* applicants who were eligible to participate in SOAP (i.e., SOAP-eligible applicants) because they 1) registered for the Match but did not certify a rank order list, or 2) certified a rank order list but did not match to a PGY-1 position when the matching algorithm was processed. Applicants who both certified a ROL and were SOAP-eligible are counted only once to identify *unique* applicants. The formula for calculating the Placement Rate - All Applicants is

((PGY-1 Matched Applicants + PGY-1 SOAP-Accepted Applicants) / Unique Applicants who certified a ROL and/or were SOAP-eligible) \* 100

2. <u>Placement Rate - Active Applicants</u>: the percentage of active applicants successfully placed into a PGY-1 position through *either* the matching algorithm *or* SOAP. The formula for calculating the Placement Rate - Active Applicants is

((PGY-1 Matched Applicants + PGY-1 SOAP-Accepted Active Applicants) / Active Applicants) \* 100

In 2025, the active applicant and all applicant placement rates were 84.2 percent and 79.3 percent, respectively. Both placement rate metrics were nearly identical for both U.S. MD Seniors (active/all applicant placement rates 97.8 percent/97.3 percent, respectively) and U.S. DO Seniors (active/all applicant placement rates 98.4 percent/97.4 percent). As expected, both placement rate metrics exceed match rate, for U.S. MD and DO Seniors and Graduates largely because they are the applicant types who accepted most positions accepted in SOAP. For both U.S. and Non-U.S. IMGs, the active applicant placement rate exceeds match rate while the all applicant placement rate is the lowest of the three metrics due to the large number of IMG applicants who do not certify a rank order list and therefore only participated in SOAP.

# Figure 2A

### PGY-1 Match and Placement Rates by Applicant Type, 2025

# Figure 3 and Table 5

Table 5 shows the ratios of PGY-1 positions to active applicants. The same data are shown graphically for applicant groups except U.S. MD and DO Graduates (excluded due to their smaller numbers) in Figure 3. The red line in Figure 3 represents the point at which there are equal numbers of applicants and positions: above the red line represents more positions than total active applicants, below the line more total active applicants than positions. Active applicants are defined as those who certify rank order lists of programs.

- In 2025, the ratio of PGY-1 positions per active U.S. MD senior was 1.97, a 0.02 increase from 2024. The ratio of PGY-1 positions per active U.S. DO senior was 4.77 compared to 4.79 in 2024. Combined, the PGY-1 positions per active US senior was 1.39 in 2025 (not reflected in Table).
- Historically, the ratio of PGY-1 positions to total applicants had roughly followed the trend of U.S. MD seniors because prior to 2019, more than half of all applicants came from that group. In recent history, however, the two have increasingly diverged. In 2025, the ratio was 0.85 positions per total active applicant, 0.01 percentage points lower than last year.

**Note:** Applicants who withdrew or did not rank programs are excluded.

# Figure 4 and Table 6

Table 6 displays the match rates to PGY-1 positions for U.S. MD seniors, U.S. DO seniors, U.S. IMGs, non-U.S. citizen IMGs, and other applicants (Canadian medical school students/graduates, Fifth Pathway applicants, DO graduates and MD graduates) since 2016. The data are shown graphically in Figure 4. Match rate is defined in Table 6 and Figure 4 as the percentage of active applicants who matched to PGY-1 positions.

- 93.5 percent of U.S. MD seniors matched to PGY-1 positions in 2025, within the historical 92-95 percent rate that has been consistent for forty years.
- 92.6 percent of U.S. DO seniors matched to PGY-1 positions, 0.3 percentage points higher than 2024.
- 67.8 percent of U.S. IMGs matched to PGY-1 positions, 0.8 percentage points higher than 2024.
- 58.0 percent of non-U.S. citizen IMGs matched to PGY-1 positions, 0.5 percentage points lower than 2024.

Figure 4 PGY-1 Match Rates by Applicant Type, 2016 - 2025

# Table 6 PGY-1 Match Rates\*, 2016 - 2025

		Total			Percent M	atched		
Year	Number of Positions	Active Applicants	MD Seniors	DO Seniors	U.S. IMGs	Non-U.S. IMGs	Others	All Applicants
2025	40,041	47,208	93.5	92.6	67.8	58.0	45.5	79.8
2024	38,494	44,853	93.5	92.3	67.0	58.5	46.3	80.2

2020	34,266	40,084	93.7	90.7	61.0	61.1	45.0	80.8
2019	32,194	38,376	93.9	88.1	59.0	58.6	46.3	79.6
2018	30,232	37,103	94.3	81.7	57.1	56.1	43.3	78.3
2017	28,849	35,969	94.3	85.0	54.8	52.4	44.9	77.0
2016	27,860	35,476	93.8	83.8	53.9	50.5	47.3	75.6

<sup>\*</sup>Match rates were calculated after running the Match algorithm and do not include SOAP data.

# Tables 7A-7F and 8A-8F; Figure 5

Table 7 displays the numbers of positions offered by specialty, as well as the numbers filled by U.S. MD seniors (Table 7A), U.S. DO seniors (Table 7B), U.S. MD graduates (Table 7C), U.S. DO graduates (Table 7D), U.S. IMGs (Table 7E), Non-U.S. IMGs (Table 7F), and an aggregate of all applicants from 2021 through 2025. The data in Table 7A and 7B are shown graphically in Figure 5 for specialties that offered at least 100 positions. Table 8 displays the same information for U.S. MD seniors, U.S. DO seniors, U.S. MD graduates, U.S. DO graduates, U.S. IMGs, Non-U.S. IMGs in percentages.

- In 2025, 40,764 matches were made to PGY-1 and PGY-2 (advanced and physician) positions, an all-time high and an increase of 1,823 (4.7 percent) over 2024.
- In 2025, primary care specialties offered a record-high number of positions.
  - Internal Medicine (Categorical, Primary) offered 11,352 positions, an increase of 1,887 positions (19.9 percent) since 2021, and achieved a 96.8 percent fill rate. The highest position fill rates by applicant type were among U.S. MD seniors (36.5 percent) followed by Non-U.S. IMGs (33.3 percent) then U.S. DO seniors (17.6 percent).
  - Internal Medicine-Pediatrics offered 398 positions. an increase of 13 positions (3.4 percent) since 2021, and achieved a 99.2 percent fill rate. The highest position fill rates by applicant type were among U.S. MD seniors (80.8 percent) followed by U.S. DO seniors (10.6 percent) then Non-U.S. IMGs (4.1 percent).
  - Family Medicine offered 5,357 positions, an increase of 534 positions (11.1 percent) since 2021, and achieved a 85.0 percent fill rate. The highest position fill rates by applicant type were among U.S. MD seniors (33.0 percent) followed by U.S. DO seniors (32.6 percent) then Non-U.S. IMGs (17.6 percent).
  - Pediatrics (Categorical, Primary) offered 3,193 positions, an increase of 217 positions (7.3 percent) since 2021, and achieved a 95.3 percent fill rate. The highest position fill rates by applicant type were among U.S. MD seniors (49.1 percent) followed by U.S. DO seniors (21.2 percent) then Non-U.S. IMGs (20.4 percent).
- Psychiatry offered 2,388 positions, an increase of 481 positions (25.2 percent) since 2021, and achieved a 99.7 percent fill rate.
- Emergency Medicine offered 3,068 positions, an increase of 42 positions from 2024. In 2023 the specialty had experienced a decline, with an 81.8 percent fill rate before climbing back up to a 95.5 percent fill rate in 2024. In 2025, the specialty achieved a 97.9 percent fill rate, an increase of 2.4 percentage points. This year's performance edges Emergency Medicine even closer to its pre-Covid fill rate of 98 to 99 percent. There were 3,003 applicants who matched to the specialty, a significant rebound from 2023 which saw 2,456 applicants obtaining PGY-1 positions. The increase in matched applicants to Emergency Medicine is due primarily to increases in DO seniors and non-U.S. citizen IMGs matching to the specialty.

# Tables 7A-7F and 8A-8F; Figure 5 Cont.

### Other trends of note are:

• Top ten specialties for PGY-1 positions with at least 20 positions (excluding Preliminary Positions) in the Match filled by U.S. MD seniors:

(Listing based on percentages filled: using Peds/Psych/Child Psych as an example, there were 29 positions, 27 of which were filled by U.S. MD seniors, for a percentage filled rate of 93.1 percent.)

- 1. Peds/Psych/Child Psych
- 2. Thoracic Surgery
- 3. Otolaryngology
- 4. Plastic Surgery (Integrated)
- 5. Neurological Surgery

- 6. Vascular Surgery
- 7. Medicine-Pediatrics
- 8. Dermatology
- 9. Orthopaedic Surgery
- 10. Medicine-Psychiatry
- Top ten specialties for PGY-1 positions with at least 20 positions in the Match filled by U.S. DO seniors: (Listing based on percentages filled, the same method applied for U.S. MD seniors.)
  - 1. Osteo Neuromusculoskeletal Med
  - 2. Physical Medicine & Rehab
  - 3. Emergency Medicine
  - 4. Family Medicine
  - 5. Radiology-Diagnostic

- 6. Psychiatry
- 7. Pediatrics (Categorical)
- 8. Obstetrics-Gynecology
- 9. Pediatrics-Medical Genetics
- 10. Anesthesiology
- Top ten specialties for PGY-1 positions with at least 20 positions in the Match filled by U.S. citizen IMGs: (Listing based on percentages filled, the same method applied for U.S. MD seniors.)
  - 1. Medicine-Emergency Med
  - 2. Family Medicine
  - 3. Emergency Medicine
  - 4. Internal Medicine
  - 5. Pathology

- 6. Pediatrics
- 7. Psychiatry
- 8. Surgery-General
- 9. Neurology
- 10. Radiology-Diagnostic
- Top ten specialties for PGY-1 positions with at least 20 positions in the Match filled by non-U.S. citizen IMGs: (Listing based on percentages filled, the same method applied for U.S. MD seniors.)
  - 1. Internal Medicine
  - 2. Pathology
  - 3. Neurology
  - 4. Pediatrics
  - 5. Pediatrics-Medical Genetics

- 6. Family Medicine
- 7. Child Neurology
- 8. Interventional Radiology (Integrated)
- 9. Vascular Surgery
- 10. Psychiatry

Physician (R) positions are PGY-2 positions starting in the year of the Match that are reserved for applicants who have had prior graduate medical education. Physician positions are not available to senior medical students.

### Table 9; Tables 10A-10F

These tables display the numbers of PGY-1 matches in each specialty and their proportions among all specialties for six different applicant groups: all applicants (Tables 9), U.S. MD seniors (Table 10A), U.S. DO seniors (Table 10B), U.S. MD graduates (Table 10C), U.S. DO graduates (Table 10D), U.S. citizen IMGs (Tables 10E), and non-U.S. citizen IMGs (Tables 10F). Specialties that have at least 10 positions in the Match and showed an increase or decrease in the numbers of matched applicants of greater than 10 percent between 2021 and 2025 are highlighted with arrows.

Between 2021 and 2025, the proportions of matched applicants among all PGY-1 specialties were relatively stable for all applicant groups with some notable trends:

The proportions of U.S. MD seniors matching in Psychiatry (7.5 percent), Anesthesiology (6.8 percent), and Neurology (2.6 percent) have increased modestly but consistently over the past five years (Tables 10A). In contrast, the proportions of U.S. MD seniors matching in Pediatrics (Categorical, Primary) (7.8 percent) and Emergency Medicine (7.2 percent) have generally declined over the same period due to the addition of more DO seniors in the Match.

Since the transition to a single accreditation system culminating in 2020, the number of U.S. DO seniors who matched has grown by 22.8 percent over the five year period (see Table 10B). In 2025, the total number of matched U.S. DO seniors was 7,773; compared to 2024, the number matched increased by 361 (4.9 percent). Between 2021 and 2025, the percentage of U.S. DO seniors filling Internal Medicine (Categorical, Primary) positions has fluctuated between 24.0 percent and 25.5 percent. In 2025, the number of U.S. DO Seniors filling Emergency Medicine positions was 1,078, an increase of 288 applicants (36.5 percent) since 2021. Additionally, the number of U.S. DO Seniors filling Psychiatry positions was 542, 210 (63.3 percent) more than 2021.

Historically, positions obtained by foreign-trained physicians (IMGs) are concentrated in a few specialties. In 2025, 65.9 percent of matched U.S. IMGs obtained positions in Internal Medicine (Categorical, Primary), Family Medicine, and Pediatrics (Categorical, Primary) (Table 10E). In addition, the number of U.S. IMGs obtaining positions in Emergency Medicine has doubled since 2021, leading to a 5.6 percent increase in U.S. IMGs matching to this specialty between 2021 and 2025. Among non-U.S. IMGs, more than half (54.9 percent) obtain positions in Internal Medicine (Categorical, Primary) (Table 10F). Meanwhile, the number of non-U.S. IMGs and the number of U.S. IMGs obtaining positions in Pathology declined by 27.3 and 18.6 percent, respectively, between 2021 and 2025.

### **Tables 11A, 11B & 11C**

Tables 11A, 11B and 11C display the numbers of applicants who ranked each specialty as their only choice, first choice, or not first choice: Only choice includes applicants who ranked that specialty first on their rank order lists (ROLs) and ranked no other specialties. First choice includes applicants who ranked that specialty first and ranked at least one other specialty. Not first choice includes applicants who ranked another specialty first but also included that specialty on their ROL. Top choice is defined as first choice ignoring any subsequent choices (only choice and first choice combined). Data on U.S. MD and DO seniors are listed in Table 11A, U.S. MD and DO graduates in Table 11B, and the same categories are listed in Table 11C for U.S. IMGs and non-U.S. IMGs.

Transitional Year programs are excluded from the data because they are not considered a preference for a specific specialty. PGY-1 and PGY-2 (including physician R) programs are combined. Internal Medicine and Pediatrics include categorical and primary positions. Preliminary programs are separated from categorical programs for Internal Medicine, Obstetrics and Gynecology, Pediatrics, and General Surgery.

Tables 11A, 11B and 11C also show the ratio of the number of positions in a specialty to the number of applicants choosing a specialty as their top choice.

Using Anesthesiology on Table 11A as an example:

- Combining categorical, advanced, and physician positions, Anesthesiology offered 2,268 positions in total.
- A total of 1,789 U.S. MD seniors ranked at least one Anesthesiology program (sum of 955 "only choice," 766 "first choice," and 68 "not first choice"). Anesthesiology was the "top choice" for 1,721 U.S. MD seniors (sum of 955 "only choice" and 766 "first choice"). With 2,268 positions offered, the ratio of positions to U.S. MD senior applicants who ranked Anesthesiology as the "top" choice was 1.3 to 1.
- Similarly, 485 U.S. DO senior applicants ranked at least one Anesthesiology program (sum of 155 "only choice," 302 "first choice," and 28 "not first choice"). Anesthesiology was the "top choice" for 457 U.S. DO seniors (sum of 155 "only choice" and 302 "first choice"). With 2,268 positions offered, the ratio of positions to U.S. DO senior applicants who ranked Anesthesiology as the "top" choice was 5.0 to 1.
- Lastly, for the 2,178 total MD and DO senior applicants whose only choice or first choice is Anesthesiology, the ratio of positions per applicant was 1.0.

Only Choice: includes applicants who ranked that specialty first on their rank order lists (ROLs) and ranked no other specialties. First Choice: includes applicants who ranked that specialty first and ranked at least one other specialty on their ROLs. Not First Choice: includes applicants who ranked another specialty first but also included that specialty on their ROLs. Top Choice: is defined as either only choice or first choice. Transitional Year programs were excluded from these counts because they are not considered a preference for a specific specialty.

**Total Positions**: includes all positions (categorical, advanced, primary care categorical, and physician) except preliminary positions offered in a specialty. Preliminary positions are reported separately.

Positions Per MD Senior: is the ratio of Total Positions to the number of MD seniors for whom that specialty was the first or only choice.

Positions Per DO Senior: is the ratio of Total Positions to the number of DO seniors for whom that specialty was the first or only choice.

Positions Per All Senior Applicants: is the ratio of Total Positions to the number of MD seniors and DO seniors for whom that specialty was the first or only choice.

Note: Specialties with fewer than 20 total positions are not displayed on this table.

\* The **TOTAL** row includes all positions in all specialties.

Only Choice: includes applicants who ranked that specialty first on their rank order lists (ROLs) and ranked no other specialties. First Choice: includes applicants who ranked that specialty first and ranked at least one other specialty on their ROLs. Not First Choice: includes applicants who ranked another specialty first but also included that specialty on their ROLs. Top Choice: is defined as either only choice or first choice. Transitional Year programs were excluded from these counts because they are not considered a preference for a specific specialty.

Total Positions: includes all positions (categorical, advanced, primary care categorical, and physician) except preliminary positions offered in a specialty. Preliminary positions are reported separately.

Positions Per Non-U.S. IMG: is the ratio of Total Positions to the number of Non-U.S. IMG for whom that specialty was the first or only choice.

Positions Per U.S. IMG: is the ratio of Total Positions to the number of U.S. IMG for whom that specialty was the first or only choice.

Positions Per All IMG Applicants: is the ratio of Total Positions to the number of Non-U.S. IMG and U.S. IMG for whom that specialty was the first or only choice.

Note: Specialties with fewer than 20 total positions are not displayed on this table.

<sup>\*</sup> The **TOTAL** row includes all positions in all specialties.

### **Tables 12A, 12B & 12C; Figure 6**

Tables 12A, 12B and 12C present data on applicants who ranked each specialty as their only choice in the 2025 Match. Table 12A reflects outcomes for U.S. MD and DO seniors; Table 12B reflects outcomes for U.S. MD and DO graduates. The same categories are presented in Table 12C for U.S. IMGs and non-U.S. IMGs.

Overall, 3,421 (58.4 percent) of matched U.S. DO seniors who ranked only one specialty (5,862) matched to a primary care specialty (Family Medicine, Internal Medicine (Categorical), Internal Medicine/Pediatrics, or Pediatrics (Categorical)) compared to 6,689 (44.4 percent) of matched U.S. MD seniors who ranked only one specialty (15,062). In contrast, 69.3 percent (1,377 of 1,986) matched U.S. citizen IMGs who ranked only one specialty matched in primary care along with 80.4 percent (3,440 of 4,277) of non-U.S. citizen IMGs.

As seen in Figure 6, higher proportions of unmatched U.S. MD seniors and DO seniors have been observed in traditionally competitive specialties like Neurological Surgery, Orthopedic Surgery, Plastic Surgery, Dermatology, General Surgery, and Otolaryngology.

### Table 13 and Figure 7

Table 13 reflects 2016-2025 trend data representing the percentages of U.S. MD seniors, U.S. DO seniors, U.S. MD graduates, U.S. DO graduates, U.S. IMGs, and Non-U.S. IMGs who matched to their first, second, third, fourth, or lower than fourth program choice on their rank order lists. (See Table 6 for trends in overall match rates by applicant type based on total active applicants).

Importantly, because there is no standardized methodology for the development of the rank order list and there are a variety of ways in which applicants approach their preferences, this data has no implications about the applicant or match quality and should not be used to form conclusions about success in matching or changes in the likelihood of matching.

In 2025, 47.6 percent of matched U.S. MD seniors matched to their first-choice programs, 0.3 percentage points lower than in 2024. Among matched U.S. DO seniors, the percentage of first-choice matches was 46.9 percent, 2.1 percentage points higher than in 2024. Among all active U.S. MD senior applicants, 6.1 percent were unmatched; among all active U.S. DO senior applicants, 7.0 percent were unmatched.

Figure 7 shows the percentage of applicants matched to programs by rank choice using both matched applicants (top two figures) and all applicants (bottom two figures).

Note: The above data has no implications about applicant or match quality. Ranking preferences are individualized decisions based on a variety of factors.

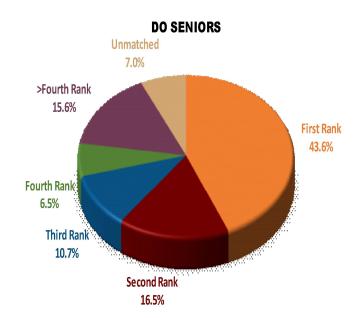

### **Matched Applicants**

### **All Applicants**

### **Table 14 and Figure 8**

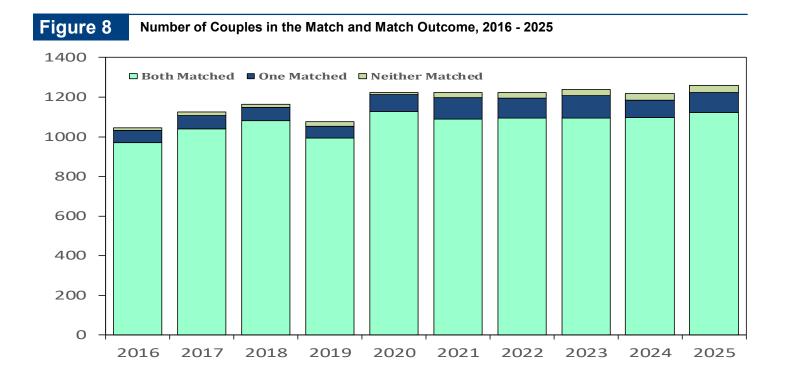

A couple is identified as any two individuals who identify themselves as such in the R3 system and who submit rank order lists of identical length. The matching algorithm treats the two lists as a unit; matching the couple to the highest pair of program choices where both partners obtain a match.

Table 14 presents the number of couples in the Match and their match outcomes. In 2025, 2,518 individual applicants participated in the Match as a couple (2,518/2 = 1,259 couples).

Couples often rank the same program multiple times against a different program on the partner's list. They also have the option of one partner indicating a willingness to be unmatched at a specific rank on the rank order list if the other partner matches to the program paired to that rank. Table 14 shows the number of couples matched with that option in the One Matched column (102 in 2025).

Individuals participating in the Match as a couple are generally successful with individual match rates above 90% since 1984. In 2025, the match rate for individuals participating in a couple was 93.2 percent, calculated by adding the number of 'Both Matched'  $(1,122 \times 2 = 2,244)$  to the number of 'One Matched' (102) and dividing by number of 'Individuals' (2,518). Approximately 61 percent of couples are U.S. MD seniors.

Table 14	Number of	Couples in the M	latch and Matc	h Outcome, 201	6 - 2025	
Year	Couples	Individuals	Both Matched	One Matched	Neither Matched	Match Rate %
2025	1,259	2,518	1,122	102	35	93.2
2024	1,218	2,436	1,097	87	34	93.6
2023	1,239	2,478	1,095	114	29	93.0
2022	1,222	2,444	1,095	100	27	93.7
2021	1,224	2,448	1,089	108	27	93.4
2020	1,224	2,448	1,128	84	12	95.6
2019	1,076	2,152	993	59	24	95.0
2018	1,165	2,330	1,082	67	16	95.8
2017	1,125	2,250	1,040	66	19	95.4
2016	1,046	2,092	971	61	14	95.7

### Table 15

Table 15 displays the average number of ranked applicants needed to fill each position within programs by specialty. Only programs that filled all positions are included in the calculations. Specialties with fewer than 5 programs that filled all positions were excluded to maintain their confidentiality. Although this measure is affected by such factors as the number and geographic distribution of programs as well as the number of applicants ranked by the programs, it is a rough measure of specialty competitiveness. It may be more appropriate to interpret the data within each specialty across time and less appropriate to compare across specialties, especially specialties with a large proportion of programs that do not fill.

Using Emergency Medicine as an example, on average programs that filled all positions ranked 8.8 applicants per available position in the 2025 Match. That figure represents a decrease of 0.9 ranked applicants per filled position when compared with the 2024 average of 9.7.

Average Number of Ranked Applicants Per Position Needed to Fill All Positions within Programs\*

<sup>\*</sup>Only those programs that filled all positions were included in the calculations. Specialties with fewer than 5 programs that filled all positions were excluded from this table to maintain anonymity.

### Tables 16 and 17; Figure 9

In 2012, NRMP launched the Match Week Supplemental Offer and Acceptance Program® (SOAP®) to replace the "Scramble," streamlining the process for unmatched applicants and the directors of unfilled programs. During SOAP, eligible unmatched or partially matched applicants apply to programs with unfilled positions. Programs interview applicants and create preference lists in the NRMP Registration, Ranking, and Results® (R3®) system, which offers positions to applicants in order of the program's preference through a series of offer rounds. Applicants accespt, decline, or allow an offer to expire once offered in SOAP but they do not create the preference lists in R3.

The universe of SOAP-eligible applicants is slightly different from that of unmatched active applicants. An applicant is eligible for SOAP if the applicant is 1) registered for the Main Residency Match, 2) eligible to enter graduate medical education on July 1 in the year of the Match, and 3) fully unmatched or partially matched (i.e., with only a preliminary or an advanced position) on Monday of Match week. Applicants do not have to submit rank order lists when the matching algorithm is processed to be eligible to participate in SOAP.

In 2025, 13,670 applicants were SOAP-eligible, 502 more than in 2024 (Table 17). In 2025, U.S. citizen and non-U.S. citizen IMGs together constituted more than two thirds (68.2 percent) of SOAP-eligible applicants. Compared with 2024, 716 more non-U.S. citizen IMGs and 297 fewer U.S. citizen IMGs were eligible for SOAP this year. The number of SOAP-eligible U.S. MD seniors was 17 more and U.S. DO seniors was 25 more than in 2024.

As is true for applicants, the universe of SOAP programs is also slightly different. Programs can elect not to submit a rank order list to be processed by the matching algorithm, but may still enter their positions in SOAP. Programs also can elect whether to participate in SOAP should they have unfilled positions after the matching algorithm is processed. In 2025, there were 47 programs that did not submit a rank order list, accounting for 118 unfilled positions. There were 882 programs with 2,591 unfilled positions. Additionally, there were unfilled programs that submitted a rank order list but elected not to participate in SOAP to fill their unfilled positions. After removing the unfilled positions in programs that elected not to participate in SOAP, 2,521 positions were placed in SOAP. 965 (38.3 percent) of the SOAP positions were PGY-1 only: 549 Preliminary Surgery, 146 Preliminary Medicine, 9 Preliminary Obstetrics and Gynecology, 1 Preliminary Pediatrics and 260 Transitional Year. Other specialties with large numbers of positions in SOAP were Family Medicine (805), Internal Medicine (359 categorical and 11 primary), and Pediatrics (144 categorical and 3 primary). There were 54 less SOAP positions offered in 2025 compared to 2024 and 105 less PGY-1 positions available.

During SOAP, offers are extended to applicants in rounds based upon the number of unfilled positions remaining in the program, and a position can be re-offered in a subsequent round to a different applicant if an offer from a prior round is rejected or expires. As presented in Figure 9, in 2025, a total of 3,757 offers were sent to applicants; of those, 2,318 were accepted, 1,324 were rejected, and 115 were left to expire. By the conclusion of SOAP, 91.9 percent (2,318 of 2,521) of the available positions in SOAP were filled, resulting in a 99.4 percent fill rate overall for all positions placed in the 2025 Match and SOAP. After SOAP's conclusion, 203 positions placed in SOAP remained unfilled.

As presented in Table 17, U.S. MD seniors accounted for 39.6 percent (918 of 2,318) of the total positions filled during SOAP. U.S. DO seniors accounted for 22 percent (511 of 2,318) of the total positions filled. IMGs, as a group, accounted for 27.1 percent (628 of 2,318) total positions filled during SOAP.

## Figure 9 Offers Extended in SOAP,\* 2016-2025

<sup>\*</sup>When an applicant accepts a position, the R3 system creates an automatic rejection of position offers for which the applicant no longer is eligible. A position may be offered in multiple rounds if it has not been accepted.
